New Courses and Changes for 2012-13

Department	Course	Changes
Fine Arts	Intro to Digital Photography	From film to digital photography.
Social Studies	International Relations	Renamed from American Foreign Policy.

Course Registration and Scheduling Timetable

January	Program of Studies posted online. Curriculum overview sessions for incoming freshmen and parents/guardians. Incoming freshmen and parents/guardians complete course requests online on Naviance. Optional evening for registration questions for incoming freshmen and families. Computers available for online registration.
February	Current freshmen, sophomores, and juniors will complete their course requests online and then finalize their selection with their counselors. Department Chairs meet to review placements for incoming freshmen.
February	Course requests available online for confirmation purposes. Please review course selections carefully. This is the last opportunity to make changes to course registrations.
April	Master Schedule of classes built.
May	Schedule conflicts resolved with counselors.
Mid-August	Class schedules posted online on Infinite Campus.

Course Placement Changes

Course change requests may be initiated by a teacher, student, counselor, or parent. A student's performance in present and past courses plus any relevant test scores and current progress can be used in deciding on a course change. The student must pick up a course change application in the Counseling Department, and obtain teacher, department chair, parent, and counselor signatures. It is expected that a conversation will happen at each level to make certain that the change is appropriate. Students and parents must be aware that the student's schedule may change. In some cases, class size may prohibit the change.

Course changes may occur between 9 weeks and 11 weeks of the first semester. Please see your counselor prior to February registration for an application to override a placement. Second semester course changes will only be considered during the first two weeks of second semester.

Graduation Requirements

Students are required to accumulate at least **41** credits for graduation.

Graduation and course requirements are listed below:

Content Area	Requirement
Applied Arts	1 Semester
English	4 Years
Fine Arts	1 Semester
Health	1 Semester (Health Education may be used to replace one semester of Sophomore P.E.)
Lab Science	2 Years
Mathematics	3 Years including Algebra and Geometry
Physical Education	4 Years (Fine Arts Dance may always be taken in addition to P.E. Dance taken during sophomore year will fulfill one credit in P.E. and one credit in Fine Arts.)
Social Studies	2 Years (Including one year of U.S. History.)
Traffic Safety	1 Semester (A student may substitute Traffic Safety with completion of private traffic safety course.)

Other Requirements

In addition to requirements listed above, students must:

- ◆ Satisfactorily complete the Constitution examination.
- ◆ Complete the Prairie State Achievement Examination (PSAE) during junior year.
- ◆ Demonstrate proficiency in Consumer Education. This requirement may be met by successfully completing one of the following courses:
 - ◇ Introduction to Business
 - ◇ Consumer Economics
 - ◇ Online Consumer Economics
 - ◇ Contemporary Living
 - ◇ Economics or AP Economics
 - ◇ Business Math
 - ◇ Work Study

Counseling Department

Each student has an assigned counselor and access to social workers and the career/college counselor. The department offers programs and assistance relative to testing, academic program planning, post high school choices, and social/emotional development. Diagnostic and supportive services are available to students who have special needs. Information on college admissions testing, financial aid, careers, college and career visitations, and special college programs is available in the College and Career Resource Center (CCRC).

Counselors assist students with course planning in freshman, sophomore and junior years. The Four-Year-Plan is the initial step for a freshman in the course planning process. The Four-Year-Plan is an academic course roadmap which a student, with assistance and direction from the counselor, develops to show which courses the student will take each year that s/he is at Deerfield. Following presentations in students' classes and/or in Freshman Advisory by representatives of each academic department, the counselor and student together, with help from the Freshman Advisory teacher and Senior Advisors, construct their individual Four-Year-Plan.

In sophomore and junior year, course selection and registration begins with the counselor meeting with his/her counselees in a group to discuss course options for the following year. Actual course registration takes place in February. Counselor involvement during course planning and registration establishes a solid foundation for the post-high school planning process in the junior and senior years.

Sources of Credit

Students earn credit toward graduation requirements by completing coursework, described in the Program of Studies, at a passing level (D-or better). A total of **ten (10) credits offered** by institutions other than District 113 and accredited by regional accrediting associations or the State Department of Education may be applied to the total credits required for graduation. Earning additional credits beyond ten may be approved by the Superintendent in extenuating circumstances.

Credits may be earned in these ways: (from institutions other than District 113)

1. Evening high school, foreign study programs, and college coursework may be accepted as credit toward graduation with prior approval of the Principal.
2. Correspondence and online courses (including those offered by the Illinois Virtual High School) may be accepted toward graduation with prior approval of the Principal. The courses may not be used in lieu of regular courses offered by the school, but may be used to enrich a student's program where the school feels this to be appropriate and useful to the student concerned. Courses required for graduation or used to fulfill graduation requirements are not eligible to be taken as correspondence or online courses.
3. Coursework taken at an ethnic language school will be accepted as credit toward graduation with prior approval of the Principal. The school must have an Illinois Board of Education Certificate of Non-Public School Recognition or a comparable certificate from another state. Credits will be awarded on a pass/fail basis, but will not apply toward the total number of pass/fail credits allowed per semester as outlined elsewhere in this publication. Sixty hours of classroom instruction will equal one credit. Credits will be shown as transfer credit, and must be earned during the summer immediately preceding freshman year or while the student is enrolled in high school.

Independent Study

Students may propose independent study projects in order to pursue advanced study not offered in the curriculum which involves a dimension different from that offered in a regularly scheduled class. Independent study courses may earn up to one credit per semester or two credits for a year-long course. Interested students should develop a project proposal in conjunction with a faculty sponsor. Departments may have special prerequisites for independent study; applicants are encouraged to meet with the department chair prior to developing a proposal. An independent study project could be taken on a pass/fail basis or for a grade. Projects of unusual difficulty may qualify for Honors designation on a pass-fail basis only. However, in the event that a student has exhausted the Honors/AP curriculum but has not exceeded the total number of Honors/AP credits available within the department, he or she will have the option of pursuing Honors Independent Study and receive a weighted grade. The approval of the sponsor, the department chair, the student's parents and counselor, and an assistant principal is required. Proposal forms are available online. Proposals include these elements: rationale for request, objectives of the plan, mechanics of meeting times, the nature of the final product, and evaluation procedures. Independent study proposals must be submitted to the student's counselor by the end of the third week of each semester.

Academic Policies

Auditing a Course

Auditing a course is a privilege which may be granted to a student in special circumstances, such as remediation, opportunities for learning experiences outside of the usual curriculum sequence, or adjustment for transfer students. Auditing is not intended to replace the pass/fail option, as no grade is given. No academic credit will be assigned for this work and it will not meet any graduation requirement. An audit may be used to satisfy a part of the 300-minute requirement for daily attendance, but it may not be used to satisfy a part of the required course load for a student. The initial step in auditing a course is to contact the counselor to discuss an audit agreement. Final approval is made by the department chair and an assistant principal.

Course Designation

Students enroll in courses based on prior achievement, prerequisites, teacher placement, counselor recommendations, and standardized test scores.

- ◇ *Honor and Advancement Placement*: Accelerated courses that require students to work independently and demonstrate high levels of critical and analytical thinking.
- ◇ *Standard (College Preparatory)*: Courses that demand high levels of cognitive and problem-solving processes. The instructional pace is rigorous and emphasizes curricular depth, breadth, and enrichment.
- ◇ *Survey (College Preparatory)*: Courses that provide instruction to enhance skills in reading, writing, research, critical comprehension, thinking, and reasoning.

Course Placement Changes

Course change requests may be initiated by a teacher, student, counselor, or parent. A student's performance in present and past courses plus any relevant test scores and current progress can be used in deciding on a course change. The student must pick up a course change application in the Counseling Department, and obtain teacher, department chair, parent, and counselor signatures. It is expected that a conversation will happen at each level to make certain that the change is appropriate. Students and parents must be aware that the student's schedule may change. In some cases, class size may prohibit the change.

Course changes may occur between 9 weeks and 11 weeks of the first semester. Please see your counselor prior to February registration for an application to override a placement. Second semester course changes will only be considered during the first two weeks of second semester.

DHS Scholars

Seniors with a 3.8 grade point average on the unweighted scale or 4.4 on the weighted scale will be named DHS Scholars. The first number after the decimal must be 8 or 4; we will not round up in order to determine this.

Dropping a Course

A course may be dropped without a grade penalty up to and including the end of the 8th week of the semester.

English Language Learners

Township High School District 113 provides a transitional program of instruction for students with no or limited English. The program is housed at Highland Park High School. Students who might benefit from ELL support are identified at the time of enrollment. In addition, arrangements for assessment are made to determine students' eligibility for the program. A Deerfield student who needs to take ELL courses at Highland Park High School but wishes to remain a Deerfield student for extracurricular or social reasons, must state his/her intentions in writing before beginning the academic program at Highland Park High School. Records and other important information will be duplicated and on file at Highland Park High School for Deerfield students taking ELL courses at Highland Park. Students will be on the mailing lists for both high schools to ensure adequate communication between school and home.

Final Examinations

At the end of each semester, final examination days are scheduled to provide time for written or oral examinations or their equivalent, e.g., an individual interview or a research project. It is expected that exams will be taken as scheduled. However, extenuating circumstances should be brought to the attention of the counselor. Semester exams are not to exceed more than 20% of a student's semester grade. All sections of a given course will have the same assessed percentage. Departments will determine the appropriate percent for the semester exam. Graduating seniors with an average of B- or better in a class are excused from taking that exam. The exemption occurs only in the semester of graduation (a junior graduating early also follows these procedures).

Academic Policies, continued

Financial Assistance

Enrollment in a class is not contingent upon the student's ability to purchase necessary class materials. Any student unable to pay any special course costs or purchase required textbooks may apply for financial assistance. Information can be found in Room K115 or contact your counselor for further information.

Freshman Advisory

Freshman Advisory is assigned to all freshmen for the purpose of orienting students to Deerfield High School's programs, facilities, and extracurricular activities. Freshman Advisory assists students in their development of self and social awareness skills that will support them as they establish and maintain positive relationships and make responsible personal and academic decisions. Developing efficient and effective study skills is also an area of focus for Freshman Advisory. Music or theatre advisory is an option for students. In addition to the standard performance-based music and theatre curricula taught in the freshman music and theatre classes, the music and theatre advisories also include the essential elements of the freshman advisory program. Music and theatre advisories participate in many group presentations, guest speakers, and other advisory initiatives. Specific advisory activities designed to develop self and social awareness skills, build positive relationships, and make healthy decisions are chosen from among the provided resources and included appropriately as time allows.

Grade Point Average

Township High School District 113 utilizes a 4.0 grading scale. Grade Point Average is computed by dividing the total points earned by the total number of credits. All grades earned in AP and Honors courses will receive one additional honor point.

Grade	Percentage	Grading Scale
A	100-93	4.00
A-	92-90	3.67
B+	89-87	3.33
B	86-83	3.00
B-	82-80	2.67
C+	79-77	2.33
C	76-73	2.00
C-	72-70	1.67
D+	69-67	1.33
D	66-63	1.00
D-	62-60	.67
F	59 and below	0.00
P		Passing grade (is not computed for GPA)
R		Replacement grade (is not computed for GPA)
AU		Audit (is not computed for GPA)
Med		Medical reason (is not computed for GPA)
Drop		Dropped course (is not computed for GPA)
I		Incomplete

Honor Roll

To determine Honor Roll recognition, all grades in courses taken for credit, except for Physical Education, are included without regard to course designation. The grade earned in Physical Education is not factored into Honor Roll. A GPA of 3.33 is required for high honors, and 2.67 is required for regular honor roll. Students may not earn high honor recognition with a grade less than C. Students may not earn regular honor roll recognition with a grade of F.

January Graduation

Students who have satisfactorily completed all graduation requirements and have earned at least 41 credits at the end of the first semester of any year may withdraw in January and receive their diploma. They also have the option of participating in the June graduation ceremony.

Minimum Load

Students are required to carry a minimum load of five credits including Physical Education each semester they are in school. An academic program should be selected which challenges the student, while allowing him/her to remain healthy.

Academic Policies, continued

Pass-Fail Option

The intent of pass-fail is to encourage students to experiment and explore by taking courses they would not take otherwise. Students may not take prerequisite courses or graduation requirements on a pass-fail basis. Except with the permission of the department chair, only the last semester in an intended sequence may be taken pass-fail. The application deadline to take a course pass-fail is the end of the 8th week of the semester. If a student is interested in this option they are advised to contact their counselor prior to the eighth week of the semester.

Any student requesting the pass-fail option must have at least 37 of the 41 credits required for graduation in regularly graded courses. The number of courses that can be taken pass-fail during a given semester varies according to the student's total course load and number of credits earned. See your counselor for more information.

To obtain a "Pass" in a course, the student must obtain a minimum grade of "D-" or better and satisfy the regular requirements of that course. The student must meet the same attendance requirements as regularly graded students. Seniors on pass-fail may elect not to take the final exam during their final semester if they have a grade average of at least 80% at the time of the exam. Please note that taking a subject pass/fail could have an impact on college admissions.

Physical Education Waiver

Students who wish to apply for a physical education waiver should request an application from the Physical Education Department Chair. Exemption from the physical education requirement is available to:

1. Junior and senior athletes during their sport season. The athlete will be enrolled in a supervised study hall.
2. Students whose admission to an institution of higher education is dependent on the completion of a given course and who are enrolled in six courses (including physical education). Documentation of the specific need must be provided to the student by the institution of higher learning. If the waiver is approved, the student is enrolled in the needed course in place of physical education.
3. Students whose fulfillment of a graduation requirement is dependent on the completion of a given course and who are enrolled in six courses (including physical education). Documentation must demonstrate that the requirement cannot be fulfilled in any other way. If the waiver is approved, the student is enrolled in the needed course in place of physical education.

Prerequisites

Prerequisites have been established for certain courses in each department. These prerequisites restrict entry into these courses because prior completion of certain coursework or the achievement of a designated level of proficiency is considered essential for success. Students interested in enrolling in a course for which they do not meet the prerequisites should contact the appropriate department chair to discuss strategies for acquiring and demonstrating the necessary skills. These strategies may include auditing a course, earning credit in summer school, or taking a proficiency exam. Contact with the department chair should be initiated prior to the completion of the registration process in February or as soon as the lack of the prerequisite is determined.

Proficiency Examination

Students may receive placement (but not high school credit) in a sequential course by passing a proficiency examination in place of taking a course that is the prerequisite. Students interested in further information regarding proficiency examinations should contact the department chair.

Registration

Students register with their Counselors during February for the following school year. The number of class sections, the subjects to be taught, and teacher assignments are based on this registration. The role of the Counselor in the registration process includes the following:

1. Counselors hold individual and group (small and large) meetings with their assigned counselees for the purpose of reviewing plans, credits, interests, graduation requirements, etc.
2. Throughout the process, counselors are available to meet with parents about course selection.
3. During the registration process, students complete registration with their own counselor.

Repeating a Course/Grade Replacement

If a student repeats a course, only the higher of the two grades will be counted for GPA. Both attempts will appear on the transcript; the lower grade will be replaced with the non-credit symbol "R." Students may repeat only those courses where the original grade is "C+" or below, and must repeat the course no later than the next school year. Students must request this option by filing a Grade Replacement Form with their counselor prior to the end of the 5th week of the semester. Approval by parent, department chair and counselor is required.

Academic Policies, continued

Report Cards and Progress Reports

Report cards are posted online to our Parent Portal following each nine week quarter. Class attendance is recorded as well as academic evaluation. Progress reports are posted online to our Parent Portal of students doing unsatisfactory work at mid-quarters. Teachers can also send progress reports at other times at their discretion.

Residency

For information regarding attendance areas and residency requirements, contact the Assistant Principal's Office or the Office of the Superintendent at the District Administration Building. This information can also be found on the DHS website.

Senior Advisory Program

Senior Advisors are school leaders chosen through an application process to help in Freshman Advisory. Senior Advisors work collaboratively with a teacher and serve as a mentor to their students. Senior Advisors attend class every day, plan lessons with their teacher or other Senior Advisors, meet with counselors to discuss student and class issues, and attend meetings as planned by the Program Coordinator. Senior Advisors are placed in an Advisory with at least one other senior, and they typically make a full-year commitment.

Senior Teach Program

The Senior Teaching Assistant Program is a service opportunity for seniors interested in a classroom leadership position and selected through an application process. Seniors work collaboratively with a teacher, refine their skills and knowledge in a subject area, and see what it is like to be a teacher. Senior Teaching Assistants attend class every day, meet with the classroom teacher once a week to assist in planning, and attend meetings as planned by the Program Coordinator. Senior Teaching Assistants make either a one semester or one year commitment.

School Rules, Regulations, and Student Conduct

At the beginning of the school year students purchase a DHS Planner at the Book Sale. This book has a section that outlines school policy on the following subjects: Care of personal and school property, reporting absences, tardiness, use of lockers, study halls, cafeterias, student identification cards, student conduct, health and safety, and school buses. In addition, the handbook portion contains the current school calendar and the daily time schedule. Students who choose not to purchase the DHS Planner will be mailed a copy of the handbook portion at no charge. Students and parents are urged to familiarize themselves with the contents.

Student Information and Records

Federal law requires school districts to notify parents, guardians, and eligible students (18 years of age and older) of their right to inspect and review educational records, and to seek an amendment of the records if they believe them to be inaccurate. Requests to inspect and review or seek an amendment to a student's educational records should be directed to the student's building principal. Disclosures of personally identifiable information will not be made to third parties without the consent of a parent, guardian, or eligible student, except as otherwise permitted by law. Complaints regarding compliance with federal laws regarding the maintenance of educational records may be made to the U.S. Department of Education's Family Policy Compliance Office.

Permanent Record: The permanent record is a listing of courses attempted, grades received, attendance and, in some cases, state, national and college aptitude/achievement test scores. Permanent records are maintained by the school for 60 years. Records that are classified as temporary records are maintained for a 5 year period following termination of attendance. Upon written consent of the student or his parents, a copy will be sent to a college, employer, or other designee. After the student is 18 years old copies will be sent only with the student's written consent.

Transfer of Credits

1. Credit earned by Deerfield High School students in educational programs outside High School District 113 is subject to review prior to acceptance by the assistant principal and registrar.
2. Students entering DHS from another high school may earn Advanced Placement/Honors credits only for courses in which DHS students have had an equivalent opportunity to earn Advanced Placement/ Honors credit.
3. A maximum of ten (10) credits offered by an institution other than District 113 and accredited by regional accrediting associations or the State Department of Education may be applied to the total credits required for graduation. Earning additional credits (beyond 10) may be approved by the superintendent in extenuating circumstances.
 - Evening high school, foreign study programs, and college coursework may be accepted as credit toward graduation with the prior approval of the Principal.
 - Correspondence and electronic courses (including those offered by the Illinois Virtual High School) may be accepted toward graduation with prior approval of the principal. The courses may not be used in lieu of regular courses offered

Academic Policies, continued

by the school, but may be used to enrich a student's program where the school feels this to be appropriate and useful to the student concerned. Courses required for graduation or used to fulfill graduation requirements are not eligible to be taken as correspondence or electronic courses.

- Coursework taken at an ethnic language school will be accepted as credit toward graduation with the prior approval of the principal. The school must have an Illinois Board of Education Certificate of Non-Public School Recognition or a comparable certificate from another state. Credits will be awarded on a pass/fail basis, but will not apply toward the total number of pass/fail credits allowed per semester as outlined elsewhere in this publication. Sixty hours of classroom instruction will equal one credit. Credits will be shown as transfer credit and must be earned during the summer immediately preceding freshman year, or while the student is enrolled in high school.
- 4. Policy for grade transfer for students who enter DHS midterm directly from another school:
 - The registrar will inform each teacher of the grade earned by the student in the similar course at the previous school.
 - The teacher will use the grade in conjunction with the grades earned at DHS to determine quarter and semester grades.
- 5. Policy for grade transfer for students who enter midterm without having attended school previously that semester:
 - A student who enters school during the first three weeks of the semester without having attended school previously that semester will be required to do make-up work in each of his/her courses.
 - A student who enters after the third week but before the end of the twelfth week without having attended school previously that semester can get credit for courses if:
 - a. The student satisfactorily passes required work from the date of entry, and
 - b. The student passes the final examination, and
 - c. The teacher recommends that full credit be awarded. The teacher will recommend that full credit be awarded if the student is judged to be ready to move into the next course in the sequence or has achieved a level of learning similar to other students in the course.
 - A student who enters midterm without having attended school previously that semester who is not granted credit will receive a semester grade of "Audit."
 - A student entering after the end of the twelfth week without having attended school previously that semester will not be eligible for credit. S/he will receive a semester grade of "Audit."

Withdrawal from School

A student withdrawing from school should request a check-out form from his counselor or an assistant principal. Parent verification is necessary. The student obtains the signatures of his/her teachers and gets verification from the bookstore, the library, and the Physical Education Department that s/he has returned school equipment and library books. A transcript of the student record will be sent to the student's new school upon request.

Freshman Advisory

Freshman Advisory is assigned to all freshmen for the purpose of orienting students to Deerfield High School's programs, facilities, and extracurricular activities. Advisory class assists students in their development of self and social awareness skills that will support them as they establish and maintain positive relationships and make responsible personal and academic decisions. Developing efficient and effective study skills is also an area of focus for Freshman Advisory. Music and Theatre advisories are an option for students. In addition to the standard performance-based music curriculum taught in the freshman music/theatre classes, the music/theatre advisories also include the essential elements of the freshman advisory program. Music/theatre advisories participate in many group presentations, guest speakers, and other advisory initiatives. Specific advisory activities designed to develop self and social awareness skills, build positive relationships, and make healthy decisions are chosen from among the provided resources and included appropriately as time allows.

