

Agentic AI Business Transformation

Camping World & Good Sam — From Retailer to Lifestyle Ecosystem

Component Design · Reference Architecture · Progressive Capability Roadmap (2026 → 2028)

AUDIENCE	Enterprise Architecture / CTO Office
SPONSOR	Matthew Wagner — CEO
HORIZON	2026 Q3 → 2028 Q4 (10 quarters)
ARCHITECTURE	Event-driven · Composable · Agent-first

From Retailer to Self-Improving Lifecycle Engine

Strategic Thesis

Camping World does not need 'more AI.' It needs a coherent agentic capability platform that converts the 29M-record golden customer record, the service telemetry from an aging RV fleet, and the Good Sam subscription base into a self-improving lifecycle engine.

Margin expansion follows automatically from prediction quality, personalization fidelity, and inventory velocity. Agents — not point models — are the unit of architecture, because the value is in the closed loop of sense → decide → act → learn.

Five Outcomes Architected For

01

Predictive Service revenue uplift*+18% ESP attach by 2028*

02

Personalized lifecycle marketing*+22% campaign ROAS*

03

Dealership conversion*+9 pp lead-to-close*

04

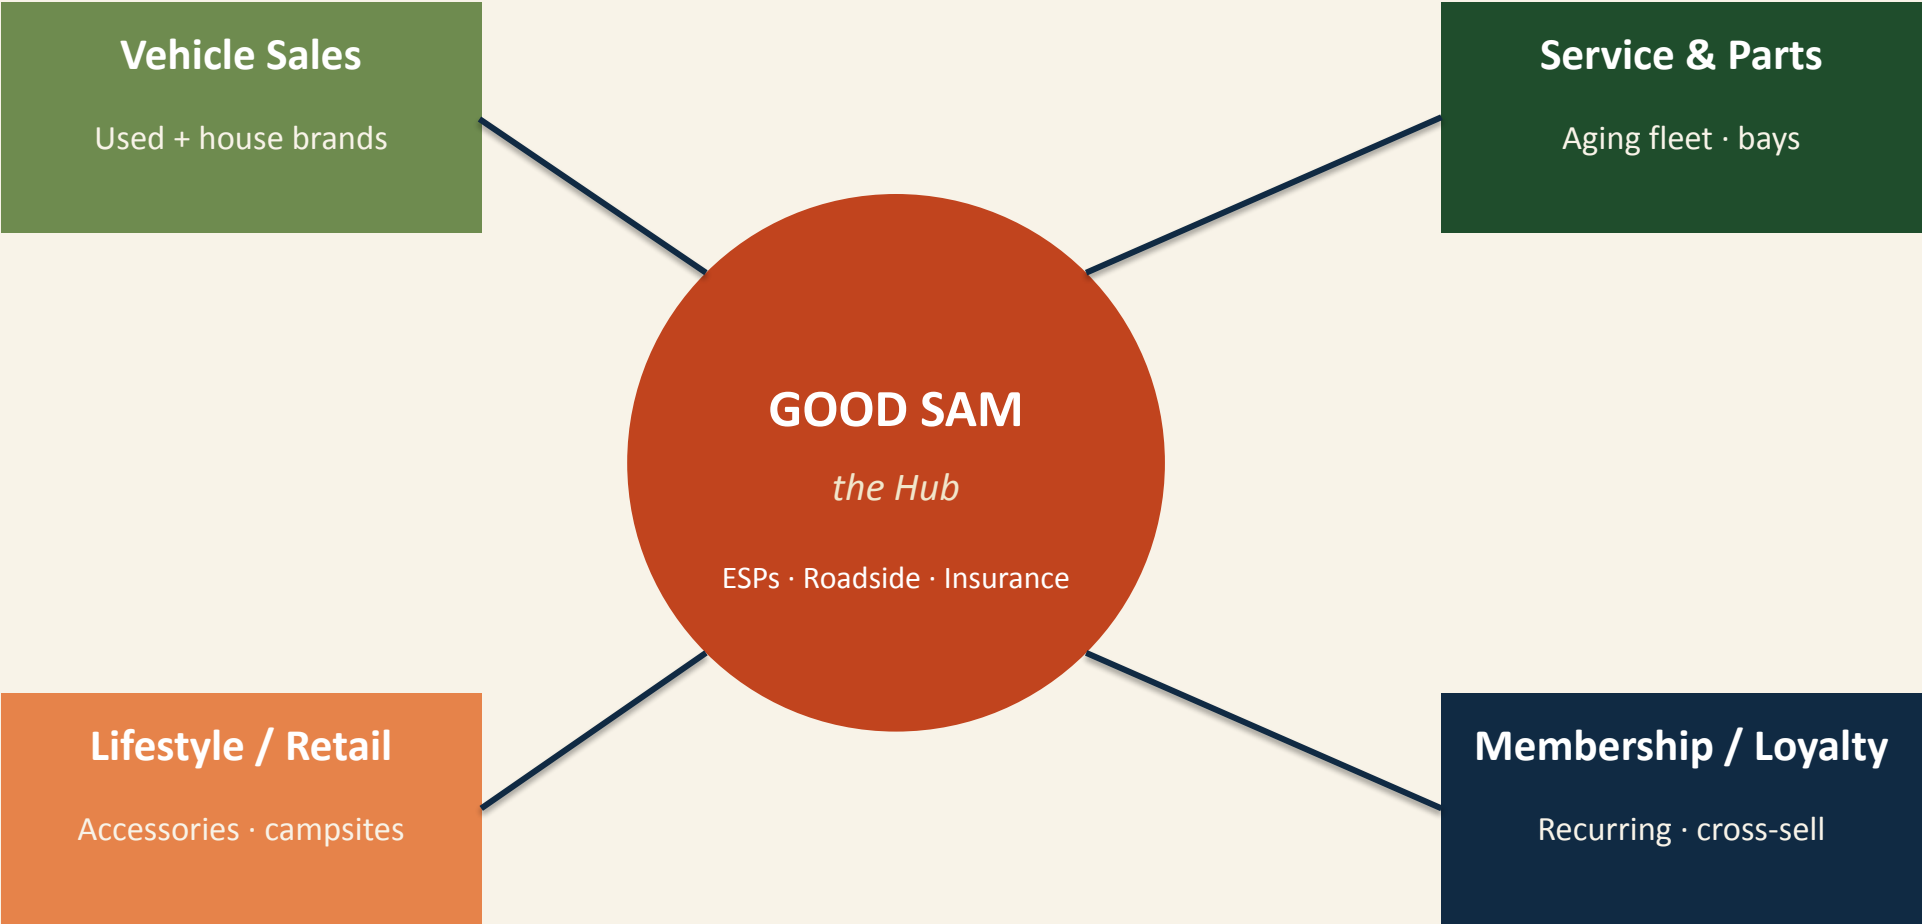

Inventory turn / aged-unit drag*−25% aged inventory*

05

SG&A cost takeout*−\$60M run-rate SG&A*

The Hub-and-Spoke Lifestyle Ecosystem

Camping World monetizes **the lifecycle**, not the transaction. Good Sam is the recurring-revenue Hub; every Spoke feeds it and is fed by it.