Summer School

In order to provide students an opportunity to expand their high school learning experience, take a course for grade replacement (please see our grade replacement policy for details), or to make up a credit deficiency, District 113 offers a six-week summer program. Actual course offerings and specific site information will be listed in the summer school brochure, which is available on the district website. The maximum number of credits that a student may earn in one summer session is two credits.

Applied Arts

The Applied Arts Department consists of the following areas:

Business Education
 Communication Technology
 Family and Consumer Science
 Lake County High Schools Technology Campus

While specific goals may vary within each area, department emphasis is placed upon:

1. Developing sound character, the ability to get along with others, skills in planning and safety, and a sense of responsibility toward active participation in a democratic society.
2. Providing a vocational program that will prepare students for entry into business and industry by equipping them with vocational knowledge and marketable skills.
3. Training students to use the resources at hand for the greatest personal and family satisfaction and to make effective use of leisure time in creative, vocational activities.

Applied Arts courses are open to all students. One semester of Applied Arts is required for graduation.

APPLIED ARTS: BUSINESS EDUCATION COURSE OFFERINGS

	Freshman	Sophomore	Junior	Senior
Introduction to Business	X	X

(s) Denotes a semester course. *See course description for availability.				

INTRODUCTION TO BUSINESS

155152 / 155154

Prerequisite: None

Open to: Grades 9-10

Note: Successful completion of this course fulfills the graduation requirement for Consumer Education.

This course is designed to furnish students with information needed to function effectively in the business world as a worker, a consumer, and a citizen. It enables the student to understand money management, banking, investments, credit, insurance, and wise buying, and features assignments in computers, competition, international trade, banking, careers, stock market, business ethics, and wise shopping. Extensive work and research is done in the area of career exploration. Students learn about careers in general and about their own interests and values. Career tests are taken, classroom discussion follows, and each student selects a career for further investigation.

BUSINESS LAW (s)

154652 / 154654

Prerequisite: None

Open to: Grades 11-12

Note: Will be offered in the 2012-2013 school year. Not available during the 2013-2014 school year.

In Business Law, students learn about rights and duties that arise from such contractual situations as sales, employment, credit, and insurance. Topics from both criminal and civil law are covered. Actual court cases, current events, and legal documents are

Applied Arts, continued

reviewed and discussed. Panel discussions, videos, guest speakers, debates, field trips to the courts and jail are integral parts of this course. Students use problem-solving skills and critical thinking as they engage in the topical discussions and projects in this course.

CONSUMER ECONOMICS (s)

154752 / 154754

Prerequisite: None. Students who have previously taken Introduction to Business are NOT eligible.

Open to: Grades 11-12

Note: Successful completion of this course fulfills the graduation requirement for Consumer Education.

Because our economy is constantly changing due to the development of new products, services, and methods for meeting the changing needs, we are free to exercise choice among many alternatives in both earning and spending. Consumer economics focuses upon the development of the skills, concepts, and understandings required for everyday living, so that an individual may achieve maximum utilization of and satisfaction from his resources. Topics included are budgeting, banking, housing and renting, all forms of credit, insurance, savings and investments, income management, taxation, the art of spending, advertising, labels, competition, and sources of consumer information. Projects and “hands on” applications are used where appropriate.

CONSUMER ECONOMICS ONLINE (s)

154852 / 154854

Prerequisite: None. Teacher recommendation suggested.

Open to: Grades 11-12

Note: Successful completion of this course fulfills the graduation requirement for Consumer Education.

This course is intended for the highly motivated student. Students will complete the majority of assignments outside of the school day. Consumer Economics Online is designed to enable the student to recognize the role s/he plays as a consumer in our economy. Students will learn good management of personal business affairs, including consumer law, banking services, credit loans, installment buying, budgeting, housing, informed and skillful buying, consumer protection agencies, and the role of business and government in our economy. Emphasis is placed on developing personal economic decision making competence. Weekly course work consists of forums, assignments, and on-line quizzes.

NOTE: *The only mandatory day of attendance is during Early Bird on the first Friday of the semester.*

The rest of the course will be completed on-line. Meetings are only required if requested by teacher or student.

CONSUMER ECONOMICS ALTERNATIVE (s)

858042 / 858044

Prerequisite: Departmental recommendation

Open to: Grades 11-12

Note: Successful completion of this course fulfills the graduation requirement for Consumer Education.

This course focuses on the development of skills, concepts and understandings required for everyday living. Topics included are economic models, comparison of various American economic theories, development of a personal budget, the area of spending, advertising, and sources of consumer information. Activities include lecture, discussion, group and individual projects.

ENTREPRENEURSHIP (s)

155452 / 155454

Prerequisite: None

Open to: Grades 10-12

Note: Not available during the 2012-2013 school year. Will be offered in the 2013-2014 school year.

This exciting course is designed to introduce students to the many aspects of running their own business. Topics include site selection, employee relations, business communications, customer relations, management techniques, and marketing campaigns. Various projects are used to assist students in learning to organize and operate a company. These projects will form a final Business Plan and serve as a final exam.

ACCOUNTING

154952 / 154954

Prerequisite: None

Open to: Grades 11-12 or departmental approval

This course uses an integrated approach to teach accounting. Students first learn how businesses plan for and evaluate their operating, financing and investing decisions and then how accounting systems gather and provide data to internal and external decisions makers. Topics include an introduction to accounting, accounting information systems, time value of money, and accounting for merchandising firms, sales and receivables, fixed assets, and corporate finance. The intent of this course is to give students a sample of college level accounting concepts.

Applied Arts, continued

HONORS ACCOUNTING

155072 / 155074

Prerequisite: None

Open to: Grades 11-12 or departmental approval

This course uses an integrated approach to teach accounting. Students first learn how businesses plan for and evaluate their operating, financing and investing decisions and then how accounting systems gather and provide data to internal and external decisions makers. Topics include an introduction to accounting, accounting information systems, time value of money, and accounting for merchandising firms, sales and receivables, fixed assets, and corporate finance. Students will be expected to display the ability to function independently outside of class and take on extra material. Higher level thinking skills are utilized as students develop their capacity to prepare for a college level business curriculum. The intent of this course is to challenge business students to master college level accounting concepts.

MARKETING (s)

155252 / 155254

Prerequisite: None.

Open to: Grades 11-12 or departmental approval

The purpose of the course is to provide students with the fundamental principles and concepts identified with marketing and to develop critical thinking and decision-making skills through the application of marketing principles and applied through a variety of businesses. Traditional business and the sports and entertainment world lend a wealth of opportunities for students to develop projects and study real-life situations. Students will create marketing plans and projects throughout the semester, with a culminating semester project to be presented using all concepts and technology learned throughout the semester. This is a fundamental course for any student who is interested in pursuing business at the college level.

INVESTING (s)

155552 / 155554

Prerequisite: None

Open to: Grades 11-12 or departmental approval.

Investing is a course that allows students to engage in an examination of securities, markets, investment opportunities and techniques for individuals. Topics include stocks, bonds, mutual funds, insurance, real estate, and portfolio management. This course will emphasize “real world” business and investment situations for student analysis and decision-making strategies. Students who are interested in a Business major or minor in college would benefit greatly from this course.

WORK STUDY FUNDAMENTALS

851012 / 851014

Prerequisite: Departmental recommendation

Open to: Grades 9-12

Note: This course may be repeated for credit. Semester 1 fulfills the Applied Arts requirement. Semester 2 fulfills the consumer education requirement and applied arts requirement.

This course explores the world of work by helping students identify their career interests and aptitudes. It provides opportunities for students to become more familiar with different careers and work environments. The course also covers budgeting, banking, income taxes, insurance and credit. This course may be repeated for credit.

WORK STATION

851112 / 851114

Prerequisite: Departmental recommendation

Open to: Grades 9-12

Note: This course fulfills the applied arts requirement. It may be repeated for credit.

The purpose of the work station program is to provide students with supervised in-school or community based work experiences to facilitate their vocational development. The needs of individual students and employers are considered to foster mutual benefit from the program. The work schedule may be a portion of the school day and / or outside of school time depending upon the needs of the student and employer. Most students in community based jobs work an average of 10 hours per week. To maximize the student's experience it is suggested that they take the Work Study course in conjunction with Work Station. Students earn one credit per semester.

Applied Arts, continued

APPLIED ARTS: FAMILY AND CONSUMER SCIENCE COURSE OFFERINGS

	Freshman	Sophomore	Junior	Senior
Child Development Pre-School Lab I		X	X	X
Child Development Pre-School Lab II			X	X
Fashion and Interior Design (s)	X	X	X	X
Contemporary Living			X	X
(s) Denotes a semester course.				

CHILD DEVELOPMENT PRE-SCHOOL LAB I

158652 / 158654

Prerequisite: None

Open to: Grades 10-12

Child Development Pre-School Lab I is a laboratory course that is designed to help students understand the social, emotional, physical and intellectual development of the preschool child. Each week, students will spend part of the time in the classroom and part of the time in the childcare center planning and teaching creative activities. Supervision and observation of the preschoolers are important parts of the learning experience. Units in the course include developmental stages of the preschooler, teaching strategies, positive communication, guidance techniques, working with diverse learners, and the use of technology for creative design. Students will plan developmentally appropriate lessons with other class members and consequently learn the social and emotional benefits of collaboration.

CHILD DEVELOPMENT PRE-SCHOOL LAB II

158752 / 158754

Prerequisite: Child Development Pre-School Lab I

Open to: Grades 11-12

Child Development Pre-School Lab II centers around a curriculum that enables students to know and apply principles related to developmental theory. The students increase their work as assistant and/or lead teachers in the on-site childcare center working with the junior kindergarten age children. They actively discuss the association of classroom practice and current research related to child development, and plan and implement creative activities in five core areas: art, cooking, literacy, math, and science. Collaboration and teamwork are emphasized in this course as the students work with the adult staff of the childcare center.

Students completing this course may re-enroll in subsequent years and create an independent learning experience that builds upon and refines acquired skills.

FASHION AND INTERIOR DESIGN (s)

159052 / 159054

Prerequisite: None.

Open to: Grades 9-12

This course introduces students to the fields of fashion design and interior design. Students will explore the development of a design from its inception through merchandising and marketing. Topics covered include the history of design, design principles, fashion design and merchandising, interior design, and career opportunities. The computer will be applied in the design process to reflect current practices in the profession.

CONTEMPORARY LIVING

158852 / 158854

Prerequisite: None.

Open to: Grades 11-12

Note: Successful completion of Contemporary Living fulfills the graduation requirement for Consumer Education.

Contemporary Living focuses on living successfully as an independent adult in today's world. Students will explore the emotional and financial aspects of living on one's own after high school. Through activities and discussions centered on Sean Covey's *The Seven Habits of Highly Effective Teenagers*, students will explore decision making, goal setting, self-concept, healthy relationships, effective communication skills, and personal wellness. Additional topics covered will include healthy lifestyles, parenting, budgeting, meal preparation, and consumer economic matters such as banking, consumerism, renting and/or buying a home, credit, insurance, and career exploration.

(s) Denotes a semester course.				

ARCHITECTURE I

156452 / 156454

Prerequisite: None

Open to: Grades 10-12

Note: Honors option available

This course is designed for students interested in the professional field of architecture. Focus will be placed on architecture in general and residential architecture in particular. The student will acquire knowledge pertinent to the field of architecture including what goes into a well-planned house structurally and aesthetically. Design, model building and exposure to CADD (Computer Aided Drafting and Design) play an important role in this course. Honors students will determine individually with their instructor the additional scope and depth of their assignments including a wall section model, maintaining a current, presentable portfolio and scheduling interviews with local architects and/or at schools of architecture followed by a class report. This course is especially important for students interested in Architecture and Interior Design.

ARCHITECTURE II

156652 / 156654

Prerequisite: Architecture I

Open to: Grades 11-12

Note: Honors option available

This course is an advanced study of architectural drafting and design. It is designed as a sequence class to Architecture 1-2, further exploring the careers and components of architecture design. The curriculum includes continuing development of CAD (Computer Aided Drafting) skills along with intermediate CAD 3-Dimensional modeling. The curriculum for this course was modeled directly after second year collegiate programs and typical internship projects. Honors students will determine individually with their instructor the additional depth and scope of their assignments.

ENGINEERING I

157652 / 157654

Prerequisite: None

Open to: Grades 10-12

Note: Honors option available

This course is the study of engineering graphics, the language of engineering, design and industry. It is designed as a preparatory course for students pursuing engineering careers. The student will learn to read and write this language, developing skills both on the board and at the CADD station (Computer Aided Drafting and Design). The curriculum for this course includes participation in the Annual Bridge Design and Strength Test as well as other design-for-use assignments. Honors students will determine individually with their instructor the additional depth and scope of their assignments including maintaining a current, presentable portfolio and visitations with local engineers and/or engineering schools. Students completing Engineering I will be well prepared for college engineering programs.

Applied Arts, continued

ENGINEERING II

157852 / 157854

Prerequisite: Engineering I

Open to: Grades 11-12

Note: Honors option available

This course is an advanced study of engineering graphics. It is designed as a sequence class to Engineering 1-2, further exploring the careers and components of engineering fields. The curriculum includes continuing development of CAD (Computer Aided Drafting) skills along with intermediate CAD 3-Dimensional modeling. The curriculum for this course was modeled directly after second year collegiate programs, and also includes participation in the Annual Bridge Design and Strength Test as well as other design-for-use assignments. Honors students will determine individually with their instructor the additional depth and scope of their assignments.

COMPUTER SCIENCE: APPLICATIONS (s)

155952 / 155954

Prerequisite: None

Open to: Grades 9-12

This course is designed to raise students' technology literacy for common, mainstream software applications. Focus will be placed on raising awareness and effectiveness for word processing, spreadsheets, data bases, presentation software, internet usage, photo editing/layout, electronic communications (email), scheduling/ calendaring, etc. The skills taught will have direct carryover to other curricular areas and many of the course assignments are designed to be in alignment with the students' current class projects (the student will have lab time in this course to complete assignments/homework for other curricular class load assignments while using and learning technology to improve their effectiveness). Students interested in the Honors option will need to pass Microsoft certification in one Expert Certification area and two Core Certification areas. This option will be discussed in detail with the instructor during the course.

INTRODUCTION TO PROGRAMMING (s)

156052 / 156054

Prerequisite: None

Open to: Grades 9-12

Note: This course can be taken for credit in Mathematics or in Applied Arts.

This course is a one-semester introduction to the basic science and artistry of structured programming. This exciting course is appropriate for students with little to no computing background, but with an interest in experiencing the joy and challenge of writing a working computer program. The focus centers on the forms and methods of the JAVA language, and all related procedures, functions, data types, simple algorithms, and applications. Major topics may include: problem analysis, pseudo code, syntax, incorporating conditional statements, Boolean logic, iterations (loops), sorting algorithms, searching algorithms, sequencing, and arrays. Field trips may be integrated into the course to provide students with exposure to how programming is done in industry. This course will provide a solid preparation for AP Computer Science.

ADVANCED PLACEMENT COMPUTER SCIENCE

156182 / 156184 (A)

156282 / 156284 (AB)

Prerequisite: B-or above in the second semester of Algebra I, or passing grade in Intro. to Computer Programming or departmental approval

Open to: Grades 9-12, primarily juniors and seniors

Note: This course can be taken for credit in Mathematics or in Applied Arts.

AP Computer Science is a dynamic course designed to develop the fundamental skills necessary for success on the AP Computer Science A Exam. It is also a course that provides motivated students the opportunity to experience firsthand the enjoyment, challenge, and artistry of programming. Students who invest the necessary level of effort and time should expect to enjoy a significantly increased ability to solve complex and abstract problems in both programming and non-programming contexts. In particular, the essence of this course is split into three general concentrations:

1. By writing code, solving problems, and completing individual and team projects, students can expect to develop an understanding of the JAVA programming language sufficient for preparation to take an Advanced Placement Computer Science A exam.
2. By analyzing real-world case studies of written code, students can expect to receive an introductory glimpse of the project-development process commonly found in the real world.
3. By studying and mastering well-known programming algorithms and strategies, students can expect to develop good programming techniques that are independent of the particular programming language used.

This is a course that demands students be both independent and team workers. What is done from day to day in class will vary

Applied Arts, continued

depending on the individual needs and ability levels of each student. Thus, both independence and teamwork are prerequisites for students wishing to do well in this course, and on the accompanying AP test. A second year option is available for students who chose to further develop their programming skills and prepare for the Advanced Placement AB exam.

PRODUCTION TECHNOLOGY (s) (WOODWORKING) 158252 / 158254

Prerequisite: None

Open to: Grades 9-12

Students will cover the elementary processes and procedures involved in the use of tools and equipment as they relate to manufacturing, with special emphasis on safety. The student prepares a design sketch, bill of materials, and procedure sheet for lab experiences. The lab experiences will involve all of the procedures and processes that are capable of being presented in one semester. A fee will be charged for materials used in all lab work.

TECHNOLOGY OF COMMUNICATIONS AND MANUFACTURING (s) 158452

Prerequisite: None

Open to: Grades 9-12

Newly revised and expanded curriculum from its predecessor, Introduction to Technical Drawing, this course is designed around the most current industry practices. The course specifically covers the principles, processes, and conventional practices used to communicate industry design ideas through the use of current versions of AutoCAD, Photoshop, Illustrator, and Microsoft Publisher. After successful completion of the design and drafting process, students will be introduced to the manufacturing process involving computer numerically controlled (CNC) machinery. Course projects and environment are modeled after engineering design studios and offer real world project simulations. This course provides a good foundation for the course options available to upperclassmen.

TECHNOLOGY OF ENERGY AND TRANSPORTATION (s) 158454

Prerequisite: None

Open to: Grades 9-12

This course will examine energy sources, power generation, power transmission and control systems, resistance, power measurement, and devices that provide mechanical force. This course will concentrate on application of energy as it applies to transportation systems: marine, atmospheric, terrestrial, and space systems. Course projects and environment are modeled after engineering design studios and offer real world project simulations. This course provides a good foundation for the course options available to upperclassmen.

INDUSTRIAL DESIGN 157552 / 157554

Prerequisite: Technology of Communications and Manufacturing

Open to: Grades 10-12

This course teaches advanced graphics and communication skills. The student will complete course assignments giving him or her solid foundation of employable skills in Drafting and Design. Inking, desk top publishing and Computer Aided Drafting-Design (CADD) is introduced during the first semester, providing a foundation for the development of skill in these areas throughout the remainder of the course.

Lake County High School Technology Campus

The Lake County High Schools Technology Campus is regarded as one of the best career and technology education training facilities in the Midwest with a highly qualified staff dedicated to excellence in career technical education. With twenty participating high schools throughout Lake and McHenry Counties representing over 1800 high school students, Tech Campus is the largest career and technology secondary educational system in the State of Illinois. All programs are two year programs; however, students may take only the first year of the sequence if they desire. There are no tuition costs to the student for Lake County High Schools Technology Campus programs, but some programs will require the purchase of materials. The Technology Campus is located next to the College of Lake County in Grayslake. It offers excellent educational opportunities to students who wish to obtain specialized career-technical skills. Students taking courses will divide their school day between the home school and the Technology Campus. Transportation to and from the Campus is provided by the high school. Students will not be permitted to drive their own cars. Credits earned at the Technology Campus apply to graduation credits at DHS. Programs are offered in two-hour daily sessions, except for Cosmetology which offers daily 3 ½ hour sessions.

MANUFACTURING/INDUSTRIAL PROGRAMS

BUILDING TRADES I BUILDING TRADES II

152352 / 152354
152452 / 152454

This program is designed to prepare students for careers in the building construction trades. The curriculum is designed to provide the student with hands-on training over a two-year period in each of the following areas: safety practices, the proper use of hand and power tools, carpentry, plumbing, roofing, siding, dry-walling, masonry, finish trimming, and various other areas. Upon mastery of the skills for safety and basic hand and power tools used in the field, students will develop basic construction techniques and job planning skills in the lab. All lab work is followed up with applications at the project house built by the students, financed by the school, and sold to the general public. Internships are available with local business partners.

COMPUTER SUPPORT SERVICES I COMPUTER SUPPORT SERVICES II

152752 / 152754
152852 / 152854

This program will prepare students for careers in the computer field. Through the IT Essentials on-line curriculum and hands-on activities, students will install, maintain, upgrade, and repair computer hardware and software on workstations and network systems. This program will prepare students for the A+ Certification Exam, which is a nationally recognized industry-based certification for computer technicians capable of providing technical support and service in all PC environments. Upon successful completion of this

Lake County High School Technology Campus, continued

program, students will be able to diagnose hardware or software failures and perform the actions necessary to correct the problems based on knowledge of the systems' operation. Additionally, students will learn how to provide the necessary support services to system users. Internships are available with local business partners

COMPUTER NETWORKING I **COMPUTER NETWORKING II**

152552 / 152554
152652 / 152654

This program is designed to develop practical computer networking knowledge and skills in a hands-on environment. Students will learn the principles and practice of designing, building, and maintaining computer networks. This program will also prepare students for the Cisco Certified Networking Associate Exam (CCNA), which is an industry-based certification for network technicians who have demonstrated the capability to install, configure, and operate simple-routed LAN, routed WAN, and switched LAN networks. Students will also be prepared to pass the CompTIA Network+ certification Exam. Internships are available with local business partners.

WELDING-FABRICATION I **WELDING-FABRICATION II**

152952 / 152954
153052 / 153054

This program provides hands-on experiences gained from extensive practice and application of knowledge learned. The Welding/Fabrication Lab organization and operation simulate a "real world" on the job atmosphere. In addition to technical skills, students learn about employer-employee relationships in preparation for the world of work. Units of instruction include shop safety, oxy-fuel welding and burning, arc welding, (stick, MIG, TIG), plasma arc cutting, and automatic shape cutting. Layout and fit-up, blueprint reading, and weld symbols are used to fabricate a variety of metal projects. Students use various NDT (non-destructive) and DT (destructive) type testing and inspection procedures. The American Welding Society (AWS) recognizes the Technology Campus Welding program as an Educational Instruction Member. Students can develop their welding skills to meet the AWS structural welding code. Internships are available with local business partners.

COMMUNICATIONS PROGRAMS

GAME/ JAVA/ C++ PROGRAMMING I **GAME/ JAVA/ C++ PROGRAMMING II**

150052 / 150054
150152 / 150154

This course is designed to provide instruction in computer science using the Java and C++ languages. Students will be able to develop games and professional programs using realistic hands-on interdisciplinary exercises. This program will also prepare students for the Computer Science Advanced Placement (AP) Exam as prescribed by the College Board. The game programming DigiPen curriculum will focus on programming using C++. Internships and job shadowing opportunities are available through our local business and industry partners.

GRAPHIC/WEB DESIGN I **GRAPHIC/WEB DESIGN II**

150252 / 150254
150352 / 150354

The Graphic and Web Design program prepares students for a variety of design careers including desktop publishing, web design, graphic design for games, and entry-level Flash animation. Students will design and produce a variety of print and digital publications utilizing a variety of software applications and technologies including but not limited to: Adobe Illustrator, Adobe Photoshop, Adobe InDesign, Macromedia Flash, Macromedia Dreamweaver, XHTML/CSS coding, and JavaScript. First year students (Graphic Design I), will concentrate on the core design skills such as color theory, typography, fundamental design elements, design principles, information architecture, project management, web standards, and usability. Students will learn basic drawing skills using a variety of art techniques and media. Additionally, students will learn fundamental internet technologies necessary for today's marketplace. During the second year (Graphic Design II), students will specialize in either graphic or web design. They will create advanced projects demonstrating full project life-cycle design skills from ideas to productions. Additionally, second year students will be introduced to advanced multimedia and animation concepts.

PHOTOGRAPHIC DESIGN I **PHOTOGRAPHIC DESIGN II**

150452 / 150454
150552 / 150554

This program provides an understanding of the photography and digital imaging industry. Students will receive extensive training in traditional black and white photography which includes taking, developing, and printing black and white photographs. Digital photography, portrait photography, and advertising photography skills are also taught as part of the program. Study will also place a major emphasis on digital imaging using the program Adobe® Photoshop™. Internships are available with local business partners.

Lake County High School Technology Campus, continued

DIGITAL VIDEO PRODUCTION I **DIGITAL VIDEO PRODUCTION II**

150652 / 150654
150752 / 150754

This program will prepare students for a career in the digital media and communications industry. The Digital Video Production curriculum provides basic training on narrative story telling; i.e. digital filmmaking, non-linear editing, studio and portable field cameras, technical directing, audio board operation, graphics, editing of videotape, motion graphics, script writing, sound editing, digital music creation, narrative storytelling, and storyboard production. The program provides a television studio control room and digital media equipment. Software applications used but not limited to: Final Cut Pro Studio, Storyboard, Quick, After Effects, Soundtrack and Motion. Students enrolled in the program will gain skills needed to obtain an entry-level position at broadcasting, digital media, and video production companies. Internships are available with local business partners.

HUMAN SERVICES PROGRAMS

CERTIFIED NURSING ASSISTANT (Grade 12 only)

150852 / 150854

This program is designed to prepare students for employment as nursing assistants. Students are also prepared for future entry into nursing education programs. Training will include the development of basic nursing skills through lecture, laboratory demonstrations, practice, and clinical experience. Students will also gain skills in cardiopulmonary resuscitation. Upon successful completion of this course, students will be eligible to take the written examination for nurse assistant state certification, which is required in this field. Instruction in this program includes a minimum of forty clinical hours held in long-term facilities in the community. Attendance at clinical sites is mandatory for state certification. This program leads to a certification of completion recorded with the Illinois Department of Public Health. Students in this program must be seniors.

COSMETOLOGY I **COSMETOLOGY II**

150952 / 150954
151052 / 151054

This program presents the theory, principles, and skills necessary to become a licensed cosmetologist in the State of Illinois. Students will acquire the 1500 hours of experience required for licensing while learning how to perform shampoos, make-overs, facials, hair-styling, manicuring, sculptured nails, permanent waving, hair coloring, and cutting. Students will develop skills in each of the areas mentioned while practicing their techniques in a lab setting. Following the lab phase of the program, students will reinforce their training by working on clients in the Technology Campus salon. Internships are available with local business partners.

CRIMINAL JUSTICE I **CRIMINAL JUSTICE II**

151152 / 151154
151252 / 151254

This program is designed to prepare students for the criminal justice and law enforcement field. Students will learn about constitutional law, criminal law, trial procedures, correctional institutions, the laws of arrest, and rules of evidence. Hands-on activities include simulated police scenarios, forensic examination, crime scene investigation, crisis intervention, emergency response, search and seizure, and interrogation techniques. The responsibilities of law enforcement personnel and the importance of professionalism will be emphasized in this program. Professionals from the field will share their experiences and specialty training. Writing and language skills are taught due to the mandatory writing test that many local police departments have for entry into their departments. To participate in this program students must have a clean disciplinary record. A police background check is required to participate in job shadows, internships, and ride-alongs at local police departments.

CULINARY ARTS I **CULINARY ARTS II**

151352 / 151354
151452 / 151454

This program provides culinary and hospitality education designed to prepare students for the many positions in the hospitality industry. Students will gain skills and knowledge in food preparation, nutrition, menu planning, sanitation, equipment operation, inventory control, purchasing, and front-of-the-house customer service skills. Students will also be enrolled in the ProStart program, which is co-sponsored by the Illinois Restaurant Association. Students will utilize their skills by planning, organizing, and preparing several culinary creations for guests. Second year students will gain advanced culinary and hospitality experience and will be eligible for ProStart certification skills. Internships are available with local business partners.

EARLY CHILDHOOD EDUCATION I **EARLY CHILDHOOD EDUCATION II**

151552 / 151554
151652 / 151654

This program is designed to prepare students for careers in early childhood education. Students will implement age-appropriate activities in one of the two operating preschool labs. Students will gain skills in developing activities and educational lessons for the preschool children in creative arts, math, science, music, language, social/emotional development. Instruction will also focus on the positive guidance of child behavior and their development. Internships, job shadows, portfolio development, and other career readiness experiences are available to students. In the second year of the program students will be introduced to the organizational

Lake County High School Technology Campus, continued

management and operation of preschools and child care facilities through projects, observation, and self directed activities. A select few second year students, meeting specified criteria including teacher recommendation may be eligible to participate in our Infant/Toddler Center through an on-site internship. Select students will be introduced to the CDA (Child Development Associate) process and will become more familiar with developmentally appropriate curriculum of infants and toddlers through our observation area and course work. This program will expand student knowledge of early childhood education, through hands-on experiences and aide in the student's overall employability.

EMERGENCY MEDICAL SERVICES I	151752 / 151754
EMERGENCY MEDICAL SERVICES II	151852 / 151854

This program prepares students to take the licensure examination of the Illinois Department of Public Health to become an EMT -B. This is a course of instruction in basic emergency medical services as prescribed by the State of Illinois Department of Transportation and includes classroom instruction, practical demonstrations, testing, and clinical experiences in a hospital emergency department. The emergency services system, the responsibilities of emergency service personnel, and professionalism will be emphasized. Students will learn American Heart Association Healthcare Provider CPR, patient assessment, stabilization, and initial pre-hospital medical treatment of injured and ill patients. Students will be expected to produce a portfolio to share with potential affiliated departments within the County. Internships are available with local business/industry partners.

FIREFIGHTING I	151952 / 151954
FIREFIGHTING II	152052 / 152054

This program is designed to prepare students for entry-level fire fighter positions. Students will learn through classroom and guided practice activities the essentials of fire suppression which includes: understanding fire chemistry, wearing personal protective clothing, identifying ropes, tying knots, using fire extinguishers, performing forcible entry, carrying and raising ladders, operating self-contained breathing apparatus, employing search and rescue techniques, working with ventilation tools and practicing hose evolutions on an operating fire engine all in a safety conscious environment. These skills along with leadership and communication skills will prepare the student for certification through employment opportunities with many fire departments.

MEDICAL ASSISTING I	152152 / 152154
MEDICAL ASSISTING II	152252 / 152254

This program introduces students to a wide variety of careers in the allied health field. The program provides learning opportunities for students to gain an understanding of medical theory, principles and skills to prepare them for entry level positions in medical offices, clinics and other medical environments. Students receive training in medical terminology, communication, body structure and function, vital sign measurement, and principles of infection control. Students will gain experience in basic laboratory procedures which aide in the diagnosis and monitoring of patient conditions.

TRANSPORTATION PROGRAMS

AUTOMOTIVE SERVICE I	153152 / 153154
AUTOMOTIVE SERVICE II	153252 / 153254

This program will provide students with a solid foundation of skills to enter the automotive service industry. Students will be able to continue their training in factory sponsored training programs at a local community college or private technical school. Training in the program emphasizes the development of skills in the core service areas utilizing factory procedures and industry standards in the school's fully operational repair shop. Instruction will feature training on brakes, steering and suspension, electrical systems, and engine performance. Upon successful completion of this program, students will be prepared to take the ASE (Automotive Service Excellence) certification exams in the areas emphasized in the program. Junior students may choose to participate in the AYES Pathway (Automotive Youth Educational System) or the ACE Pathway (Automotive Career Exploration) designed to integrate basic skill mastery during internships with local business partners.

COLLISION REPAIR I	153352 / 153354
COLLISION REPAIR II	153452 / 153454

The program is certified by NATEF (National Automotive Teachers Education Foundation). This program provides students with the fundamental skills of the automotive collision repair industry. Instruction in the program emphasizes both the repair and the refinishing skills associated with restoring a damaged automobile to factory specifications. Using an industry-endorsed curriculum, students will develop core skills in automobile construction, sheet metal damage repair, MIG welding, and basic refinishing. Upon mastery of the skills in core areas, students will gain skills in damage estimating, shop management, heavy collision repair, and finish matching. Students will be prepared to take the ASE certification exams in the areas emphasized in the program and will also be eligible to earn I-CAR Gold Class training points. Internships are available with local business partners. Instructors are ASE (Automotive Service Excellence) Certified.

English

The English Department is committed to helping every student attain maximum effectiveness as both a sender and receiver of language communication. Our commitment is based on the premise that language is the key which unlocks a student's potential. Challenging reading and writing experiences are an integral part of every course; in addition to these, formal speaking, discussion, research, and organization skills are developed through the English program.

Students interested in taking Honors or AP courses must meet the placement criteria described in the listing below. Students are recommended for Survey courses on the basis of teacher recommendations, standardized test scores, and prior grades in English. Questions about placement should be directed to the department chair. Any student or parent who needs assistance with their child's English course selection — either required courses or electives — should contact the department chair. Currently enrolled students interested in courses for which they must have a recommendation by their English teacher should contact their present English teacher and ask for this recommendation.

ENGLISH COURSE OFFERINGS

FRESHMAN ENGLISH

210252 / 210254

Prerequisite: None. Placement in this course will be determined by the eighth grade Language Arts teachers working collaboratively with the DHS English Department.

Open to: Grade 9

This year-long freshman English course is designed to study the basic structure of short stories, novels, Shakespearean and poetic forms. Students learn and practice active reading strategies including annotation. Students read several texts as a whole class, culminating the year with the study of a 19th century novel. Possible titles include *Of Mice and Men*, *The Color of Water*, *Romeo and Juliet*, and *A Tale of Two Cities*. In writing, students explore narrative writing and refine paragraph structure. Students gain an understanding of persuasive writing and the revision process.

Students practice and refine their reading, writing, and speaking skills in a variety of ways such as discussing literature in small and whole group settings, presenting material both formally and informally, completing in-class writing, using the computer labs for a variety of assignments, and reading silently. Extended group projects also enhance these skills.

Homework expectations include independent reading and writing to extend and reinforce class learning.

THE WESTERN WORLD: LITERATURE

210052 / 210054

Prerequisite: Concurrent registration in The Western World: History. Placement in this course will be determined by the eighth grade Language Arts teachers working collaboratively with the DHS English Department.

Open to: Grade 9

The Western World is a team-taught, interdisciplinary course for freshmen that uses both historical and literary texts to examine the development of Western Civilization from the Classical Era through the 20th Century. Units of study include: Classical Civilization, Medieval Europe, Renaissance and Reformation, Scientific Revolution and Enlightenment, French Revolution, Total War, and 20th Century Genocide. Class work is focused on class discussion and daily writing. Daily homework is assigned not only to extend and reinforce student learning but also to develop independent analytical and processing skills. Literature selections may vary from year to year but are always chosen to complement the historical ideas and themes studied. For example, students may read Dickens' *A Tale of Two Cities* while studying the French Revolution, Euripides' *The Trojan Women* while examining classical Greece, or a Shakespeare play while exploring Renaissance humanism. Students will integrate studies with both written and oral communication skills, and the course will emphasize the development of reading, research, and writing skills as indicated on Phase 1 of the Social Studies Department Skills Rubric. Students receive credit in both Social Studies and English.

FRESHMAN ENGLISH WITH READING

210842 / 210844

Prerequisite: None. Placement in this course will be determined by the Eighth Grade Language Arts teachers working collaboratively with the DHS English Department.

Open to: Grade 9

This year-long freshman English course is designed to study the basic structure of short stories, novels, Shakespearean, and poetic forms. Students learn and practice active reading strategies including annotation. Students read several texts as a whole class, culminating the year with the study of a 19th century novel. Possible titles include *Of Mice and Men*, *The Color of Water*, *Romeo and Juliet*, and *A Tale of Two Cities*. In writing, students explore narrative writing and refine paragraph structure. Students gain an understanding of persuasive writing and the revision process.

Students practice and refine their reading, writing, and speaking skills in a variety of ways such as discussing literature in small and whole group settings, presenting material both formally and informally, completing in-class writing, using the computer labs for a variety of assignments, and reading silently. Extended group projects also enhance these skills.

Homework expectations include independent reading and writing to extend and reinforce class learning.

The Freshman Reading component of this course is designed to provide support for and guided practice in the reading assigned to students in their Freshman English class. Students in this course learn about and practice reading strategies that strengthen their current skills. In addition, instruction is designed to help students become increasingly aware of approaches that will further expand how they think about and analyze texts. The Reading and English teachers collaborate to determine ways to help students make connections and build background knowledge related to the texts they are reading. Individual needs of students are also discussed to determine personal learning goals and instructional approaches. Applying the strategies being introduced and practiced in reading class to support materials and English texts is typical of the homework assigned for this class. Students earn ½ credit per semester for 2-day enrollment.

English, continued

FRESHMAN ENGLISH SURVEY

210422 / 210424

Prerequisite: None. Placement in this course will be determined by the Eighth Grade Language Arts teachers working collaboratively with the DHS English Department.

Open to: Grade 9

This course provides an appropriately challenging environment to help students build the skills and confidence to see themselves as reader, writer, and thinker. The course achieves this by providing a variety of reading, writing, and speaking experiences in the classroom. As students practice reading and writing, they will also cultivate an understanding of the characteristics of a good reader and those of a good writer. They learn to interpret literature and see it as an extension of themselves by reading works by Shakespeare and texts like *The House on Mango Street* and *Curious Incident of the Dog in the Night-time*. In addition to the critical thinking skills, students will work on goal setting, self advocacy, and team work. Reading and writing homework often will be started in class, with more and more independence shifting to the student over the course of the year. The Freshman English Survey course will build independence and provide the foundation for a successful high school career.

FRESHMAN ENGLISH SURVEY WITH READING

210612 / 210614

(Double Period)

Prerequisite: None. Placement in this course will be determined by the Eighth Grade Language Arts teachers working collaboratively with the DHS English Department.

Open to: Grade 9

Freshman English Survey with Reading is a year-long course with no prerequisites designed to help students become increasingly aware of personal preferences, habits, and growth as readers and writers as they use a variety of strategies that promote active engagement in reading and writing. The Reading and English teacher collaborate on planning, instruction, and individual student needs. Students will display their understanding through different experiences (interviews, reflections, summaries, letters, descriptions, essays, journals, posters, presentations). They learn about and personalize the writing process. In addition, they will develop relationships and personal connections with the students in the class and their teachers. A goal for this course is for students to strengthen their skills as well as become increasingly aware of their own personal development. Students will be reflective learners as well as active participants in the class. Some class activities might include literature circles, revising written work, applying various pre-writing strategies, and working with other members of the class. Typical homework might include applying strategies to assigned readings, writing about what has been read, and working on their assignments related to their personal portfolio. Possible texts for this course include *Of Mice and Men*, *The Curious Incident of the Dog in the Night-time*, *Romeo and Juliet*, and *The Crazy Horse Electric Game*.

ENGLISH ALTERNATIVE I

858142 / 858144

Prerequisite: Departmental recommendation

Open to: Grade 9

English Alternative I fulfills freshmen and sophomore English requirements. Students study and analyze novels, short stories, and plays. This course focuses on developing and refining active reading strategies. Class time is spent reading and discussing literature together. Students apply deeper understandings to written interpretations and analysis. Students explore narrative, expository, and persuasive forms of writing. Teachers focus on skill building in areas such as organization, time management, homework completion, self-advocacy, and self-reflection. Instruction is differentiated to accommodate a variety of learning styles. Smaller class size allows the teacher to incorporate one to one instruction when appropriate.

ENGLISH FUNDAMENTALS I

851212 / 851214

Prerequisite: Departmental recommendation

Open to: Grade 9

Listening, speaking, reading and writing skills are developed through participation in this course. During freshman year students work to strengthen and build reading strategies in order to comprehend text with greater insight and understanding. Instruction will focus on improving reading comprehension by utilizing active reading strategies to analyze text. Written expression is developed as students learn the steps of the writing process. Expository, narrative, and persuasive writing styles taught. Course curriculum is designed to parallel the readings and activities in Freshman English Survey whenever appropriate. Small class sizes allow instruction to be differentiated and address individualized goals of each student.

English, continued

ENGLISH ESSENTIALS I

854602 / 854604

Prerequisite: Departmental recommendation

Open to: Grade 9

This course gives students an opportunity to develop their reading comprehension and written language skills. There is also guided practice for speaking in front of a group, listening and note taking. Instruction is differentiated to meet the needs of individual students. Class time is spent reading and discussing various types of text, practicing writing for a variety of purposes, editing, vocabulary development, and pragmatics. Literature selections are based on an assessment of students' current level of comprehension. Students learn how to apply active reading strategies to improve reading comprehension. Work is done as a whole group, in small groups, and independently. Curriculum is presented using various forms of technology and is very interactive. There will be occasional homework to extend learning and allow for application of acquired skills.

SOPHOMORE ENGLISH

220452 / 220454

Prerequisite: Freshman English. Students are recommended for Sophomore English based on their previous English grades and teacher recommendations.

Open to: Grade 10

Students will study archetypal patterns in literature through short stories, poetry, a Shakespearean play, gothic and contemporary literature. Possible texts include *Pygmalion*, *Frankenstein*, *Macbeth*, *Lord of the Flies*, *Fahrenheit 451*, and *Brave New World*. Students independently apply active reading strategies to trace the evolution of these patterns and tackle important questions of knowledge, responsibility, and power. Students integrate literary studies with an exploration of effective oral communication, persuasive speaking, and debate. Additionally, students learn to apply the principles of logical argumentation to their written communication. Formal writing experiences include persuasive argumentation and grappling with multi-text, written analysis. Student work expectations include independent reading, writing, and speech preparation outside of the class room which extends class discussion and small group work.

PERSPECTIVES: LITERATURE

220052 / 220054

Prerequisite: Freshman English and concurrent registration in Perspectives: World History. Placement in this course is determined by Social Studies and English teachers' recommendations.

Open to: Grade 10

Perspectives is a team-taught, interdisciplinary course for sophomores that uses both historical and literary texts. These readings, along with certain films, music, and art explore ideas and themes such as the search for meaning, the pursuit of knowledge, and the allocation of and competition for resources. Units of study investigate the history and literature of China, India, Europe, and the Middle East. Class work is focused on class discussion and daily writing. Homework is assigned daily, not only to extend and reinforce student learning, but also to develop independent analytical and processing skills. Perspectives' students will integrate studies with both written and oral communication skills with a particular focus on persuasion and argumentation. The course will emphasize the development of reading, research and writing skills as indicated on phase 1 of the Social Studies Department Skills Rubric. Readings may vary from year to year, but have included: *Snow Flower and the Secret Fan*, *My Life as Emperor*, *Wreckage*, *Untouchable*, *The Trojan Women*, *Galileo*, *Measure for Measure*, *Abraham*, and *Persepolis*. Students receive credit in both Social Studies and English.