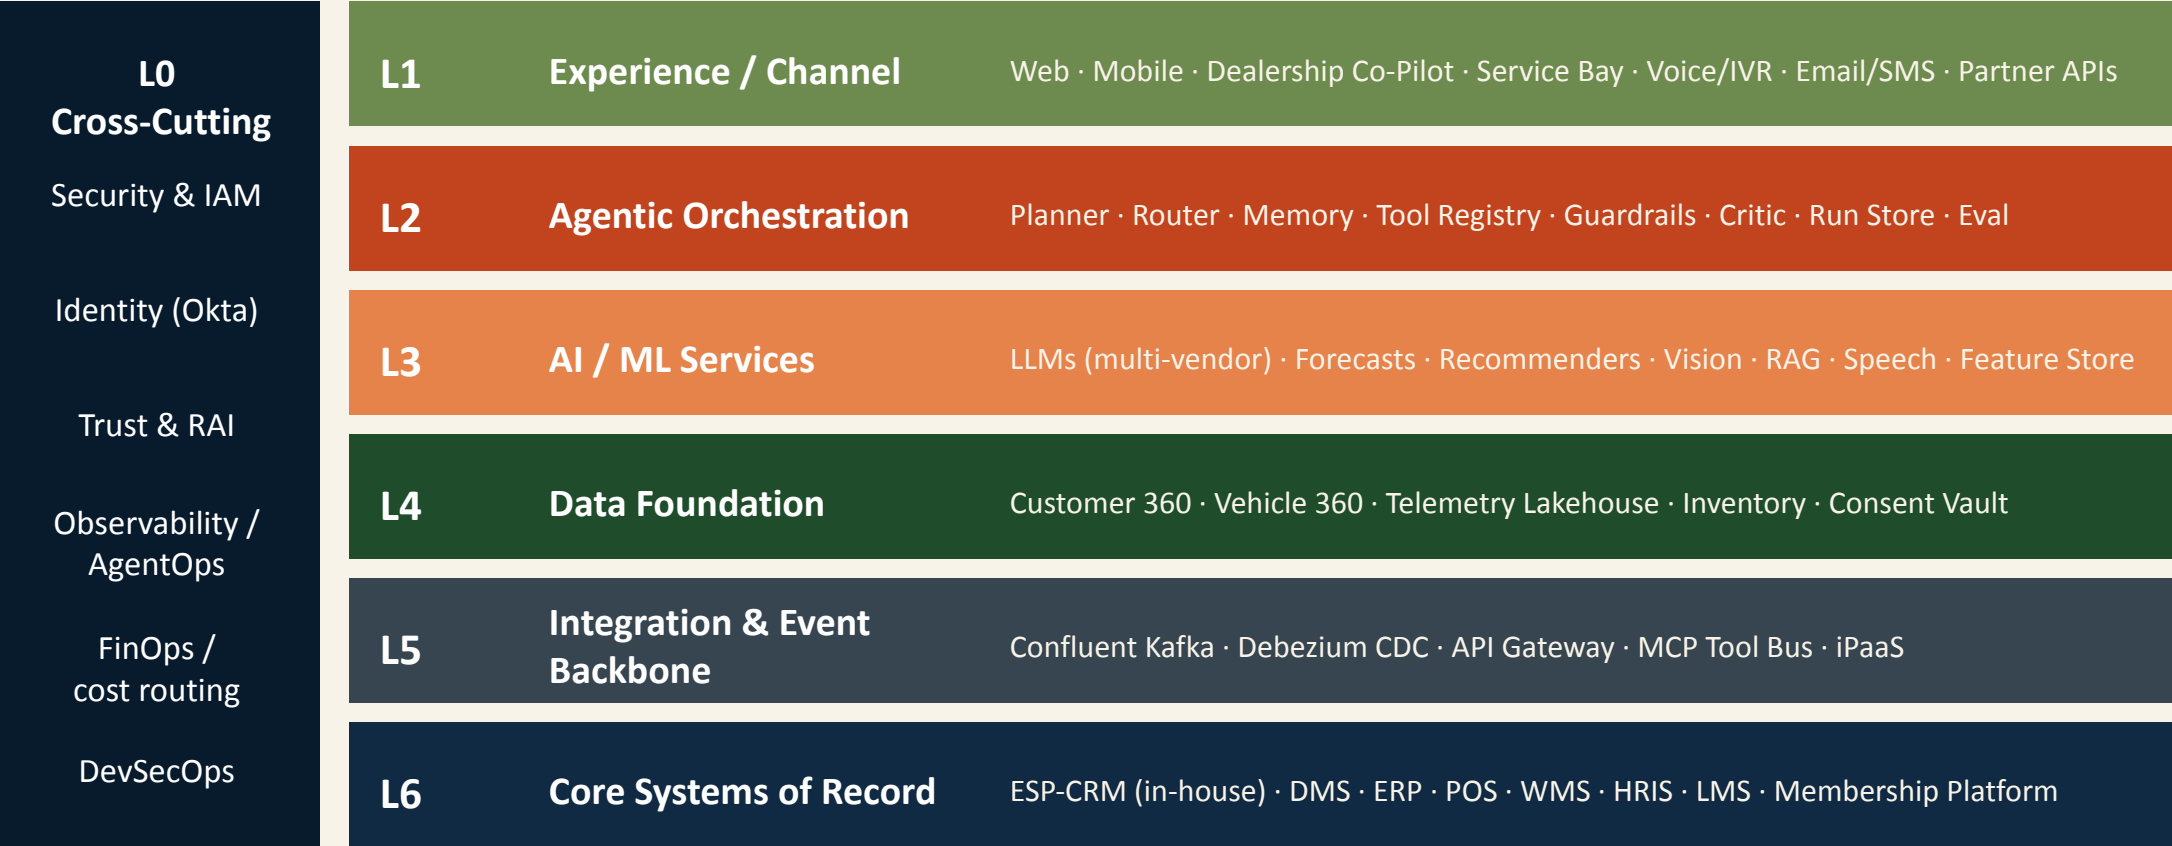

Ten Architecture Principles

P1 Domain-Aligned Agents <i>Bounded by domain data products</i>	P2 Composable, Not Monolithic <i>Models, prompts, tools = components</i>	P3 Golden Record is Truth <i>Identity through Customer 360</i>	P4 Event-Driven by Default <i>Sense-decide-act fires on events</i>	P5 HITL by Risk Class <i>Low / Medium / High encoded in contract</i>
P6 Observable Before Autonomous <i>Trace + eval + rollback before launch</i>	P7 Privacy & Consent as Code <i>Consent state is a typed input</i>	P8 Cost-Aware Routing <i>SLO + budget per agent invocation</i>	P9 Reversible Actions Preferred <i>Stage → commit, with rollback window</i>	P10 Open at Edges, Closed at Core <i>OpenAPI/MCP outside; in-house core</i>

Layered Reference Architecture

Each layer has clear ownership, contracts, and failure modes. Domains compose across layers; cross-cutting binds them.