SOPHOMORE ENGLISH SURVEY

220622 / 220624

Prerequisite: Freshman English. Placement in this course is determined by collaboration with the student's freshman English teacher and departmental recommendation.

Open to: Grade 10

This year long sophomore English course is designed to offer students structured support for, and guided practice in reading, writing, and speaking. Students build on, refine, and personalize the reading and writing skills introduced freshman year as they encounter increasingly challenging texts and writing assignments. Most texts are read as a whole class; some of these texts include *Fahrenheit 451*, *The Odyssey*, *The Kite Runner*, and *The Lord of the Flies*. Written and oral communication assignments build on personal connections and extend the class discussions which focus on analysis of the text. While students are assigned homework tasks to extend and reinforce their learning, they frequently begin to work on these tasks in class under the guidance of the teacher.

ENGLISH FUNDAMENTALS II

851312 / 851314

Prerequisite: Departmental recommendation

Open to: Grade 10

Listening, speaking, reading and writing skills are developed through participation in this course. During sophomore year, students work to strengthen and build reading strategies in order to comprehend text with greater insight and

English, continued

understanding. Focus will be placed on improving reading comprehension by utilizing active reading strategies to analyze text. Written expression is developed as students learn the steps of the writing process. Expository, narrative and persuasive writing styles taught. Library research skills are integrated into the course. Curriculum is designed to parallel the activities in Sophomore English Survey whenever appropriate, as well to address individualized goals of each student.

ENGLISH ESSENTIALS II

854702 / 854704

Prerequisite: Departmental recommendation

Open to: Grade 10

This course gives students an opportunity to continue to develop their reading comprehension and written language skills. There is also guided practice for speaking in front of a group, listening, and note taking. Instruction is differentiated to meet the needs of individual students. Class time is spent reading and discussing various types of text, practicing writing for a variety of purposes, editing, vocabulary development, and pragmatics. Literature selections are based on an assessment of students' current level of comprehension. Students learn how to apply active reading strategies to improve reading comprehension. Work is done as a whole group, in small groups, and independently. Curriculum is presented using various forms of technology and is very interactive. There will be occasional homework to extend learning and allow for application of acquired skills.

JUNIOR ENGLISH

230452 / 230454

Prerequisite: Freshman and Sophomore English. Students are recommended for American Literature based on their previous English grades and teacher recommendations.

Open to: Grade 11

Students explore the diverse American experience through a variety of literary genres. Throughout the year, students gain exposure to a number of literary and historical perspectives on what it means to be an American. Additionally, students explore these ideas and issues using a set of different literary lenses, which challenge students to explore these texts with a new understanding of different perspectives. Readings vary from year to year but have included: *The Crucible*, *Walden*, *Beloved*, *The Great Gatsby*, *The Catcher in the Rye*, *Extremely Loud & Incredibly Close*, *The Things They Carried*.

In Junior English, students continue their study of the writing process, but major emphasis is on developing multi-paragraph critical essays. By the end of the year students will develop skills in reading and comprehension of sophisticated texts and critical analysis and gain experience in responding to these through discussion and written analysis. Classroom activities include large and small group discussions, informal writing opportunities, presentations, and creative projects. Homework expectations include reading assignments and/or written responses. Longer-term assignments include, but are not limited to, written essays and creative projects.

AMERICAN STUDIES: LITERATURE

230052 / 230054

Prerequisite: Freshman and Sophomore English. Concurrent registration in American Studies: History. Placement in this course is determined by Social Studies and English teachers' recommendations.

Open to: Grade 11

American Studies is a team-taught, interdisciplinary course combining the study of American history and literature. Students use one discipline to understand the other and the format of the course explores the connections between them. The course follows both chronological and thematic sequences and explores a range of texts including novels, non-fiction, primary documents, essays, and speeches. By having two teachers in the classroom and meeting for an extended period of time, participating in a variety of small and large group work, discussion, and individual projects, the students join in building a unique learning community which fosters intellectual curiosity and risk-taking. Students examine the core beliefs and values of what it means to be an American through the study of the development of American government and the role of America in the world, as well as grappling with challenging internal issues (e.g. Race, Immigration) and their ongoing legacy. Students develop a range of writing and reading skills both in and out of the classroom. Assignments and homework provide opportunities for students to develop confidence in expressing their own voices and ultimately seeing themselves as active participants in America in the 21st century.

JUNIOR ENGLISH SURVEY

230622 / 230624

Prerequisite: Freshman and Sophomore English. Students are recommended for this course based on their previous English grades and teacher recommendations.

Open to: Grade 11

This year-long English course is designed to offer students structured support for and guided practice in reading, writing, speaking and thinking habits. Students strengthen and personalize reading, writing, speaking, and thinking skills utilized in Sophomore English as they work with junior year texts. Most texts are read as a whole class, some of these texts include *The Crucible*, *Black Boy* and *Catcher in the Rye*. Written and oral communication assignments extend personal connections and further

English, continued

class discussions which focus on analysis of text. Students are assigned homework experiences to reinforce their learning; they frequently begin to work on these tasks in class under the guidance of the teacher and the support of peer interaction. In addition to skill development, students are challenged to work on goal setting, self advocacy, and team work.

ADVANCED PLACEMENT JUNIOR ENGLISH/

230882 / 230884

AP Language and Composition (Honors)

Prerequisite: Freshman and Sophomore English and recommendation of Sophomore English teacher.

Open to: Grade 11

Students enrolled in Advanced Placement Language and Composition will work to develop and improve upon their skills in analytical and persuasive writing, rhetorical and stylistic analysis, interpretive reading, and analytical thinking at a level consistent with a college course. During summer, AP Jr. English requires reading of a determined novel, a choice of play or novel along with shorter works and writing a character analysis essay.

Special emphasis is given to the analysis of the form and content of writing and how the relationship between the two shapes an audience's understanding and thinking. AP Junior English uses writing in all genres by American authors from a wide range of time periods as the basis for study.

The course will provide opportunities for students to work on these skills through small and large group discussions and assignments, independent reading, and in-class and out-of-class projects, and composition assignments. In addition to long term assignments, students can expect about 40-60 minutes of reading per night.

Students enrolled in the course are encouraged to take the Advanced Placement Language and Composition examination in May.

ENGLISH ALTERNATIVE II

858242 / 858244

Prerequisite: Departmental recommendation

Open to: Grade 11-12

English Alternative II fulfills Junior and Senior English requirements. It continues to develop reading comprehension and written language skills. Oral language communication, including public speaking and debate, and literary research skills are developed. Class time is spent reading and discussing literature, engaging in debates, and researching. Teachers focus on skill building in areas such as organization, time management, homework completion, self-advocacy, and self-reflection. Instruction is differentiated to accommodate a variety of learning styles. Smaller class size allows the teacher to incorporate one to one instruction when appropriate.

ENGLISH ESSENTIALS III

854802 / 854804

Prerequisite: Departmental recommendation

Open to: Grade 11

This course gives students an opportunity to continue to develop their reading comprehension and written language skills. There is also guided practice for speaking in front of a group, listening and note taking. Instruction is differentiated to meet the needs of individual students. Class time is spent reading and discussing various types of text, practicing writing for a variety of purposes, editing, vocabulary development, and pragmatics. Literature selections are based on an assessment of students' current level of comprehension. Students learn how to apply active reading strategies to improve reading comprehension. Work is done as a whole group, in small groups, and independently. Curriculum is presented using various forms of technology and is very interactive. There will be occasional homework to extend learning and allow for application of acquired skills.

ENGLISH FUNDAMENTALS III

851412 / 851414

Prerequisite: Sophomore English or English Fundamentals and departmental recommendation.

Open to: Grade 11

This course meets the Junior English requirement. Popular novels which explore developmental issues of adolescence are used to increase oral and written language skills.

SENIOR ENGLISH

240252 / 240254

Prerequisite: Freshman, Sophomore, and Junior English.

Open to: Grade 12

This year long course continues to build students' critical reading and writing skills through large and small group discussion, small group work, projects, presentations, and writing. Composition work teaches the student how to write a number of composition types: personal statements, narratives, hybrids, multi-genres, and metacognitive forms. Reading encompasses Shakespeare, western and non-western literature, and contemporary fiction and non-fiction. Specific titles may include: *Hamlet*, *In the Time Of The*

English, continued

Butterflies, *Oedipus and Antigone* (Sophocles), *Things Fall Apart* and *Life of Pi*. Homework expectations shift as the year progresses moving from frequent practice to a format with fewer but more grade significant assignments. The course culminates in a student directed exploration of a personally significant issue.

TWENTIETH CENTURY LITERATURE

240052 / 240054

Prerequisite: Freshman, Sophomore, and Junior English. Concurrent registration in 20th Century History.

Open to: Grade 12

20th Century History and Literature is an integrated, team-taught course for seniors that uses both historical and literary texts. These readings, along with certain films, music, and art explore ideas and themes within a particular context and expose larger human truths. Student work is focused on class discussion and daily writing. Units of study are designed to explore specific historical eras, to expose a number of ongoing and connected themes, and to develop higher-order thinking and communication skills. Assignments focus on the integration of the disciplines. Students receive credit in both Social Studies and English. Units of study may include Colonialism in Africa, the Russian Revolution, WWI, The Rise of Totalitarianism, WWII and the Bomb, the Holocaust, and Apartheid in South Africa. Readings vary from year to year, but have included: *King Leopold's Ghost*, *Heart of Darkness*, *The Master and Margarita*, *Darkness at Noon*, *Regeneration*, *The Plague*, *Copenhagen*, *Hamlet*, *Night*, *Cry*, *The Beloved Country*, and *My Traitor's Heart*. Students receive credit in both Social Studies and English.

SENIOR ENGLISH SURVEY

240422 / 240424

Prerequisite: Freshman, Sophomore and Junior English. Students are recommended for Senior English Survey based on their previous English grades and teacher recommendations.

Open to: Grade 12

This course closely parallels Senior English with its emphasis on the reading and analysis of sophisticated literature and the further development of writing. Students will read a diverse selection of fiction, nonfiction, and drama in order expand their world view. Possible texts for this course include: *Hamlet*, *In the Time of the Butterflies*, *The Natural*, *Cal*, *One Flew Over the Cuckoo's Nest*, and *Blankets*. Class work includes guided practice of analytical reading and writing with an emphasis on development and organization of essays. Essays may include: personal narrative, college essay, analytical expository, and persuasive essays in response to literature, hybrids, and metacognitive essays. Typical homework might include nightly active reading assignments, drafts of essays, and reflective journaling. Second semester focuses on a student driven research project which allows students to further develop a passion and voice identified throughout Senior English.

ENGLISH ESSENTIALS IV

854902 / 854904

Prerequisite: Departmental recommendation

Open to: Grade 12

This course gives students an opportunity to continue to develop their reading comprehension and written language skills. There is also guided practice for speaking in front of a group, listening, and note taking. Instruction is differentiated to meet the needs of individual students. Class time is spent reading and discussing various types of text, practicing writing for a variety of purposes, editing, vocabulary development, and pragmatics. Literature selections are based on an assessment of students' current level of comprehension. Students learn how to apply active reading strategies to improve reading comprehension. Work is done as a whole group, in small groups, and independently. Curriculum is presented using various forms of technology and is very interactive. There will be occasional homework to extend learning and allow for application of acquired skills. This course may be repeated for credit.

ENGLISH FUNDAMENTALS IV

851512 / 851514

Prerequisite: Junior English or English Fundamentals. Departmental recommendation.

Open to: Grade 12

This course meets the Senior English requirement. Popular novels which explore developmental issues of adolescence are used to increase oral and written language skills.

ADVANCED PLACEMENT SENIOR ENGLISH/

240682 / 240684

AP Literature and Composition (Honors)

Prerequisite: Freshman, Sophomore, and Junior English. This is a college level course open to seniors with a strong interest in English.

Open to: Grade 12

The course starts with two major summer reading and writing requirements. The first asks students to read a literary pairing, *Hamlet* and *Crime and Punishment* for example, and to write multiple notebook entries in which students reflect on themes and ideas. The purpose in reading this kind of sequence is to give students an experience that models the kind of thematic work that we will do all year.

English, continued

The course will be centered on an overarching theme, which becomes the name of the course. Art or War and Blindness and Vision are two examples. The major works each address the overarching theme of the course, adding some nuance, layer, or level of complexity to our understanding of that theme.

Writing is central to the class. Students practice many kinds of focused analytical writing, ranging from informal to formal. Many of these are full, formal, text-based analytical essays. Students also complete a number of timed writings. In addition to the formal analytical pieces of writing, students complete a number of personal essays and original poems. Ultimately, students should focus on voice and come to think of themselves as practitioners of a craft who make conscious, deliberate choices.

Students should expect to do 40-60 minutes of homework most nights, and more on the week an essay is due. Being highly prepared for class is crucial; discussion will depend on students having completed with skill and thought the reading and writing assignments for that day.

There are a number of long-term and ongoing assignments, so strong organization and advanced planning is a key to success. Collaborative projects are another steady component to the class, so the ability to work well with a group is crucial.

READING STRATEGIES

220812 / 220814

Prerequisite: None

Open to: Grade 10

Note: This course does not fulfill the four-year English graduation requirement.

This semester long class is aimed at helping sophomores strengthen reading fluency and comprehension skills. Students will receive group and individualized support as they strive to hit clear reading targets that are aligned with the College Reading Standards that are used for the ACT Test. Reading skills will be taught to address needs across all curricula including math, English, social studies, and science. Reading strategies that will be used include: previewing, active reading, story impressions, and DRTA (Directed Reading and Thinking Activity). Students will be assessed by using a progress monitoring sheet which emphasizes the role students' play in their own understanding of how they are performing. These monitoring sheets will be a part of a portfolio of their work which will demonstrate their growth from a beginning baseline collection of skill analysis to how they are progressing toward reaching targets. Students earn ½ credit per semester for 2-day enrollment.

POWER READING (Honors)

211062 / 211064

Prerequisite: English teacher or Junior High recommendation is suggested but not required.

Open to: Grades 9-10

Note: This course does not fulfill the four-year English graduation requirement.

Power Reading is a year-long class in which students read interesting, engaging and challenging books. Power Reading focuses on reading analysis through discussion. Students are introduced to new ways of looking at literature and language. Ultimately, Power Reading is a thinking class; through it, students are challenged to expand and deepen their thinking and analysis skills. Power Reading will help students to become more critical and sophisticated readers. The course will improve students' performance in their regular English classes as well as in their other classes that use reading, writing, discussion, and thinking skills. Power Reading will also help students cope with their final exams and other tests. Power Reading is not a second "English" class. Homework in Power Reading consists of reading one or two short selections a week. Students participate in leading discussions, select reading material, and work together to create the content of class. Students also work on building vocabulary through reading, word games, and contextual use. Possible Power Reading books might include: *Welcome to the Monkey House*, *As You Like It*, *1984*, *Our Town* and the current One Book, One Zip Code selection. This course may be repeated. Students earn ½ credit per semester for 2-day enrollment. Classes will be scheduled opposite science lab periods. Grades are pass/fail only.

STUDY STRATEGIES (s)

231252 / 231254

Prerequisite: None.

Open to: Grade 11 and 1st semester of grade 12.

Note: This course does not fulfill the four-year English graduation requirement.

Study Strategies is for students who want to improve their performance on standardized tests such as the PSAT, ACT, and SAT. The program includes instruction in reading comprehension, grammar, usage, vocabulary development, and mathematical and science reasoning skills. These skills directly prepare students for college admissions tests. Students are strongly encouraged to enroll in Study Strategies for two semesters. Instruction in standardized test-taking skills is given in large group sessions in first semester. During second semester, more individualized instruction is provided, including college application essay writing, assistance with the college search process, and further refinement of test-taking skills.

Students earn ½ credit per semester for 2-day enrollment. Classes will be scheduled opposite science lab periods. Grades are pass/fail only.

English, continued

ETYMOLOGY

251252 / 251254

Prerequisite: None

Open to: Grades 10-12

Note: This course does not fulfill the four-year English graduation requirement.

This class is completely student driven. That is, the class spends the first few weeks experimenting with a variety of vocabulary building methods and word study activities. Following this experimentation, class members and the instructor discuss the strengths and weakness of the various activities and methods and develop a plan for study. The class reevaluates this plan at mid quarter and the end of each quarter to determine whether changes need to be made. Activities and methods that previous classes have used include but are not limited to: the memorization of roots, prefixes, suffixes and subjects; the study of cartoons and captions; the reading of novels, short stories and poems with special attention to vocabulary; the use of reading stations of current publications like *The New Yorker*, *Outside Magazine* and *Rolling Stone*; the use of vocabulary development games like Pictionary, Speed Scrabble and Lexigon. Homework is minimal.

Even though the class is pass/fail, frequent assessments are administered so that students may track their progress and reflect on their word retention percentage. Students earn one credit for the year and classes meet twice a week.

CREATIVE WRITING (s)

250652 / 250654

Prerequisite: None

Open to: Grades 11-12

In first semester Creative Writing students study a variety of genres including: short stories, poetry, creative nonfiction, and longer pieces of fiction. A heavy emphasis is placed on “Workshopping” pieces. Students bring in a draft of a work in progress, share it with other students in the class, and receive specific feedback. During the process, students focus on reader-based criterion to help each other understand the strengths of each other’s writing and learn how to point to specific areas for improvement. The “Workshopping” process will lead to a variety of products including: iMovie videos based on a student’s poem, exploring themes from multiple genres, and a finished portfolio of six to eight completed works.

In second semester Creative Writing, students explore a variety of themes including but not limited to: family, education, food, art, and work. Students are free to respond to these themes in a variety of genres, choosing the genre they feel best captures their voice. Students in both semesters of Creative Writing are encouraged to seek out different avenues to publish their creative writing including *Troubadour*, *Stage Write*, and a class publication.

Creative Writing is a one semester class that students can repeat.

MEDIA STUDIES: FILM (s) and

250852 / 250854

MEDIA STUDIES: TELEVISION AND DOCUMENTARY (s)

251052 / 251054

Prerequisite: None

Open to: Grades 11-12

Note: These courses do not fulfill either the four-year English graduation requirement or the one semester Fine Arts graduation requirement. Students may enter the sequence at either semester.

These classes incorporate a study of film-making techniques, film theory, and film history with an exploration of the ways in which other forms of visual media (documentary, television) shape our understanding and manipulate “meaning.” Students will examine various aspects of film and video, including its use and combination of perspective, editing, soundtrack, and visual elements. Students will watch films and television programs in and out of class, ranging from Hollywood classics to contemporary examples selected by students. Films and television programs will often be paired with comparable examples to aid in the comparison and contrast of approaches and results for the audience. In addition to the use of feature-length films, Media Studies: Film will emphasize documentaries, while Media Studies: Television and Documentary will introduce a closer look at television programming. In both semesters, there will be an emphasis on writing, with several critical papers and an independent project, both of which involve work (writing; researching; viewing films) outside of the classroom.

Each of these courses, Media Studies: Film and Media Studies: Television and Documentary, will meet for a semester. Each course will be offered in alternating school years. Students may choose to take the course for either English or Fine Arts elective credit.

Media Studies: Film will be offered for the 12-13 school year.

Media Studies: Television and Documentary will be offered for the 13-14 school year.

English, continued

DEERPRINTS MEDIA (NEWSPAPER)

250452 / 250454

Prerequisite: None**Open to:** Grades 9-12

In *Deerprints Media*, students learn the fundamentals of print journalism in a hands-on, collaborative environment. The production-based class revolves around planning and creating our monthly newspaper, *Deerprints*. As students develop story ideas and layouts, they explore such subtopics as news writing, story selection, headline writing, editing, photojournalism, design, advertising and media ethics. As questions arise, students work together to decide on the best means to proceed. In this sense, students will not only learn from their teachers but also from advanced-level media production students.

While a great deal of the writing, interviewing, and design work is completed during class time, students may need to attend events and production meetings, depending on the needs of a particular story. Grading is based on meeting individual skill goals, participation in class discussions, quality of articles, and reflective writing.

Students completing *Deerprints Media* may re-enroll in the course in subsequent years in order to build upon and refine required skills. Enrollment in the *Deerprints Media* course is recommended for advanced students wishing to apply for a leadership position on the *Deerprints* editorial board.

O'YAD MEDIA (YEARBOOK)

250052 / 250054

Prerequisite: None**Open to:** Grades 9-12**Note:** This course does not fulfill the four-year English graduation requirement.

Students will learn the fundamentals of the print industry in a self-motivated, shared, hands-on experience. The production based class spans from the inception to completion of creating a yearbook. Students work on the thematic development, visual conceptualization, and production phases of yearbook creation. Beyond exposure to creative conceptualization, students will engage in specific skill development in: industry leading software, graphic design and page layout, deadline completion, management of individual accounts payable information, development and use of research skills, writing concise and informative captions, and recognizing and organizing photos with desired composition and meaning. Students should be willing to handle concrete deadlines and be willing to work outside of the classroom. Re-enrollment is an option.

WDHS MEDIA (TV NEWS)

250252 / 250254

Prerequisite: None**Open to:** Grades 9-12**Note:** This course does not fulfill the four-year English graduation requirement.

Students learn television production skills in a 'real world' newsroom environment (WDHS Television). Student leaders (producers) plan shows and meet with 'staff' (class members) to discuss projects in production. Student leaders participate in class instruction. Enrollment encompasses beginners to intermediate to advanced students.

During the 1st quarter, beginning students are paired with a mentor (a student with at least one year of previous media experience) to learn the essential skills of shooting for interviews and action (i.e. sports) shots. Students shoot and edit sports footage for Warrior Wakeup sports reports as well as learn to produce simple news (reporter) packages. Students are also introduced to the basics of editing through the production of a specialized project such as a music video. Students continue to shoot sports and produce another reporter package during the 2nd quarter to master the skills just introduced during the 1st quarter. They will also be introduced to studio or on-location multi-camera shooting.

During 2nd semester, students build upon the skills mastered in producing short news reports and evolve into the production of news-feature segments. They also may produce commercials and PSAs and help producers in various aspects of show production.

Re-enrollment is an option.

Fine Arts

The purpose of the Fine Arts Department is to foster the student's search for his/her identity as a creative individual. The degree to which students are successful in their search depends on the amount of energy they are prepared to commit to their projects. We provide the facilities, technical information, and an environment of encouragement and inspiration. We hope to provide the best possible conceptual and technical educational foundations in the student's search, and to promote heightened awareness of sights, sounds, motions, and emotions.

Discovering our cultural heritage, participating in the joy of creating, or simply enjoying with new perception something of value, is open to all — regardless of previous experience or ability level. In each area of the fine arts, we emphasize the development of individual artistic needs and interests. Each course and teacher offers some flexibility within the curriculum to accommodate individual interests as much as possible.

Many visual arts courses require that students augment basic supplies with purchases of additional materials—costs should be minimal in these cases. In the instance of loss or damage of school tools or equipment loaned to the student, the student is responsible for repair or replacement costs.

One semester of Fine Arts is required for graduation.

Students in Wind Ensemble, Jazz Band, Orchestra, Chorale, and Theatre may apply to earn honors credit.

See the individual teacher for further information.

FINE ARTS: GENERAL COURSE OFFERINGS

FINE ARTS I AND II ALTERNATIVE

858342 / 858344

Prerequisite: Departmental recommendation

858442 / 858444

Open to: Grades 9-12

Fine Arts Alternative introduces students to various areas of the fine arts. Projects are designed to stimulate development of basic ideas, concepts and skills of design, non-verbal expression, and creativity. Appreciation and historical perspectives on visual arts and music are also part of the curriculum. Using the elements of composition (line, shape, value, color, texture, space) and a wide variety of media (pencil, ink, collage paint, clay, metal, wood, printing), students are encouraged to observe the world carefully and express themselves nonverbally. Instruction is differentiated to accommodate a variety of learning styles and skill levels. Small class size allows teacher to incorporate one to one instruction when appropriate

FINE ARTS ESSENTIALS

855402 / 855404

Prerequisite: Departmental recommendation

Open to: Grades 9-12

This course is designed to introduce students to the study of the fine arts. Topics may vary depending upon the needs of the students. The content is oriented toward theatre arts, visual arts, dance and music. This course may be repeated.

ADVANCED STUDY IN FINE ARTS

355352 / 355354

Advanced Study is a continuation of work in one of the fine arts areas taken by a student: art, music, theatre or dance. Criteria for Advanced Study in the Arts include:

1. Previously covered basic skills in the chosen area of advanced study.
2. Ability to write an adequate proposal for the chosen field of work. The proposal presenting the curriculum to be covered, with teacher and chairman approval, must be completed before a student can sign up for the program
3. Ability to work independently within a class and do adequate research in area of work. Self motivation and self direction are needed to do advanced work.
4. Ability to follow through with projects and periodic critiques with advisor. Acceptance by a specific instructor is dependent on class size and teacher load. Because of unpredictable scheduling situations, students may be reassigned to a supervising teacher other than their stated preference.

Fine Arts, continued

FINE ARTS: DANCE COURSE OFFERINGS

	Freshman	Sophomore	Junior	Senior
Dance Explorations	X	X	X	X
Intermediate Dance Studies	X	X	X	X
Advanced Studies in Dance	X*	X*	X	X
*With departmental approval				

DANCE EXPLORATIONS

353652 / 353654

Prerequisite: None

Open to: Grades 9-12

In this course, students explore modern dance, ballet, jazz, current dance forms and ethnic styles. Students are introduced to basic movement patterns, improvisation exercises and fitness through dance. All students will perform in the dance class concerts in the winter and spring. It is open to freshman for Fine Arts credit; sophomores enroll for a full year and receive one PE credit and one Fine Arts credit; and juniors and seniors may elect either PE credit or Fine Arts credit. Students may re-enroll subsequent years to continue to refine their skills.

INTERMEDIATE DANCE STUDIES

353752 / 353754

Prerequisite: Dance Explorations or instructor recommendation

Open to: Grades 9-12

In this course, students will continue to refine their technical skills, in Modern, Ballet, and Jazz techniques. Students will access their creativity through choreography and improvisation. They will be introduced to dance criticism and will begin to analyze and critique both amateur and professional work. All students will perform in the dance class concerts in the winter and spring. It is open to freshman for Fine Arts credit; sophomores who enroll for a full year will receive one PE credit and one Fine Arts credit; and juniors and seniors may elect either PE credit or Fine Arts credit. Students may re-enroll in subsequent years to continue to refine their skills.

ADVANCED STUDIES IN DANCE

353852 / 353854

Prerequisite: Instructor recommendation

Open to: Grades 11-12 (Grades 9-10 may enroll with departmental approval.)

Advanced Studies in Dance is designed for the serious student who is interested in pursuing dance from a performance oriented technical base while exploring an academic approach to choreography. The course includes performance skills, the production elements of lighting, costuming and program planning, research and the relationship between dance and other content areas. It is a year-long course involving two performances of student choreographed works. Students may re-enroll in this class for subsequent years.

Fine Arts, continued

INTRODUCTION TO ART (s)

350852 / 350854

Prerequisite: None

Open to: Grades 9-12

Introduction to Art is a one semester course in which students learn the basic ideas, concepts and principles of Art and Design. Using the elements of composition (line, shape, value, color, texture and space) and a wide variety of media (ink, charcoal, paint, clay, metal, wood, print making) students will observe the world carefully and express themselves visually. Problem-solving skills and creative thinking are enhanced in this course.

ART I

350952 / 350954

Prerequisite: None

Open to: Grades 9-12

Art I is a year-long course which students learn the basic ideas, concepts and principles of Art and Design. Using the elements of composition (line, shape, value, color, texture and space) and a wide variety of media (ink, charcoal, paint, clay, metal, wood, print making) students will observe the world carefully and express themselves visually. Problem-solving skills and creative thinking are enhanced in this course. Students will keep a sketching journal and develop ideas into pieces of art. The formal critique process is utilized in this course as a means of guiding students toward high level analysis and reflection.

GRAPHIC DESIGN

351252 / 351254

Prerequisite: None

Open to: Grades 9-12

Note: Successful completion of this year long course will fulfill the Fine and Applied Arts graduation requirement.

Graphic Design gives students an introduction to both the Fine and Applied Arts. Design projects encompass both traditional and digital media, in order to give students experience with using industry-standard software such as Adobe Illustrator, Photoshop and In-Design, as well as fundamental drawing and compositional skills. Key topics include the Elements and Principles of Design, composition, the role of the artist, design in the context of art history, and the relationship between fine art and commercial design. Technical processes include digital media, drawing, lithography, and silk screen.

Fine Arts, continued

ADVANCED GRAPHIC DESIGN

351352 / 351354

Prerequisite: Graphic Design

Open to: Grades 10-12

This course is an advanced study in graphic design and digital art. It allows students to further explore concepts that are found in the design and digital art world. Students work in our state of the art design lab with the most current software and apply "real world" application to their design skills. There is the opportunity for students to focus on Web design, Graphic Design, Digital Art or a combination of the three areas. Students can re-enroll in subsequent years to continue to refine and expand their skills.

3 DIMENSIONAL ART FORMS

351452 / 351454

Prerequisite: Introduction to Art or Art I

Open to: Grades 10-12

The 3D Art Forms course will give students the opportunity to become familiar with a variety of three dimensional processes, techniques and concepts. Students will learn basic techniques for creating sculptural forms, jewelry, and 3D Design work. Students will use a variety of materials such as clay, metals, found objects, wood, plaster and paper, and a variety of processes including: additive/subtractive processes, casting, cold-joining, assemblage and card engineering. Students will utilize problem solving skills to create 3D solutions to various design problems, link production of work to art historical contexts, and participate in opportunities for discussion and presentation of work.

INTRODUCTION TO CERAMICS (s)

351752 / 351754

Prerequisite: None

Open to: Grades 10-12

Introduction to Ceramics is a one semester course in which students will learn hand building techniques in clay and will develop an understanding of the principles and elements of art and design. Students will be an integral part of running the ceramics studio from recycling clay to the maintenance of glazes. The process of firing clay will be understood from the drying of the clay to the final reduction firing. Students will produce 8-10 ceramic pieces and have the opportunity to display them in a variety of shows throughout the year.

INTERMEDIATE CERAMICS (s)

351852 / 351854

Prerequisite: Introduction to Ceramics

Open to: Grades 10-12

Intermediate Ceramics is a one semester course in which students will further explore hand building techniques, including that of creating press molds. Students will also learn fundamental techniques in wheel throwing. Students will explore their own creative ideas in clay, and further their mastery in clay as a medium. Intermediate Ceramics students will learn how to make glazes.

INTRODUCTION TO DIGITAL PHOTOGRAPHY (s)

352252 / 352254

Prerequisite: None

Open to: Grades 10-12

Introduction to Digital Photography is an introductory class that focuses on the visual elements which come together to compose a striking picture. This class teaches students how to comprehend the world that digital images communicate. Students will be introduced to the basic operations of a digital camera while focusing on photographic principles such as composition, elements of design, cropping, use of color, using Photoshop to develop photos, printing, and critique. The goals of this class are to develop a student's ability to select subject matter, visualize the world from a new perspective, capture it, compose it, and then edit it through the use of computer-aided tools. Students will supply, or have access to a digital camera, either point and shoot or D-SLR.

INTERMEDIATE PHOTOGRAPHY (s)

352352 / 352354

Prerequisite: Introduction to Photography

Open to: Grades 10-12

In Intermediate Photography, students will learn how to use digital and traditional film cameras in a more deliberate way by coordinating shutter, aperture, film speed, and studio lighting. Focus will turn to the intricacies of the camera, photo manipulation, alternative processes, and an introduction to film developing. Students will continue

Fine Arts, continued

to develop their visual and technical understanding of photography through projects that emphasize technique and personal expression. They will also be exposed to the many types of cameras, such as Holga's, medium format, D-SLR's, and "toy" cameras. The goal of this class is to balance the processes of photography with the aesthetics of personal expression. Students will supply, or have access to, a 35 mm or D-SLR camera, along with digital paper, film processing paper, and developing supplies.

ADVANCED PHOTOGRAPHY (s)

352452 / 352454

Prerequisite: Intermediate Photography

Open to: Grades 11-12

Advanced Photography students will continue to explore the many facets of photography, building on their abilities to understand the camera's functions and the dynamics of lighting. This class culminates in the development of a photojournalism series that challenges students to research a subject of their choice and present it through a series of photos.

DRAWING AND PAINTING

351552 / 351554

Prerequisite: Introduction to Art.

Open to: Grades 10-12

Drawing and Painting is a single course which incorporates the two separate, creative disciplines into one class. The class will explore the logical progression from a linear drawing experience to include traditional painterly expressions as well as related techniques. The first semester will include outside work done in sketch books as well as work completed in class. The materials to be used in the course include pencils, charcoal, ink, watercolor, and acrylic. Framing and matting of work will be taught for inclusion into a portfolio. Visual interpretations of two and three dimensional concepts will be covered. During the second semester, the work will focus on the human figure. Demonstrations, critiques and discussions of Art History will be an integral part of the course. Students will be responsible for buying some of their own materials.

STUDIO ART

351652 / 351654

Prerequisite: Art I, Drawing & Painting, or instructor recommendation

Open to: Grades 11-12

Students enrolled in Studio Art have the opportunity to continue to develop skills in drawing, painting, ceramics and design. A wide range of materials are used in this class and students have the opportunity to develop a large body of work. There is an emphasis on figurative and expressive work. This course may be repeated.

ADVANCED PLACEMENT ART (Honors)

AP Art Studio (Drawing and Painting)

352882 / 352884

AP Art 2D (Photo)

352982 / 352984

AP Art 3D (Ceramics)

353082 / 353084

Prerequisite: Four semesters of visual art or recommendation of instructors. Students register for the section that reflects their concentration.

Open to: Grades 11-12

Advanced Placement Art offers the highly motivated high school student the opportunity to work at a degree of depth and intensity more commonly found in a university setting. Students demonstrate their ability to select and develop work which requires sustained effort carried out independently within a class structure.

All advanced placement art students are required to keep a journal/sketchbook for idea development and exploration of the work of professional artists. Studio students work on selected problems dealing with drawing, painting, color, space, and concept development.

Photo students continue to develop technical and conceptual skills through assignments and portfolio development. Students may create their photos using traditional darkroom techniques, digital photography and with mixed media.

AP Studio 3-D students will have the opportunity to find, and perfect their own unique voice in clay.

All students are required to complete a portfolio of 24 works following the AP College Board guidelines. Evaluation of this portfolio by the College Board will require an \$80 fee. This course may be repeated.

Fine Arts, continued

FINE ARTS: THEATRE COURSE OFFERINGS

	Freshman	Sophomore	Junior	Senior
Theatre Advisory (Freshman Advisory)	X			
Introduction to Theatre	X	X	X	X
Actors Studio		X	X	X
Musical Theatre			X	X
Theatre Company			X	X
— Technical Theatre	X	X	X	X
Technical Theatre Design		X	X	X

THEATRE GROUPS

354652 / 354654

Interested students should register for Theatre Groups and the theatre director will make group placements (see descriptions below). ***Previous acting experience or training is not necessary.*** All groups will perform.

THEATRE/FRESHMAN ADVISORY

354752 / 354754

This course will provide both a theatre and advisory experience for freshman students interested in developing their communication and theatre skills within the Advisory format. Students will be able to more actively apply and bridge communication skills and navigate their initial high school experience from the classroom learning environment to real world application. Introduction to Theatre concepts such as fundamental principles of acting, an overview of technical aspects, etc... will be interwoven with the Freshman Advisory concepts. This Theatre course requires no prior theatrical experience. This course satisfies the Freshman Advisory requirement and the fine arts requirement for graduation.

INTRODUCTION TO THEATRE

354852 / 354854

Prerequisite: None

Open to: Grades 9-12

Through exercises, scene study, monologues and improvisation students will study the fundamental principles of acting: non-verbal communication, presentational skills, and characterization, working off a partner, incorporating activity and developing spontaneous response. In addition they will receive an overview of the technical aspects and other non-performance elements of the theatre. A reflection notebook requiring regular entries of observations and class assignments is kept by each student. Attending and completing a written reflection for 2 DHS stage performances during the year reinforces techniques introduced in class. Films, field trips, working, and a play reading compliment classroom activities. Introduction to Theatre requires no prior theatrical experience.

ACTORS STUDIO

354952 / 354954

Prerequisite: Introduction to Theatre or instructor approval

Open to: Grades 10-12

Actors Studio is an acting class designed to help students utilize internal resources for the creation of textured, well-rounded characters. This class will enable students to build characters through the use of sense-memory, dramatic action, subtext, relationships, motivational analysis, and a play reading compliment classroom activities. A reflection notebook requiring regular entries of observations and class assignments is kept by each student. Students will work with limited texts and eventually explore more complex dramatic works. Attending and completing a written reflection for 2 DHS stage performances during the year reinforces techniques introduced in class. The class will culminate in the presentation of several 10 minute plays or scene work.

Fine Arts, continued

MUSICAL THEATRE

355152 / 355154

Prerequisite: Introduction to Theatre, Actors Studio, or instructor approval and a possible vocal audition.

Open to: Grades 11-12

Musical Theatre explores the relationship between lyric and monologue, stage blocking and musical movement and allows students to explore this performing art. Students will have an opportunity to discover a variety of musical styles. They will perform solos as well as group numbers as they examine the many facets of musical theatre. The class culminates in the performance of a small scale musical or review in the spring.

THEATRE COMPANY

355252 / 355254

Prerequisite: Introduction to Theatre, Actors Studio, or instructor approval.

Open to: Grades 11-12

Theatre Company is the Deerfield High School Company Theatre Troupe. Students create original theatre pieces through improvisation, theatre exercises, scriptwriting, and a study of great works of drama. In class, students write, direct, are introduced to on-camera skills, and advanced acting techniques. The Company performs the spring play.

TECHNICAL THEATRE

355652 / 355654

Prerequisite: None

Open to: Grades 9-12

Technical Theatre is a full year introductory course which exposes students to all aspects of technical theatre. The course offers students the opportunity to develop skills in scenic construction and painting, stage lighting, sound production, props creation and production planning. They also acquire the skills to operate modern theatrical lighting and sound equipment. Lab work for ongoing productions in the DHS Fine Arts department is a major component of the course. No prior experience is necessary.

TECHNICAL THEATRE DESIGN

355752 / 355754

Prerequisite: Technical Theatre or instructor approval

Open to: Grades 10-12

Technical Theatre Design is a full year course that gives students an opportunity to develop their skills in scene, lighting, and sound design. All elements of the design process are explored, including script analysis, drafting, model building and design presentation. Production planning, design projects and creative problem-solving activities round out the curriculum. Students have practical design opportunities for DHS dance performances and the spring play.

FINE ARTS: GENERAL MUSIC COURSE OFFERINGS

MUSIC THEORY

358552 / 358554

Prerequisite: None

Open to: Grades 11-12

Students do not need to be able to read music or play an instrument to take Music Theory. The main objective of the course is to develop each individual's composing/songwriting skills. This is done through lecture, demonstration, discussion, written work, and small group activities. Students study the theory of music (how to write chords and scales) and the history and styles of music (Western classical, American popular, and music from around the world). In addition, students learn to create music on computers and compose two major pieces per quarter. Music Theory is highly recommended for those students planning to major or minor in music in college.

Fine Arts, continued

FINE ARTS: CHORAL MUSIC COURSE OFFERINGS

Girls Program

	Freshman	Sophomore	Junior	Senior
Girls Treble Ensemble (Freshman Advisory)	X			
Concert Choir		X	X	X
Chorale (audition)			X	X
Choraliers (audition)		X	X	X
Music Theory			X	X

Boys Program

	Freshman	Sophomore	Junior	Senior

Chorale (audition)		X	X	X
Choraliers (audition)		X	X	X
Music Theory			X	X

CHORAL GROUPS

356352 / 356354

Interested students should register for Choral Groups and the choral director will make group placements (see groups below). Previous singing experience or training isn't necessary. All groups will perform. Attendance at all public performances is required.

TREBLE ENSEMBLE/FRESHMAN ADVISORY

310152 / 310154

Treble Ensemble provides opportunities to further freshman girls musical potential and aesthetic understanding through singing in a choral ensemble. Study includes the care and cultivation of beautiful tone, aesthetic awareness, the ability to read music, the refinement of technical skills, team spirit, and responsible rehearsal habits. Students will strengthen listening skills and their ability to analyze and evaluate music and music performances. Private lessons are encouraged. This course satisfies the Freshman Advisory requirement and the fine arts requirement for graduation.

CONCERT CHOIR

356952 / 356954

Concert Choir provides opportunities for freshmen boys, sophomore girls and other choral students to develop their musical potential through singing in a choral ensemble. Study includes the care and cultivation of beautiful tone, the ability to read music, the building and refinement of technical skills, team spirit, and responsible rehearsal habits. Students will develop listening skills and their ability to evaluate music performances. Attention will also be given to relating their music experiences to personal development. Private lessons are encouraged. This course satisfies the Freshman Advisory requirement for the boys and the fine arts requirement for graduation.

CHORALE

356652 / 356654

Chorale provides opportunities for advanced choral students to refine their musical production and aesthetic understanding through singing in a choral ensemble. This advanced ensemble further develops the cultivation of beautiful tone, aesthetic awareness, the ability to read music at a more advanced level, the refinement of technical skills, team spirit, and responsible rehearsal habits. Students will strengthen listening skills and their ability to analyze and evaluate music and music performances. Private lessons are encouraged. Honors credit is available by application. Membership is by audition.

CHORALIERS

356852 / 356854

Choraliers combines advanced singing and dancing technique to perform a wide variety of musical styles, including pop, musical theatre and jazz. Singing and dancing experience are strong assets for students who choose to audition for this performance ensemble. This ensemble has an extensive performance schedule. Private lessons are encouraged. Membership is by audition only. Concurrent enrollment in another choral ensemble is required.