Predictive Service — From Reactive to Prescriptive

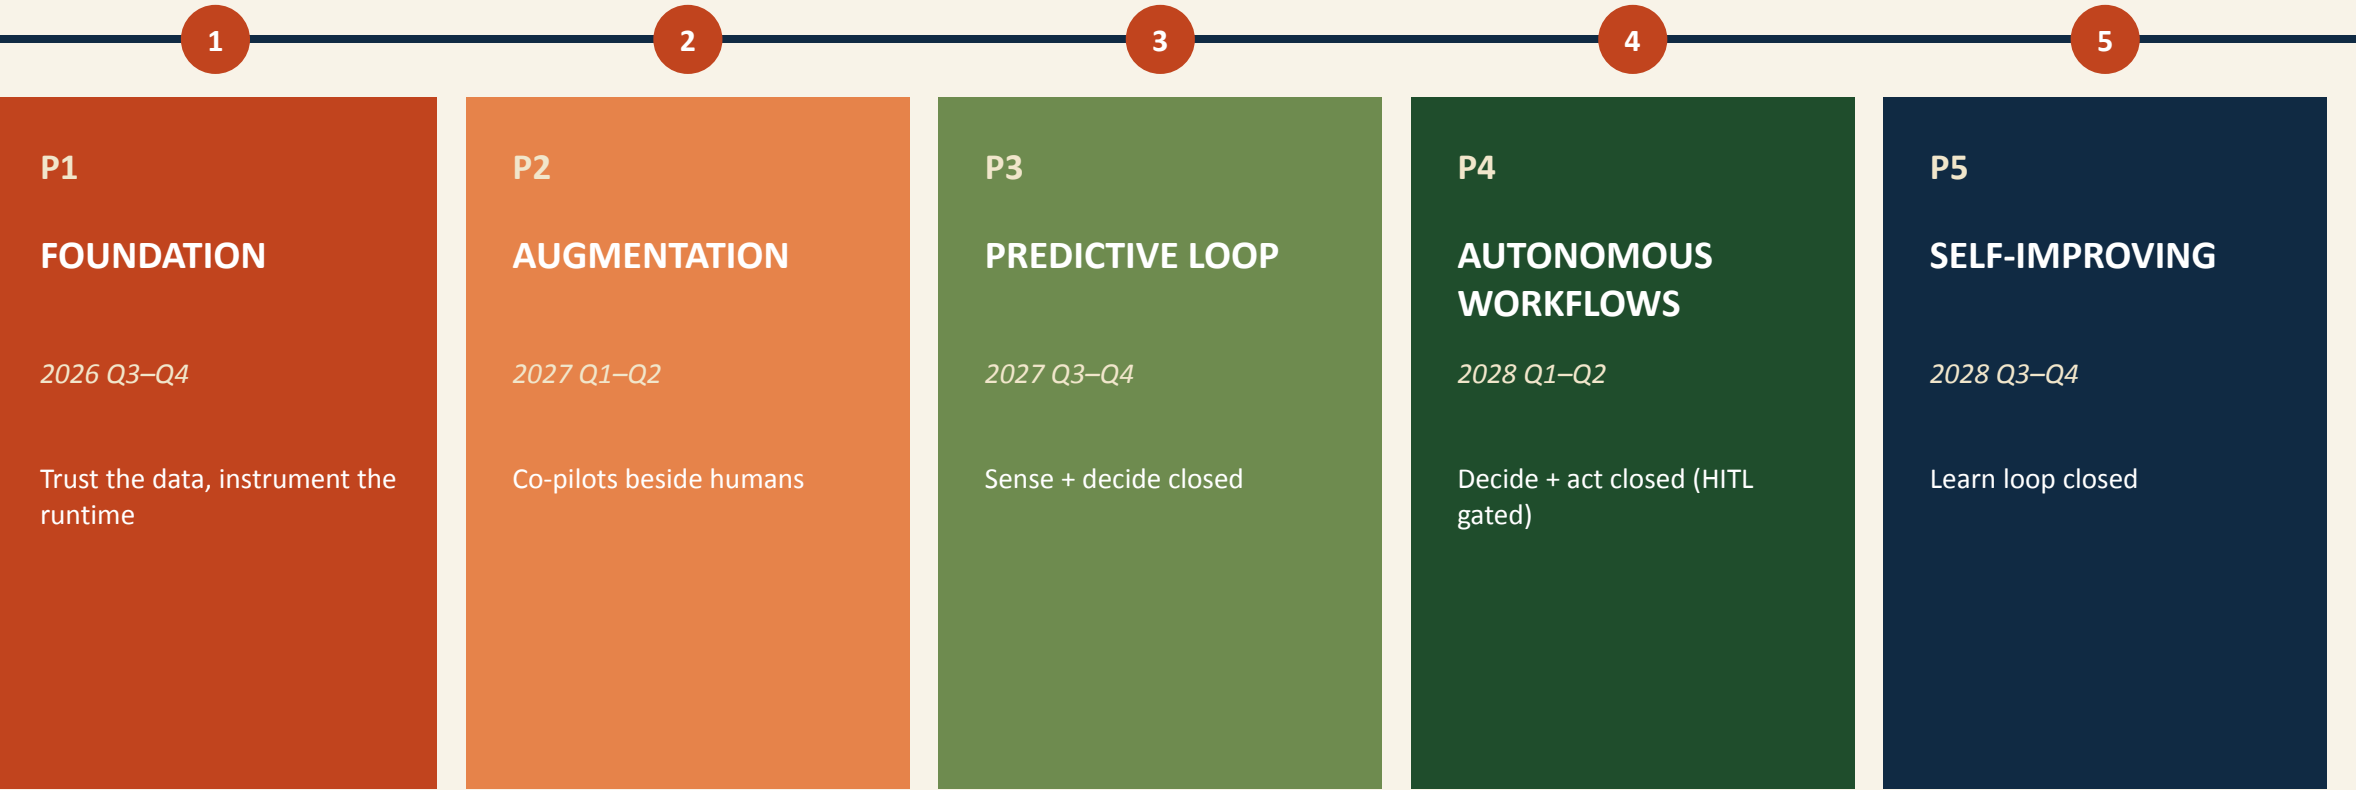

KPIs Targeted

Predictive booking rate	Roadside-failure incidents / 1k	ESP attach at point of sale	First-time-fix rate	Prediction → booked appt
0% → 35%	-25%	+8 pp	+12 pp	< 4 hrs

Security, Privacy & Responsible AI — Threat Model

Prompt injection (member input)	Layered filters · structured tool args · red-team gates
Tool abuse (over-privileged)	Least-privilege · signed manifests · per-tool rate limits
Data exfiltration via LLM	PII redaction in flight · allow-listed egress · output classifier
Model supply-chain compromise	Multi-vendor router · eval gates · SBOM for self-hosted
Drift / regression	Canary + golden eval set · auto-rollback on regression
Insider misuse	RBAC + JIT elevation · session capture for high-risk roles
Bias / disparate impact	Fairness eval gates · quarterly RAI council review

2026 → 2028 Roadmap at a Glance

Capability → Outcome traces

ESP attach +18% · ROAS +22% · Lead-to-close +90% · Aged inventory –25% · SG&A –\$60M run-rate

Component Catalog — Agents

Lead-Gen Chatbot Sales/CX L P1	Personalization Agent Marketing L P2	Recall & Campaign Agent Service L P3
AP Intake Agent Finance M P1	Failure-Mode Agent Service M P3	Price-Adjustment Agent Inventory H P4
HR Triage Agent HR L P2	Service Booking Agent Service L P3	Rebalance Agent Inventory H P4
Sales Co-Pilot Sales M P2	Inventory Forecast Agent Inventory L P3	Finance Close Agent Finance M P4
Service Scheduler Service L P2	Aging Risk Scorer Inventory L P3	RFx Drafting Agent Procurement M P4
Tech Diagnostic Co-Pilot Service L P2	Journey Orchestrator Marketing M P3	Member Concierge Agent Membership M P5

Risk: L = Low (read-only or draft only) · M = Medium (reversible writes, HITL above thresholds) · H = High (HITL by default)

WHAT GOOD LOOKS LIKE BY 2028

An agentic platform — owned, observable, accountable.

FOR THE MEMBER

Anticipated service before failure. Tailored offers that respect consent. A concierge who knows their unit, their trip, and their ESP.

FOR THE OPERATOR

Advisor co-pilots in every dealership and bay. SG&A automated where the work is repetitive. Inventory tuned daily, not quarterly.

FOR THE CTO OFFICE

A composable platform with clear contracts, owned core components, and a trust fabric that scales with autonomy.