Fine Arts, continued

FINE ARTS: INSTRUMENTAL GROUPS COURSE OFFERINGS

	Freshman	Sophomore	Junior	Senior
Concert Band (Freshman Advisory)	X			
Symphonic Band		X	X	X
Wind Ensemble (audition)		X	X	X
Concert Orchestra (Freshman Advisory)	X			
Symphony Orchestra		X	X	X
Chamber Orchestra (audition)	X	X	X	X
Jazz Band (audition)		X	X	X
Music Theory			X	X

CONCERT BAND/FRESHMAN ADVISORY

310352 / 310354

Concert Band is a year-long course that is open to freshman wind and percussion instrumentalists. This band studies standard ninth-grade band literature and related concepts and techniques, performing in three formal concerts throughout the year. A major emphasis of the class is learning the fundamentals of performance, theory, and terminology through discussion, rehearsal, and written work. Students also study the music of Latin America and the history of their instruments. Each quarter, students perform two playing tests outside of class and write one concert review or other assignment. Regular practice outside of class is expected, and private lessons are recommended. Attendance at all public performances is required. This course satisfies the Freshman Advisory requirement and the fine arts requirement for graduation.

SYMPHONIC BAND

357552 / 357554

Symphonic Band is a year-long course that is open to sophomore, junior, and senior wind and percussion instrumentalists. This band studies standard high school band literature and related concepts and techniques, performing in four formal concerts throughout the year. Over a three-year period, students study the music of Jewish, African-American, and Asian composers and musicians as well as the history of Western art music from the Renaissance to the present. Each quarter, students perform two playing tests outside of class and write one concert review or other assignment. Regular practice outside of class is expected, and private lessons are recommended. Attendance at all public performances is required.

WIND ENSEMBLE

357652 / 357654

Wind Ensemble is a year-long course that is open to sophomore, junior, and senior wind and percussion instrumentalists by audition only. This band studies advanced high school band literature and related concepts and techniques, performing in four formal concerts throughout the year. Over a three-year period, students study the music of Jewish, African-American, and Asian composers and musicians as well as the history of Western art music from the Renaissance to the present. Each quarter, students perform two playing tests outside of class and write one concert review or other assignment. Regular practice outside of class is expected, and private lessons are recommended. Attendance at all public performances is required. Honors level credit is available for this course.

JAZZ BAND

357852 / 357854

Jazz Band is a year-long course that is open to sophomore, junior, and senior instrumentalists by audition only. Members must be concurrently enrolled in another music performance course unless approved by the director. The band studies jazz style, theory, and improvisation through classic small-group tunes, which the students arrange into their own unique versions for performance in six formal concerts and festivals throughout the year. Over a two-year period, students study the history of jazz from 1900 to the present as well as important musicians from each era. Each quarter, students also perform two playing tests and write one concert review or other assignment. Regular practice outside of class is expected, and private lessons are recommended. Attendance at all public performances is required. Honors level credit is available for this course.

Fine Arts, continued

CONCERT ORCHESTRA/FRESHMAN ADVISORY

310252 / 310254

The Concert Orchestra is a year-long performance based laboratory class that is open to students with previous experience on the violin, viola, cello, or bass or consent of the instructor. This course provides students with experiences designed to develop the basic technical skills of string instrument playing and musicianship. Primary emphasis is placed on tone production, intonation, technical facility i.e. fingering and shifting, scales, sight-reading, ensemble performance, listening skills, and other music fundamentals. Music literature chosen from a wide variety of traditional, contemporary, and multi-cultural genres serves as the major vehicle through which concepts are taught. Related topics of music history and theory will be incorporated into instruction as well. Each quarter students perform one playing test outside of class, write a concert review on a concert they attended, and explore the background of music performed in class by writing program notes. Students are required to perform at least four concerts a year. Regular practice outside of class is expected and private lessons are encouraged. This course satisfies the Freshman Advisory requirement and the fine arts requirement for graduation.

SYMPHONY ORCHESTRA

357052 / 357054

The Symphony Orchestra is a year-long performance based laboratory class that is open to experienced sophomore, junior, and senior string players. Participation in Concert Orchestra is a prerequisite or consent of the instructor. Wind and percussion students are selected from, and must be currently enrolled in the Wind Ensemble. The emphasis of instruction in this class is on achieving high levels of individual and ensemble performance and mature musicianship. The repertoire used consists of a wide variety of advanced full symphony selections from traditional, contemporary, and multi-cultural genres. Related topics music history and theory will be incorporated into instruction as well. Each quarter students perform one playing test outside of class, write a concert review on a concert they attended, and explore the background of music performed in class by writing program notes. **Students are required to perform at least four** concerts a year. Regular practice outside of class is expected and private lessons are encouraged. Honors level credit is available for this course.

CHAMBER ORCHESTRA

357252 / 357254

Chamber Orchestra is a performance based laboratory class open to advanced freshman, sophomore, junior, and senior string students by audition only. The emphasis of instruction in this class is on achieving high levels of individual and ensemble performance and mature musicianship. The repertoire used in this class consists primarily of music written for chamber orchestra including a wide variety of advanced string selections from traditional, contemporary, and multi-cultural genres. Related topics of music history and theory will be incorporated into instruction as well. **Students are required to perform at least four concerts a year.** In addition to regular performances at DHS, students in the Chamber Orchestra will perform at different events in and around the Deerfield community. Regular practice outside of class is expected and private lessons are encouraged. Honors level credit is available for this course.

Mathematics

The object of the study of mathematics is two-fold. The first objective is the acquisition of useful knowledge; the second objective is the cultivation and discipline of the necessary mental processes in order that a student develops habits of sound reasoning and independent judgment.

The course offerings are broad enough in scope so that each student will be properly challenged and properly motivated to do his/her best. They include materials which are both practical for everyday living and also preparatory for future study of mathematics and related disciplines, as well as materials required for vocations which rely on strong knowledge of mathematics.

Three years of mathematics are required for graduation. Most colleges require a year of Algebra, a year of Geometry, and an additional third year of Mathematics beyond those. Colleges also recommend that a mathematics course be taken during the senior year of high school. Placement into Honors courses for the freshman year is based upon 8th grade teacher recommendations and on performance on a departmental exam. Placement into Honors courses following freshman year is based upon teacher recommendations and prior grades in mathematics. Other level changes may occur after conversations with the student, teacher, parent, and department chair.

Students are recommended for survey courses for the freshman year on the basis of teacher recommendations and performance on standardized tests. In following years, placement is based on prior grades in mathematics courses and teacher recommendation.

The TI-83+ or TI-84+ graphing calculator is required for use in all mathematics courses, and will be used throughout the 4-year high school sequence in mathematics.

Suggested Math Course Sequences on the following page.

Mathematics, continued

Suggested Math Course Sequences

Based on many factors, students typically follow one of these sequences. Please note, the course *Introduction to Programming* may be taken anywhere in any sequence. *(s) Denotes a semester course.*

Beginning Freshman year, progression usually moves in this direction,
though diagonal movement is always possible.

MATHEMATICS: COURSE OFFERINGS

PRE-ALGEBRA I ESSENTIALS

855602 / 855604

PRE-ALGEBRA II ESSENTIALS

855702 / 855704

Prerequisite: Departmental recommendation

Open to: Grades 9-12

This course gives students an opportunity to build fundamental skills in mathematics. Instruction is differentiated to meet the needs of individual students. Through structured support with reading, time management, organization, note-taking, and problem-solving, students have the opportunity to learn and apply basic math skills. Content explored includes measurement, time, money, calendar, logic and reading and creating charts and graphs. Focus is on practical application and curriculum is taught using concrete examples in an interactive format. There will be homework to extend learning, but the assignments will generally be started in class under the teacher's supervision. This course may be repeated for credit.

PRE-ALGEBRA FUNDAMENTALS

852112 / 852114

Prerequisite: Departmental recommendation

Open to: Grades 9-12

This course develops the fundamental skills of arithmetic and introduces basic algebraic concepts. Smaller class sizes and increased one-to-one instruction is common for this course. Instructional pace and homework load can be modified for students along with differentiated methods of instruction. The course may be repeated for credit.

ALGEBRA I

451252 / 451254

Prerequisite: None

Open to: Grade 9-12, primarily freshmen

This course gives the student his/her first experience in a formalized study of algebra. All other mathematics courses build upon the foundation of concepts and structures of basic algebra. Topics include simplifying expressions, factoring, solving equations, inequalities, and systems of equations, graphing functions, radical and rational expressions, exponents, quadratics, and data analysis. The curriculum will be presented in a format that makes class as active as possible, utilizing a wide variety of instructional strategies. This includes interactive lecture, cooperative learning, mathematical discourse, discovery learning, projects, math labs, and technology. Daily homework assignments will be given to extend learning.

ALGEBRA I SURVEY

451422 / 451424

Prerequisite: None

Open to: Grades 9-12, primarily freshmen and sophomores

This course gives the student his/her first experience in a formalized study of algebra. All other mathematics courses build upon the foundation of concepts and structures of basic algebra. Through structured support with reading, time management, organization, note-taking, and problem solving, students have the opportunity to learn vocabulary, skills, symbols, and notation that serve as the foundation of the course. Content explored includes: simplifying algebraic expressions, factoring, solving equations, quadratics, radicals, and general problem solving. The curriculum will be presented in a format that makes the class as active as possible, utilizing a wide variety of instructional strategies. This includes interactive lecture, cooperative learning, mathematical discourse, discovery learning, projects, math labs, and technology. There will be homework to extend learning, but the assignments will generally be started in class under the teacher's supervision. Additional Algebra I topics are completed in Intermediate Algebra Survey

GEOMETRY

451652 / 451654

Prerequisite: A passing grade in Algebra I (or comparable course) *or* by departmental approval

Open to: Grades 9-12, primarily freshmen and sophomores

This course is an introduction to the basic principles of Euclidean geometry. Students have the opportunity to learn key definitions, symbols, notations, theorems, and properties of geometric figures that serve as the foundation of the course. Emphasis is placed on developing students' deductive reasoning and logical thinking skills through the use of geometric proof. Content explored includes: basic definitions, lines, angles, triangles, quadrilaterals, circles, polygons, solids, congruence, similarity, proportion, elementary trigonometry, and formulas for perimeter, area, surface area and volume. The curriculum will be presented utilizing a wide variety of instructional strategies. This includes cooperative learning, interactive lecture, mathematical discourse, discovery learning, projects, math labs, and the use of technology. Students are expected to complete daily homework assignments and periodic projects and labs.

Mathematic, continued

GEOMETRY SURVEY

451822 / 451824

Prerequisite: A passing grade in Algebra I Survey (or comparable course) *or* by departmental approval

Open to: Grades 9-12, primarily freshmen and sophomores

Geometry Survey is an introduction to the fundamentals of Euclidean geometry. Through structured support with reading, time management, organization, note-taking, and problem solving, students learn key definitions, symbols, notation, theorems, and properties of geometric figures, as well as elements of proof. Major topics include: fundamental sets of points, angles, triangles, quadrilaterals, circles, polygons, solids, congruence, perimeter, area, and examining figures in both two and three dimensions. Students will learn actively through a variety of instructional strategies, including interactive lecture, cooperative learning, investigative activities, mathematical discussion, projects, math labs, dynamic geometry software, and traditional geometric construction. Students will complete guided practice problems in class and will frequently have time to start homework assignments under instructor supervision to extend learning. Students will also review basic algebra skills throughout the course.

GEOMETRY HONORS

452072 / 452074

Prerequisite: 8th grade recommendation or departmental recommendation

Open to: Grades 9-12, primarily freshmen and sophomores

This fascinating course begins an in-depth study of the classic principles of Euclidean geometry. Students have the opportunity to learn definitions, symbols, notations, theorems, and properties of geometric figures that serve as the foundation of the course. Emphasis is placed on developing students' deductive reasoning and logical thinking skills through the use of rigorous geometric proof and multi-step problems. Content explored includes: basic definitions, lines, angles, triangles, quadrilaterals, circles, polygons, solids, congruence, similarity, and elementary trigonometry, and formulas for perimeter, area, surface area and volumes. There is a strong emphasis on discovery-based learning in this course that will lead students to a deeper understanding of these topics. This fast-paced course prepares students for Honors Algebra Two/Trigonometry. There is an expectation of daily homework, including reading the text.

GEOMETRY I ALTERNATIVE

858842 / 858844

GEOMETRY II ALTERNATIVE

858942 / 858944

Prerequisite: Departmental recommendation

Open to: Grades 9-12

This course introduces students to the concepts, vocabulary, and symbols of basic Geometry. Included in this course is the study of points, lines, angles, theorems, proofs and constructions. Smaller class sizes, differentiated and one-to-one instruction are features of this course. Instructional pace and homework are modified.

GEOMETRY I FUNDAMENTALS

852512 / 852514

GEOMETRY II FUNDAMENTALS

852612 / 852614

Prerequisite: Completion of an Algebra I course and departmental recommendation

Open to: Grades 9-12

Geometry Fundamentals introduces students to plane and solid geometry topics, including Euclidean geometry. Students explore the following topics throughout the school year: basic geometric figures, two-column proofs, angles and their measures, area, perimeter, and volume, coordinate geometry, and 2 and 3 dimensional figures. Academic instruction is differentiated to meet a variety of skills and learning styles. Specific strategies and approaches to instruction include direct instruction, active learning using manipulatives, technology appropriate for geometry such as graphing calculators and dynamic geometry software, interactive mathematical lectures and discussions, and geometric constructions using tools such as protractors and compasses. Students will receive daily homework assignments to reinforce skills and concepts introduced in class, and will often begin homework during class time in order to receive guided practice opportunities. Upon completion of this class, students will be able to demonstrate and apply geometric concepts involving points, lines, planes and space, identify, describe, classify and compare relationships using points, lines, planes and solids, and construct convincing arguments to solve problems.

Mathematic, continued

ALGEBRA II

452652 / 452654

Prerequisite: C- or above for both semesters of Algebra I and a passing grade in Geometry, or B- or above for both semesters of Intermediate Algebra Survey or departmental approval

Open to: Grades 9-12, primarily sophomores and juniors

This course covers standard topics in a second year algebra course, but does not include trigonometry. It is a two semester, year long course that moves at a moderate pace, and is a continuation of Algebra I. Students expand their knowledge of algebraic concepts and skills through a wide variety of instructional techniques. These include interactive lecture, small group work, labs, and the use of technology. Topics include solving equations and inequalities, linear relationships, systems of equations and inequalities, matrices, polynomials, complex numbers, exponents, radicals, probability, and statistics. Students are expected to complete daily homework assignments and occasional projects and labs.

ALGEBRA I FUNDAMENTAL

852212 / 852214

ALGEBRA II FUNDAMENTAL

852312 / 852314

Prerequisite: Departmental recommendation

Open to: Grades 11-12

This course is a continuation of Algebra I Fundamentals. Through structured support with reading, time management, organization, note-taking and problem solving, students learn algebraic concepts to increase their problem solving skills. Content areas may include basic problem solving strategies, linear equations and inequalities, quadratic equations and graphing. Instruction is differentiated to meet the needs of individual students. The curriculum is designed to be interactive and utilizes strategies such as cooperative learning and discovery learning. Homework is assigned to support student learning.

ALGEBRA I ESSENTIALS

856002 / 856004

ALGEBRA II ESSENTIALS

856102 / 856104

Prerequisite: Departmental recommendation

Open to: Grades 9-12

This course gives students their first experience in learning basic algebra. Instruction is differentiated to meet the needs of individual students. Through structured support with reading, time management, organization, note-taking, and problem-solving, students have the opportunity to learn and apply basic math skills. Content explored includes using and creating graphs and charts, logic, working with a variable, solving linear equations, exponents, fractions, statistics and probability, and general problem-solving. Focus is on practical application and curriculum is taught using concrete examples in an interactive format. There will be homework to extend learning, but the assignments will generally be started in class under the teacher's supervision. This course may be repeated for credit.

ALGEBRA I ALTERNATIVE

858642 / 858644

ALGEBRA II ALTERNATIVE

858742 / 858744

Prerequisite: Departmental recommendation

Open to: Grades 9-12

This course provides a foundation in basic Algebra. Topics of instruction include simplification of algebraic expressions, factoring, solutions to equations and inequalities, graphing and general problem solving. Smaller class sizes, differentiated and one-to-one instruction are features of this course. Instructional pace and homework are modified.

ALGEBRA II/TRIGONOMETRY

452252 / 452254

Prerequisite: B or above in both semesters of Algebra I, and a B- or above in both semesters of Geometry, or departmental approval

Open to: Grades 9-12, primarily sophomores and juniors

This course covers standard topics in a second year algebra course that includes trigonometry. It is a two semester, year long course that moves at a standard pace. Semester one topics include solving/graphing linear and quadratic equations/inequalities, solving systems in two and three variables, matrices and their applications, and properties of exponents. Second semester focuses on trigonometry, including right triangles, graphs, the unit circle, and solving trigonometric equations. The semester ends with topics in probability. Students who take this course should have successfully completed both Algebra I and Geometry. This course is intended to prepare students for Pre-Calculus or other upper-level mathematics courses. There will be daily homework assignments, math labs, computer applications and projects.

Mathematic, continued

ALGEBRA II/TRIGONOMETRY HONORS

452472 / 452474

Prerequisite: 8th grade recommendation or departmental recommendation

Open to: Grades 9-12, primarily freshmen and sophomores

In this course, students will study the classic functions of algebra: linear, quadratic, rational, polynomial, and trigonometric. The entering expectation is that students will be able to take their thorough understanding of algebra and geometry and be able to apply this understanding to topics such as the real number system, complex numbers, and systems of linear equations, inequalities, conic sections, and analytic geometry. There is a strong emphasis on discovery-based learning in this course where the use of technology will lead students to a deeper understanding of these classes of functions. A significant amount of time is devoted to the derivation and proof of many trigonometric properties. This fast-paced course prepares students for Honors Pre-Calculus. There is an expectation of daily homework, including reading the text.

INTERMEDIATE ALGEBRA SURVEY

452822 / 452824

Prerequisite: C- or above in 2nd semester Algebra I Survey and Geometry Survey, or by departmental approval

Open to: Grades 10-12, primarily juniors

This course is a completion both of Algebra I and Geometry. Topics include data analysis, algebraic expressions, solving equations, polynomials, right triangles, trigonometry, rational expressions, graphing functions, systems of equations, proportion, and statistics. Through structured support with reading, time management, organization, note-taking, and problem solving, students have the opportunity to master the course material. The curriculum will be presented in a format that makes class as active as possible, utilizing a wide variety of instructional strategies. This includes cooperative learning, mathematical discourse, interactive lecture, discovery learning, projects, math labs, and use of technology. Regular homework assignments will be given to extend learning.

PRE-CALCULUS

453052 / 453054

Prerequisite: B or above in both semesters of Algebra II/Trigonometry, or B or above in 2nd Semester Trigonometry and Related Topics, or departmental approval

Open to: Grades 9-12, primarily juniors and seniors

This course offers students a bridge from high school to college mathematics. Students have the opportunity to revisit previously learned topics using an application based approach, while also extending their knowledge into unexplored curricula. Students explore content such as higher order polynomial functions, trigonometry, inequalities, logarithms, conic sections, probability and statistics, sequences and series, as well as an introduction to the fundamentals of calculus. Curriculum is presented utilizing a variety of instructional strategies including interactive lecture, cooperative learning, mathematical discourse, discovery learning, and the use of technology primarily through a graphing calculator. There is an expectation of daily homework, including reading the text.

PRE-CALCULUS HONORS

453272 / 453274

Prerequisite: Departmental recommendation

Open to: Grades 9-12, primarily juniors and seniors

The intent of this course is to provide a thorough preparation for the study of college Calculus. Students have the opportunity to revisit previously learned topics using an application based approach, all while extending mathematical knowledge into new concepts. Content explored includes: higher order polynomial functions, additional circular trigonometry, inequalities, logarithms, finance applications, basic probability and statistics, polar equations and graphs, vectors, sequences and series. Also included is an introduction to the fundamental concepts of calculus: limits, derivatives, and integrals. The curriculum will be presented utilizing a wide variety of instructional strategies, including interactive lecture, cooperative learning, mathematical discourse, discovery learning, and technology. There is an expectation of daily homework, including reading the text.

TRIGONOMETRY AND RELATED TOPICS

453452 / 453454

Prerequisite: C or above for both semesters of Algebra II or departmental approval

Open to: Grades 11-12

The first semester of Trigonometry and Related Topics develops the basic concepts of trigonometry. This includes unit circle trigonometry, graphing of trigonometric functions, solving triangles, and verifying trigonometric identities. The second semester generally covers advanced topics of mathematics including: conic sections, sequences and series, standardized test review, exponential and logarithmic functions, and statistics and data analysis. The curriculum will be presented utilizing a wide variety of instructional strategies, including interactive lecture, cooperative learning, discovery learning, and applications of technology. There is an expectation that students will complete daily assignments. Students may be assessed on assignments, group and partner work, tests, quizzes, lab activities, and projects.

Mathematic, continued

DISCRETE MATHEMATICS (*single semester*)

453652 / 453654

Prerequisite: C- in Algebra II/Trigonometry,
or C- in Pre-Calculus,
or B in Trigonometry and Related Topics,
or departmental approval

Open to: Grades 11, 12

This winning mathematics elective will introduce students to four important mathematical topics not included under the umbrella of algebra. This is a non-algebra based course for students wanting to continue a study of mathematics. The semester long course will focus on the concepts, procedures, and real world applications of four major topics: logic, election theory, trees, and graph theory. The curriculum will be presented utilizing a wide variety of instructional strategies, including interactive lecture, cooperative learning, discovery learning, and the use of technology. There is an expectation that students have a graphing calculator and complete daily assignments. Students may be assessed on assignments, group and partner work, tests, quizzes, lab activities, and projects.

ALGEBRA II SURVEY

440022 / 440024

Prerequisite: A passing grade in Intermediate Algebra Survey *or* departmental approval

Open to: Grade 12

This senior course is a continuation of topics from the Intermediate Algebra Survey curriculum, including topics in trigonometry. Through structured support with reading, time management, organization, note-taking, and problem solving, students have the opportunity to learn algebraic concepts to increase their problem solving skills. Content explored includes: basic problem solving strategies, linear equations and inequalities, quadratic equations, graphing, geometric topics, trigonometric topics, finance applications, statistics, and probability. The curriculum will be presented in a format that makes the class as active as possible, utilizing a wide variety of instructional strategies. This includes interactive lecture, cooperative learning, discovery learning, projects, and technology. There will be daily homework assignments, including the expectation that students will read the text to support their learning.

INTRODUCTION TO CALCULUS (SINGLE SEMESTER)

453852 / 453854

Prerequisite: C- in Pre-Calculus, or departmental approval

Open to: Grades 11, primarily 12

The goal of this (*non-AP*) course is an introduction to the basic vocabulary and concepts of calculus. Calculus is the study of the mathematics relating to change of quantity. This course will follow the **Rule of Four**: exploring all concepts algebraically, graphically, numerically, and verbally. Students will solve problems algebraically using calculus notation, and graphically and numerically using tables of values. We will also use these approaches to real world problems and applications. Active participation will be essential, and an expectation that students have a graphing calculator and complete daily assignments. Students may be assessed on assignments, group and partner work, tests, quizzes, and lab activities. Key topics will include a study of limits, basic derivatives, anti-derivatives/indefinite integrals, definite integrals and applications of all topics.

ADVANCED PLACEMENT CALCULUS AB

454482 / 454484

Prerequisite: B or above for both semesters of Pre-Calculus *or* by departmental approval

Open to: Grades 9-12, primarily juniors and seniors

This course offers students a first semester of college calculus. Students have the opportunity to learn topics using an application based approach, all while extending mathematical knowledge into new concepts. Content explored includes the four fundamental concepts of calculus: limits, derivatives, definite integrals and indefinite integrals. All topics are presented algebraically, numerically, graphically, and verbally, aligning with the College Board's recommendations. The curriculum is presented utilizing a wide variety of instructional strategies, including interactive lecture, cooperative learning, mathematical discourse, discovery learning, and technology. There is an expectation of daily homework, including pre-reading the text.

ADVANCED PLACEMENT CALCULUS BC

454682 / 454684

Prerequisite: B or above for both semesters of Pre-Calculus Honors *or* departmental approval

Open to: Grades 9-12, primarily juniors and seniors

This course offers students a full year, or two semesters of college calculus. Content explored includes the four fundamental concepts of calculus: limits, derivatives, definite integrals and indefinite integrals. All topics are presented algebraically, numerically, graphically, and verbally, aligning with the College Board's recommendations. The curriculum is presented utilizing a wide variety of instructional strategies. This includes interactive lecture, cooperative learning, mathematical discourse, discovery learning, and technology. There is an expectation of daily homework, including pre-reading the text.

Mathematic, continued

INTRODUCTION TO STATISTICS (*single semester*)

454052 / 454054

Prerequisite: Passing grade in Algebra II or Algebra II/Trig., or departmental approval

Open to: Grades 11, 12

The philosophy behind this (*non-AP*) mathematics elective is a strong emphasis on **statistical literacy**. The target is to have every student become familiar with the vocabulary and concepts of basic statistics. Students will focus on the **concepts of statistics**, rather than on the mathematical formulas of statistics. We will also expect students to be able to read and understand the multiple uses of statistics found in the media. Active participation will be essential, and a major portion of the course will involve groups of students conducting a statistical research project. The other topics include the statistical research process, collecting data, descriptive statistics- both univariate and bivariate, randomness, and probability basics.

ADVANCED PLACEMENT STATISTICS

454282 / 454284

Prerequisite: B in Algebra II/Trigonometry

Open to: Grades 10-12

There are four major themes in AP Statistics: data analysis, planning a statistical study, probability, and statistical inference. Concepts and real world applications, rather than formulas, are the focus of the course. Students make extensive use of technology including graphing calculators and the statistical software program FATHOM. There is an expectation of daily homework throughout the year and an extended statistical project during the second semester. The course content is aligned with the Advanced Placement Statistics course description, and students may take the Advanced Placement Statistics Exam.

MULTIVARIABLE CALCULUS & LINEAR ALGEBRA (Honors)

454892 / 454894

Prerequisite: B in Advanced Placement Calculus BC

Open to: Grades 9-12, primarily seniors

Multivariable Calculus & Linear Algebra is an honors, advanced course in mathematics. Topics from the calculus of two dimensional space are extended into three dimensions. Students also expand their study of vector defined functions and parametric functions. Students use computer software to explore plots of three dimensional surfaces and paths. Topics include partial derivatives, double, triple, line, and surface integrals. In Linear Algebra, students solve linear systems in multiple representations, including matrices and vectors. Students investigate vector spaces, Eigen values and Eigenvectors. Students frequently present their work to the class. They are also expected to learn independently through reading the text and resources found on the internet. Students must be able to grasp abstract mathematical concepts, as well as follow and make valid mathematical arguments. Classroom structures, determined by topic, include computer lab work, lecture, and cooperative group investigations. Students must be skilled in the use of graphing calculators.

INTRODUCTION TO PROGRAMMING (*single semester*)

455052 / 455054

Prerequisite: None

Open to: Grades 9-12

Note: This course can be taken for 1 credit in Mathematics or in Applied Arts.

This course is a one-semester introduction to the basic science and artistry of structured programming. It was developed to be appropriate for students with little to no computing background, but who have an interest in experiencing the joy and challenge of implementing a working computer program. Alice and Java are the primary software tools used in the development and mastery of course targets. Because it is a lab-based course, students will spend a considerable amount of time experimenting with course topics. Course topics will include: pseudocode, debugging, control structures, data types, data structures, introductory object-oriented theory, recursion, and code documentation. Field trips may be integrated into the course to provide students with exposure to how programming is done in industry. This course will provide a solid preparation for AP Computer Science.

ADVANCED PLACEMENT COMPUTER SCIENCE

455282 / 455284 (A)

455482 / 455484 (AB)

Prerequisite: B- or above in Algebra I

or B- or above in Introduction to Computer Programming

or departmental approval

Open to: Grades 9-12, primarily juniors and seniors

Note: This course can be taken for credit in Mathematics or in Applied Arts.

AP Computer Science is a dynamic course designed to develop the fundamental skills necessary for success on the AP Computer Science A exam. It is also a course that provides motivated students the opportunity to experience firsthand the enjoyment, challenge, and artistry of programming. Students who invest the necessary level of effort and time should expect to enjoy a significantly increased ability to solve complex and abstract problems in both programming and non-programming contexts. In particular, the essence of this course is split into three general concentrations:

Mathematic, continued

1. By writing code, solving problems, and completing individual and team projects, students can expect to develop an understanding of the JAVA programming language sufficient for preparation to take an Advanced Placement Computer Science A exam.
2. By analyzing real-world case studies of written code, students can expect to receive an introductory glimpse of the project-development process commonly found in the real world.
3. By studying and mastering well-known programming algorithms and strategies, students can expect to develop good programming techniques that are independent of the particular programming language used.

This is a course that demands students be both independent and team workers. What is done from day to day in class will vary depending on the individual needs and ability levels of each student. Thus, both independence and teamwork are prerequisites for students wishing to do well in this course, and on the accompanying AP test. A second year option is available for students who choose to further develop their programming skills.

BUSINESS MATH ALTERNATIVE

858542 / 858544

Prerequisite: Departmental recommendation

Open to: Grades 11-12

Note: Successful completion of this year long course fulfills the graduation requirement for consumer education.

This course is designed to develop practical math skills. Topics may include personal money management, budgeting, banking services, income taxes, insurance, installment buying and credit. Basic computation, calculator applications, fractions and percentages will be taught within the context of the consumer topics. This course may be repeated for credit. Two semesters will fulfill the math and consumer education graduation requirements.

BUSINESS MATH FUNDAMENTALS

850812 / 850814

Prerequisite: Departmental recommendation

Open to: Grades 11-12

Note: Successful completion of this year long course fulfills the graduation requirement for consumer education.

This course is designed to develop the skills, concepts and understanding required for everyday living so that an individual may achieve maximum utilization of and satisfaction from his/her financial resources. Through structured support with reading, time management, organization, note-taking and problem solving, students have the opportunity to learn concepts that will increase their consumer knowledge and skills. Content areas include banking, budgeting, renting an apartment, purchasing a vehicle, credit and identity theft. Students will also explore the areas of advertising, consumer powers, obtaining employment and interviewing skills. Instruction is differentiated to meet the needs of individual students. The curriculum is presented in an interactive method and utilizes instructional strategies including cooperative learning, discovery learning, projects and use of technology. Homework is assigned to support student learning.

Physical Education, Traffic Safety, and Health

The philosophy of physical education at Deerfield High School recognizes the dignity and worth of all individuals. The department acknowledges the individual differences and potentials of youth. The department advocates that students acquire the knowledge and training to stimulate their interest throughout life so that they may realize the maximum potential of their physical and mental health.

Objectives:

1. To provide a diversified program of participation stressing psychomotor development and functional fitness.
2. To develop cardiovascular fitness, flexibility, kinesthetic awareness, motor ability and power and strength.
3. To develop inherent movement patterns and skills in a wide variety of activities suited to present and future needs.
4. To provide the opportunity for participation in the various skill levels of each activity offered in the program.
5. To develop through physical activities, behavior patterns necessary for useful living in a democratic society.
6. To stimulate the understanding and appreciation of efficient movement.
7. To teach the knowledge of the purposes and values of physical education that will lead to increased interest and favorable attitudes towards physical activity.
8. To acquire the knowledge and understanding necessary to develop a personal functional fitness program.
9. To provide opportunities for creative experiences.
10. To provide the opportunity for stimulation and development of the mental processes by practical application in game strategy and understanding of the rules.
11. To provide the opportunity to participate in high challenge activities.
12. To develop an interest and appreciation which will stimulate the carry-over value of physical activity throughout life.
13. To develop a positive attitude towards cleanliness, good posture, nutrition, and the benefits of exercise.
14. To provide a wholesome and controlled outlet for the normal release of tensions.
15. To provide the opportunities to experience and develop leadership quality.
16. To provide processes for the self-evaluation of personal performance.

Physical Education Credit

Seven semesters of Physical Education are required for graduation. Fine Arts Dance may be taken in addition to P.E. during a student's freshman year. During a student's sophomore, junior and senior years Fine Arts Dance may be taken instead of P.E. Students may not register for Health Education until the summer prior to their sophomore year. If a student has a "Doctor's Excuse" from P.E., the student must still have 41 credits for graduation. Every effort is made to place a student in the section of his/her choice. When scheduling problems occur, the student will be placed in open sections. Students should pay particular attention to the activities listed in the following course descriptions. Boys and girls may register for any courses in P.E. at their particular grade level. All students will participate in Physical Fitness Testing.

Physical Education, Traffic Safety, and Health

Advanced Studies in Dance	X**	X**	X	X

(s) Denotes semester course
 * May be taken in conjunction with Freshman PE. Freshman students enrolled in Dance will earn Fine Arts credit.
 ** With departmental approval.

FRESHMAN PHYSICAL EDUCATION A

510052 / 510054

Prerequisite: None

Open to: Grade 9

The freshman year program is designed around the concepts of wellness knowledge and fitness for life. The program also provides an opportunity to learn and appreciate various team and individual activities, including field hockey, volleyball, lacrosse, badminton, soccer, swimming, track, gymnastics, fitness, weight training and softball. Students will also participate in a CPR awareness course.

FRESHMAN PHYSICAL EDUCATION B

510152 / 510154

Prerequisite: None

Open to: Grade 9

The freshman year program is designed around concepts of wellness and fitness for life. Emphasis is on the development of wellness knowledge and fitness skills. The program also provides an opportunity to learn and appreciate various team and individual activities including swimming, tennis, speedball, tumbling/gymnastics, floor hockey, volleyball, soccer, flag football, fitness, weight training and softball. Students will also participate in a CPR awareness course.

Physical Education, Traffic Safety, and Health, continued

SOPHOMORE PHYSICAL EDUCATION A (s)

520352 / 520354

Prerequisite: None

Open to: Grade 10

Note: This course may be repeated.

Wellness knowledge and fitness skills will continue to be emphasized and expanded. Various team and individual activities will round out the program including rhythmic, synchronized swimming, ultimate Frisbee, flag football and basketball. Rhythmic activities are a combination of rhythmic gymnastics and dance skills.

SOPHOMORE PHYSICAL EDUCATION B (s)

520452 / 520454

Prerequisite: None

Open to: Grade 10

Note: This course may be repeated.

Wellness knowledge and fitness skills will continue to be emphasized and expanded. Various team and individual activities round out the program including aquatics, soccer, speedball, basketball, floor hockey, fitness/weight training and badminton.

PHYSICAL EDUCATION ALTERNATIVE I and II

859042 / 859044

Prerequisite: Department recommendation

859142 / 859144

Open to: Grades 9-12

Physical education instruction and activities are modified to motivate and encourage student participation in activities which increase cardiovascular functioning, developing a personal fitness plan and increasing skills and awareness of a variety of physical and recreational activities. This course fulfills P.E. graduation requirements and may be repeated for credit.

HEALTH EDUCATION (s)

520652 / 520654

Prerequisite: None

Open to: Grades 10-11

Note: This course is required for graduation and it is usually taken during the sophomore year.

Health Education is a totality of experiences that may influence knowledge, attitudes, and practices and should eventually be reflected in our everyday living patterns. General course objectives are to:

- (1) acknowledge the current health problems facing society today,
- (2) explain why certain health problems are currently so controversial,
- (3) discuss solutions and preventive measures to current health issues,
- (4) discuss peer pressure in making decisions regarding health practices,
- (5) seek reliable information from a number of sources in caring for individual health needs, and
- (6) develop respect for the opinions of others regarding controversial health problems.
- (7) discuss recent information that allows for more informed decision making regarding personal wellness.

AEROBICS (s)

551652 / 551654

Prerequisite: None

Open to: Grades 11-12

Note: This course may be taken only once each school year.

This course is designed for those students that are interested in achieving aerobic fitness through a variety of aerobic activities. This course is ideal for those students who have personal goals regarding fitness and body composition. Activities include bicycling, rollerblading, step aerobics, water aerobics, jogging, cross country skiing, relaxation, weights, fitness testing, and assessment testing.

CORE FITNESS (s)

551752 / 551754

Prerequisite: None

Open to: Grades 11-12

Note: This course may be taken only once each school year.

This course would be beneficial for any individual who is interested in improving his or her overall core strength and fitness. This will be done through a variety of activities including yoga, Pilates, step aerobics, "hi/lo" impact aerobics, lightweights, bands and stability balls. The fitness concepts of cardiovascular fitness, muscular strength, muscular endurance and flexibility will be interwoven in the course during the semester. The students will become aware of their posture, while toning the muscles and improving flexibility and strength.

Physical Education, Traffic Safety, and Health, continued

AQUATICS (s)

551452 / 551454

Prerequisite: None

Open to: Grades 11-12

Note: This course may be taken only once per school year.

This course is designed for the student that wants to experience a variety of individual and team activities performed in the water. This course includes snorkeling, water polo, underwater hockey, underwater ultimate, water basketball, water volleyball, aqua-aerobics, diving, fitness concepts and assessment testing.

OUTDOOR ADVENTURE I (s)

552252 / 552254

Prerequisite: None

Open to: Grades 11-12

Note: This course may be taken only once during a student's high school experience. **Please note that students may not waiver out of this course.**

This course is designed for those students that are interested in participating in a variety of challenge and risk taking activities that promote a respect for the outdoors and inspire individual growth and self confidence. Activities that students will be exposed to include kayaking, canoeing, swimming, archery, wall climbing, high ropes course, initiative games, geocaching, cross country skiing, snow shoeing, basic cooking, fitness concepts, and assessment testing. The course will culminate with a fitness challenge. Students should be proficient at swimming and/or be comfortable in the water.

OUTDOOR ADVENTURE II (s)

552452 / 552454

Prerequisite: Outdoor Adventure I

Open to: Grades 11-12

Note: This course may be repeated once. **Please note that students may not waiver out of this course.**

This course is designed for students who are interested in advanced activities and in-depth learning within the outdoor adventure setting. Activities include advanced kayaking, water rescues, cooking, camping skills, fly fishing, geocaching and wilderness 1st aid. The course will culminate with an eco challenge. Please note that a text may be required for this course. Students should be proficient at swimming and/or be comfortable in the water.

RACKET/INDIVIDUAL SPORTS (s)

553252 / 553254

Prerequisite: None

Open to: Grades 11-12

Note: This course may be taken only once each school year.

This course is designed for those students that enjoy individual and racket sports. Students will develop individual skills in hand/eye coordination and agility. Students will learn advanced game strategies as well as individual game skills. Activities include: tennis, badminton, pickle ball, paddleball/ping pong, eclipse ball, golf, Frisbee golf, fitness concepts and assessment testing.

TEAM SPORTS I (s)

552852

Prerequisite: None

Open to: Grades 11-12

Note: Team Sports I is offered only during the first semester.

This course is designed for those students that enjoy participating in team type activities. The students will benefit from athletic competition with an emphasis on team strategy, sportsmanship, and game play. Sports offered are: flag football, floor hockey, basketball, team handball, pilo polo, eclipse ball, volleyball, fitness testing, and assessment testing.

TEAM SPORTS II (s)

553054

Prerequisite: None

Open to: Grades 11-12

Note: Team Sports II is offered only during the second semester.

This course is designed for those students that enjoy participating in the team type activities. The students will benefit from athletic competition with an emphasis on team strategy, sportsmanship, and game play. Sports offered are: volleyball, floor hockey, ultimate Frisbee, soccer, softball, fitness testing, and assessment testing.

Physical Education, Traffic Safety, and Health, continued

WEIGHT TRAINING AND CONDITIONING (s)

553152 / 553154

Prerequisite: None

Open to: Grades 11-12

Note: This course may be repeated.

This course is designed for the student that wants a comprehensive weights and conditioning program. The student can experience a variety of weight training methods using weight machines, Olympic weights, dumb bells, rubber bands, medicine balls, and body resistance exercises. The course will also incorporate cardiovascular training, agility and coordination training, and plyometrics, as well as fitness testing and assessment testing.

EARLY BIRD PHYSICAL EDUCATION (s)

552652 / 552654

Prerequisite: None

Open to: Grades 11-12

Note: Meets 5 days per week before school. No special transportation provided. This course may be repeated.

Students have input into the course outline and have use of all facilities. The units may include soccer, football, team handball, volleyball, pickle ball, floor hockey, tennis, badminton, softball, individual workout, basketball, speedball, and fitness testing and assessment testing.

JUNIOR LEADERS PHYSICAL EDUCATION

530952 / 530954

Prerequisite: Department recommendation

Open to: Grade 11

Students are selected prior to their junior year and take this class in place of Junior/Senior Physical Education. During the junior year students are involved in individual and team sports in which leadership training, basic and advanced skills, methods of teaching, and officiating are emphasized.

SENIOR LEADERS PHYSICAL EDUCATION

541052 / 541054

Prerequisite: Junior Leaders

Open to: Grade 12

During their senior year students are assigned to an instructor and will serve as a teaching assistant. The skills learned in the junior year are transferred into the class setting.

ADAPTIVE PHYSICAL EDUCATION

554452 / 554454

Prerequisite: Department or physician's recommendation

Open to: Grades 9-12

This is a special program for the student with special needs. The curriculum is based upon the needs and abilities of the participants. Individual programs are developed and, in some cases, treatment is administered.

TRAFFIC SAFETY EDUCATION (s)

520752 / 520754

Prerequisite: Must receive a passing grade in at least 8 courses during the 2 semesters immediately prior to enrolling.

Open to: Sophomores, Juniors and Seniors (15 or older)

This is a one semester course usually required during the sophomore year. Please note that the student must be at least 15 years old prior to the start of the course. The course consists of at least thirty hours of classroom instruction and at least six hours of behind the wheel instruction. Students who successfully complete the course are given a certificate of completion by the Superintendent of Public Instruction for the State of Illinois. The State of Illinois mandates strict attendance requirements.

TRAFFIC SAFETY ESSENTIALS

856202 / 856204

Prerequisite: Department recommendation

Open to: Students 15 or older

This full-year course meets the graduation requirement for traffic safety. Students are taught the rules of the road through the perspectives of drivers, pedestrians, and bicycle riders. Through structured support with reading, time management, organization, note-taking, and problem-solving, students have the opportunity to learn and apply rules of the road. Instruction is differentiated to meet the needs of individual students. During the second semester, students may be assessed to determine whether or not they will participate in on-the-road driving lessons.

Physical Education, Traffic Safety, and Health, continued

DANCE EXPLORATIONS

553752 / 553754

Prerequisite: None

Open to: Grades 9-12

In this course, students explore modern dance, ballet, jazz, current dance forms and ethnic styles. Students are introduced to basic movement patterns, improvisation exercises and fitness through dance. All students will perform in the dance class concerts in the winter and spring. It is open to freshman for Fine Arts credit; sophomores enroll for a full year and receive one PE credit and one Fine Arts credit; and juniors and seniors may elect either PE credit or Fine Arts credit. Students may re-enroll subsequent years to continue to refine their skills.

INTERMEDIATE DANCE STUDIES

553852 / 553854

Prerequisite: Dance Explorations or instructor recommendation

Open to: Grades 9-12

In this course, students will continue to refine their technical skills, specifically in Modern, Ballet, and Jazz techniques. Students will access their creativity through choreography and improvisation. They will be introduced to dance criticism and will begin to analyze and critique both amateur and professional work. All students will perform in the dance class concerts in the winter and spring. It is open to freshman for Fine Arts credit; sophomores who enroll for a full year will receive one PE credit and one Fine Arts credit; and juniors and seniors may elect either PE credit or Fine Arts credit. Students may re-enroll in subsequent years to continue to refine their skills.

ADVANCED STUDIES IN DANCE

553952 / 553954

Prerequisite: Instructor recommendation

Open to: Grades 11-12 (Grades 9-10 may enroll with departmental approval)

Advanced Studies in Dance is designed for the serious student who is interested in pursuing dance from a performance oriented technical base while exploring an academic approach to choreography. The course includes performance skills, the production elements of lighting, costuming and program planning, research and the relationship between dance and other content areas. It is a year-long course involving two performances of student choreographed works. Students may re-enroll in this class for subsequent years.

Science

The vision of the science department is “Scientific Literacy For All”. The science department curriculum is designed to develop the skills needed for success in science as students learn major concepts in biology, chemistry, and physics. Earth and space science concepts are integrated within those core content courses. It is important for students to either have finished or be finishing the core Biology, Chemistry, and Physics courses before further applying skills and concepts in Advanced Placement science courses or science elective courses as upperclassmen.

SCIENCE: COURSE OFFERINGS

(s) Denotes a single semester course.

FRESHMAN PHYSICS

610052 / 610054

Prerequisite: None

Open to: Grade 9

Freshmen Physics provides a basic understanding of the natural laws affecting matter and energy through the exploration of real-life examples involving the application of physics concepts. Topics investigated through laboratory experiences include motion, forces, energy, electricity, waves, sound, and light. Communication, inquiry, laboratory, math, reading and study skills are reinforced with work done both in and out of class. This is a year-long course that meets the criteria for a laboratory-based physics course for college preparation.

Science, continued

FRESHMAN PHYSICS SURVEY

610222 / 610224

Prerequisite: Middle school recommendation

Open to: Grade 9

Freshmen Physics provides a basic understanding of the natural laws affecting matter and energy through the exploration of real-life examples involving the application of physics concepts. Topics investigated through laboratory experiences include motion, forces, energy, electricity, waves, sound, and light. Communication, inquiry, laboratory, math, reading and study skills are developed with work primarily completed in class. Freshman Physics Survey is designed to help students become confident learners. This is a year-long course that meets the criteria for a laboratory-based physics course for college preparation.

FRESHMAN PHYSICS HONORS

610372 / 610374

Prerequisite: Middle school recommendation for an honors math course.

Open to: Grade 9

Freshmen Physics Honors provides a deep understanding of the natural laws affecting matter and energy at an accelerated pace through the exploration of real-life examples involving the application of physics concepts. Topics investigated through laboratory experiences include motion, forces, energy, electricity, waves, sound, and light. Communication, inquiry, laboratory, math, reading and study skills are reinforced. Students are challenged with independent problem solving outside of class. This is a year-long course that meets the criteria for a laboratory-based physics course for college preparation.

BIOLOGY

620552 / 620554

Prerequisite: Successful completion of a freshman physics course

Open to: Grade 10

Biology is a laboratory-oriented course that presents a basic knowledge of life through the development of six themes: interdependence of life, matter and energy in living things, cellular structure and function, molecular genetics, patterns of inheritance, and biological evolution. A variety of organisms are studied in the lab to develop an understanding of these themes. Communication, inquiry, laboratory, math, reading and study skills are reinforced. Students work independently outside of class reading and writing as they process laboratory experiences. This is a year-long course that meets the criteria for a laboratory-based biology course for college preparation.

BIOLOGY SURVEY

620722 / 620724

Prerequisite: Successful completion of a freshman physics course; departmental recommendation

Open to: Grade 10

Biology is a laboratory-oriented course that presents a basic knowledge of life through the development of six themes: interdependence of life, matter and energy in living things, cellular structure and function, molecular genetics, patterns of inheritance, and biological evolution. A variety of organisms are studied in the lab to develop an understanding of these themes. Communication, inquiry, laboratory, math, reading and study skills are developed. Students work primarily in class with guidance to process laboratory experiences. This is a year-long course that meets the criteria for a laboratory-based biology course for college preparation.

BIOLOGY HONORS

651872 / 651874

Prerequisite: Freshmen must be registered for an honors math course; sophomores must have successfully completed a freshman physics course and have a departmental recommendation

Open to: Grades 9-10

Biology is a laboratory-oriented course that presents a basic knowledge of life through the development of six themes: interdependence of life, matter and energy in living things, cellular structure and function, molecular genetics, patterns of inheritance, and biological evolution. A variety of organisms are studied in the lab to develop an accelerated understanding of these themes. Communication, inquiry, laboratory, math, reading and study skills are mastered. Students are challenged to think abstractly and to work independently outside of class reading and writing as they process laboratory experiences. This is a year-long course that meets the criteria for a laboratory-based biology course for college preparation.

Science, continued

BIOLOGY ESSENTIALS

856502 / 856504

Prerequisite: Departmental recommendation

Open to: Grades 9-12

This full year course gives students an introduction to the study of biology while developing their reading, writing, measurement and critical thinking skills. Laboratory and classroom activities are combined in a single period. This course fulfills the health graduation requirement. Students learn to work with partners in a structured laboratory setting. Instruction is differentiated to meet the needs of individual students. Focus is on practical application and curriculum is taught using concrete examples. Content explored includes plants, animals, organization of living systems, systems of the body, nutrition and healthy habits. There will be homework to extend learning, but the assignments will generally be started in class under the teacher's supervision.

BIOLOGY FUNDAMENTALS

853012 / 853014

Prerequisite: Departmental recommendation

Open to: Grades 9-12

This course is designed to introduce students to the study of biology, and also fulfills the health graduation requirement. Students study the fundamental themes of biology, and develop skills in the areas of communication, note taking, inquiry, laboratory procedures, reading, and study skills. The format of the class includes lecture, note taking, group discussions, peer work, and guided practice with laboratory experiences. This is a year long course and may be repeated for credit. This does not meet the criteria for a laboratory-based biology course for college preparation, so students preparing for college are encouraged to take a lab science after successfully completing two semesters of science fundamentals.

CHEMISTRY

652252 / 652254

Prerequisite: Successful completion of a Biology course

Open to: Grades 10-11

Chemistry is the study of the composition of matter, including its structure, properties, and behavior under many conditions. Students learn chemistry by doing a variety of chemistry experiments in the laboratory. Emphasis is placed on learning the concepts and the processes of science. Communication, inquiry, laboratory, math, reading and study skills are mastered. Students are expected to solve problems and analyze laboratory data independently outside of class. This is a year-long course that meets the criteria for a laboratory-based chemistry course for college preparation.

CHEMISTRY SURVEY

630822 / 630824

Prerequisite: Successful completion of a Biology course; departmental recommendation

Open to: Grade 11

Chemistry is the study of the composition of matter, including its structure, properties, and behavior under many conditions. Students learn chemistry by doing a variety of chemistry experiments in the laboratory. Emphasis is placed on learning the concepts and the processes of science in an environmental and societal context. Students learn the applications of chemistry in their own lives. Communication, inquiry, laboratory, math, reading and study skills are reinforced. Students work both in and out of class solving problems and analyzing laboratory data. This is a year-long course that meets the criteria for a laboratory-based chemistry course for college preparation. Students interested in pursuing a science major or science-related career in college should not take this course.

CHEMISTRY HONORS

652572 / 652574

Prerequisite: Successful completion of a Biology course; departmental recommendation

Open to: Grades 10-11

Chemistry is the study of the composition of matter, including its structure, properties, and behavior under many conditions. Students learn chemistry at a challenging accelerated pace by doing a variety of chemistry experiments in the laboratory. Emphasis is placed on learning the concepts and the processes of science. Students are expected to think abstractly to solve problems and analyze laboratory data independently outside of class. A college level textbook is used in the course. This is a year-long course that meets the criteria for a laboratory-based chemistry course for college preparation.

Science, continued

PHYSICS

630952 / 630954

Prerequisite: Successful completion of a Biology and Chemistry course

Open to: Grades 11-12

Physics is the study of the interactions between matter and energy. Topics covered in the course included motion, forces, energy, electricity, electromagnetism, sound, and light. Lab experiences involve using technology as a means to collect, analyze, and present scientific data. This course encourages students to think critically in solving problems. A knowledge of trigonometry is strongly recommended for success in problem solving. This is a year-long course that meets the criteria for a laboratory-based physics course for college preparation.

PHYSICS HONORS

631172 / 631174

Prerequisite: Successful completion of a Biology and Chemistry course; departmental recommendation

Open to: Grades 11-12

Physics is the study of the interactions between matter and energy. Topics covered in the course included motion, forces, energy, electricity, electromagnetism, sound, and light. Lab experiences involve using technology as a means to collect, analyze, and present scientific data. This challenging accelerated course encourages students to think critically in solving problems. A knowledge of trigonometry is strongly recommended for success in problem solving. Students are expected to think abstractly in solving problems and analyzing data independently outside of class. A college level textbook is used in the course. This is a year-long course that meets the criteria for a laboratory-based physics course for college preparation.

PHYSICS FUNDAMENTALS

852912 / 852914

Prerequisite: Departmental recommendation

Open to: Grades 9-12

This course is designed to introduce students to the study of physics. Students study the fundamental themes of physics, and are taught by experiencing physics concepts through activities. Students develop skills in the areas of communication, note taking, inquiry, laboratory procedures, and study skills. The format of the class includes lecture, note taking, group discussions, peer work, and guided practice with laboratory experiences. This is a year long course and may be repeated for credit. This does not meet the criteria for a laboratory-based biology course for college preparation, so students preparing for college are encouraged to take a lab science after successfully completing two semesters of science fundamentals.

PHYSICS ESSENTIALS

856602 / 856604

Prerequisite: Departmental recommendation

Open to: Grades 9-12

This course gives students an introduction to physical science while developing their reading, writing, measurement and critical thinking skills. Laboratory and classroom activities are combined in a single period. Students learn to work with partners in a structured laboratory setting. Instruction is differentiated to meet the needs of individual students. Focus is on practical application and curriculum is taught using concrete examples. Content explored includes motion, forces, energy, electricity, light, waves, sound, density and measurement. Class time is highly structured and is spent reading, discussing, doing laboratory activities, using technology for information, and writing. There will be homework to extend learning, but the assignments will generally be started in class under the teacher's supervision.

AP BIOLOGY

653182 / 653184

Prerequisite: Must have earned grades of B or better in Biology and Chemistry

Open to: Grades 11-12

This course is designed for students who have demonstrated ability and interest in biology and who desire to pursue their study in greater depth. AP Biology is a rigorous college lecture/laboratory course. The class meets for two 57 minute and two 88 minute periods per week. This course follows the AP course outline and students are eligible to take the Advanced Placement Examination during second semester which could result in earning college credit. Course emphasis is in three major areas: molecular and cellular biology, organismal biology and population biology. The aim of the course is to achieve knowledge of the principles and processes of biology, an understanding of how biological information is collected and interpreted, and an understanding that science is a human endeavor with social consequences.

Science, continued

AP CHEMISTRY

653382 / 653384

Prerequisite: Must have earned grades of B or better in Chemistry (not including summer school course) and Algebra II or Algebra II/Trigonometry. Completion of Physics or Honors Physics with at least a B (or concurrent enrollment) is strongly suggested.

Open to: Grades 11-12

This course builds upon chemical concepts, problem-solving skills, and laboratory skills developed in a first-year chemistry course. AP Chemistry is a rigorous college-level lecture/laboratory course that requires (and further develops) strong conceptual and mathematical problem-solving skills. The class meets for two 57-minute and two 88-minute periods per week. The DHS course syllabus has been authorized by the College Board and students are eligible to take the Advanced Placement Examination during second semester, which could result in earning college credit. Central topics of study are stoichiometry, gases, equilibrium, acids and bases, thermodynamics, electrochemistry, atomic and molecular structure, periodic trends, kinetics, and nuclear chemistry. Several extended laboratory activities accompany each unit of study, introducing students to advanced laboratory techniques and data analysis. This course builds upon chemical concepts developed in a first year chemistry course.

AP PHYSICS B

653082 / 653084

Prerequisite: Completion of a year of physics

Open to: Grade 11-12

This course builds upon concepts developed in a first year physics course. AP Physics B is broader and in less depth than AP Physics C and includes the topics of mechanics, electricity, magnetism, fluid mechanics, thermal physics, waves and optics, atomic and nuclear physics. This is a rigorous college lecture/laboratory course. The class meets for two 57 minute and two 88 minute periods per week. This course follows the AP course outline and students are eligible to take the Advanced Placement Examination during second semester which could result in earning college credit.

AP PHYSICS C: MECHANICS (s)

641784

Prerequisite: Must have earned grades of B or better in Physics Honors or an A in Physics; concurrent registration in Calculus is strongly recommended

Open to: Grade 12

This course builds upon concepts developed in a first year physics course. Emphasis is placed on theory and problem solving skills. AP Physics C: Mechanics is a rigorous college lecture/laboratory course. The class meets for two 57 minute and two 88 minute periods per week. This course follows the AP course outline and students are eligible to take the Advanced Placement Examination during second semester which could result in earning college credit.

AP PHYSICS C: ELECTRICITY AND MAGNETISM (s)

641782

Prerequisite: Must have earned grades of B or better in Physics Honors or an A in Physics; concurrent registration in Calculus is strongly recommended

Open to: Grade 12

This course builds upon concepts developed in a first year physics course. Emphasis is placed on theory and problem solving skills. AP Physics C: Electricity and Magnetism is a rigorous college lecture/laboratory course. The class meets for two 57 minute and two 88 minute periods per week. This course follows the AP course outline and students are eligible to take the Advanced Placement Examination during second semester which could result in earning college credit.

AP ENVIRONMENTAL SCIENCE

653482 / 653484

Prerequisite: Successful completion of Biology and Chemistry

Open to: Grades 11-12

This course gives students an opportunity to explore current areas of concern in the environment through a combination of classroom and real world activities. Students study many complex environmental problems while engaging in real world solutions. Half the homework points come from readings, worksheets, and review questions. The other half come from participating first-hand in real world solutions to environmental problems in our community and around the world. Graduates of this class will not only be knowledgeable about the causes of environmental problems but also experienced in the solutions. AP Environmental Science is a college level course. Emphasis is

Science, continued

placed on developing the type of strong study and leadership skills necessary to solve complex environmental problems in our society. The class meets for two 57 minute and two 88 minute periods per week. The course follows the AP course outline and students are eligible to take the Advanced Placement Examination during second semester which could result in earning college credit.

ENVIRONMENTAL SCIENCE ESSENTIALS

856702 / 856704

Prerequisite: Departmental recommendation

Open to: Grades 9-12

This course gives students an introduction to environmental science while developing their reading, writing, measurement and critical thinking skills. Laboratory and classroom activities are combined in a single period. Students learn to work with partners in a structured laboratory setting. Instruction is differentiated to meet the needs of individual students. Focus is on practical application and curriculum is taught using concrete examples. The content, oriented toward environmental issues, draws from the fields of ecology, biology, earth science, physics, and chemistry. Class time is spent doing field activities, journal writing, using technology to assess information, and discussing environmental concerns. There will be homework to extend learning, but the assignments will generally be started in class under the teacher's supervision.

EARTH SCIENCE

654052 / 654054

Prerequisite: Successful completion of Biology and Chemistry

Open to: Grades 11-12

Earth Science is a course which helps integrate many of the concepts learned in Biology, Chemistry, and Physics in a meaningful way. Students learn about the world around them and the processes and forces which shape the Earth. Topics studied include plate tectonics, volcanism, glaciation, astrogeology, paleontology, oceanography, meteorology and the geology of our local area. For example, the glacial history of Illinois including Lake County is studied, the stream processes on the Chicago River are analyzed, and the erosion of the Lake Michigan shoreline is observed in detail. A number of lab activities and field work allow students to make connections between the classroom and the natural world. Students are expected to work independently outside of class on assignments.

CRIMINALISTICS (s)

653652 / 653654

Prerequisite: Successful completion of Biology and Chemistry (Chemistry may be taken concurrently)

Open to: Grades 11-12

Criminalistics is the rigorous application of science in the processing of physical evidence during criminal investigations. Students will study the various principles and methods used in the sciences to evaluate evidence at a crime scene. Students interested in applying their prior knowledge from Biology, Chemistry, and Physics will find this course appealing. Students are expected to complete work independently outside of class. Criminalistics is a semester-long course that is scheduled as a NON-lab course but is actually a lab course as students will be expected to participate in lab activities outside of class.

ASTRONOMY (s)

653752 / 653754

Prerequisite: Successful completion of Biology, Chemistry, and Physics (Chemistry may be taken concurrently)

Open to: Grades 11-12

Astronomy is the fascinating study of the night sky, the stars, galaxies, and the universe as a whole. What events have taken place since the beginning of time in the universe which have caused all of these amazing structures to form? Where do we come from? What is our place in the universe? All aspects of astronomy and the universe are subject to study and discussion in this course, and this will lead to the understanding that all the sciences are involved in the study of phenomena in space. The study of astronomy will be approached from the point of view of Earth, looking out into the universe from nearby celestial objects and progressing out to the most distant objects that correspond to phenomena taking place near to the beginning of time itself. The overall evolution of the universe over all of cosmic time will be a key arena of study. Observations and activities will strengthen key concepts and foster student interest. Astronomy is a semester-long course that is scheduled as a NON-lab course but is actually a lab course as students will be expected to participate in night observations of the sky and weekend field trips.

Science, continued

AQUATIC & MARINE SCIENCE (s)

653852 / 653854

Prerequisite: Successful completion of Biology and Chemistry (Chemistry may be taken concurrently)

Open to: Grades 11-12

Whether you live in the Midwest or on the ocean, aquatic literacy is for everyone. There is a global need to know and understand our planet's water resources. Aquatic & Marine Science will introduce students to fresh water and marine ecosystems, the incredible diversity of organisms that live there, and their unique adaptations for survival. In addition, human impact on the sustainability of Earth's water resources is the focus as we examine water quality and the global fresh water crisis. Topics such as invasive species and pollutants in the Great Lakes, fish anatomy, sharks & rays, evolution of marine mammals, bioluminescent marine life, and the impact of oil spills and marine debris will be explored. AMS is a semester-long course that is scheduled as a NON-lab course but is actually a lab course as students will be expected to participate in field trips to the Shedd Aquarium and The Grove in Glenview.

SCIENCE I ALTERNATIVE

859242 / 859244

SCIENCE II ALTERNATIVE

859902 / 859904

Prerequisite: Departmental recommendation

Open to: Grades 9-12

Science Alternative covers a range of topics. Biology, Physics, and Earth Science may be included. Curriculum is designed based on student needs. A Health unit is taught in each course, which fulfills the Health requirement. Biology covers topics such as heredity, the human body, and ecology. Physics topics include motion and force, energy, electricity and magnetism. Earth science includes topics such as weather, oceans, earth materials, and astronomy. Lab experiences are incorporated when appropriate. Teachers focus on skill building in areas such as organization, time management, homework completion, self-advocacy, and self-reflection. Instruction is differentiated to accommodate a variety of learning styles. Smaller class size allows teacher to incorporate one to one instruction when appropriate.

Social Studies

The social studies prepare youth for effective American citizenship, and for understanding the organization and institutions of society and human behavior in it. The purpose of social studies courses, which draw their content from various disciplines, is to provide insights into the operation and results of various kinds of social, economic, governmental, and political systems.

Social studies students will be given opportunities to discuss and explore various points of view rather than be led into single, unchallenged conclusions. The social studies seek to impart the following academic skills: reading various opinions and viewpoints, referring to original sources, discussing conflicting interpretations of the facts, and reaching conclusions which the student can support with evidence that has been classified and authenticated.

Four semesters of social studies, including two semesters of United States History, are required for graduation. Many colleges require three years of social studies for admission. The first semester course is a prerequisite for entry into the second semester of any full year subject.

WORLD HISTORY

753852 / 753854

Prerequisite: None

Open to: Grades 9-10

This course is an exploration of world history, stressing the importance of ideas across time and civilizations, as well as the political, social, economic, and intellectual institutions that have molded the modern world. The geographic focus will be on the Middle East, Europe, East and South Asia, and Africa. Specific units of study include Rise of Civilizations, Classical Civilizations, the Medieval World, Renaissance and Reformation, Exploration and Empire, Ideas and Revolutions, the 19th Century World, the World at War, and the Research Portfolio. Curricular emphasis will be on primary and secondary sources as well as literature and the arts. Students can expect daily reading and writing assignments, and assessments will include tests, projects, essays and class presentations. World History will emphasize the development of reading, research, and writing skills as indicated on Phase I of the Social Studies Department Skills Rubric.

Social Studies, continued

WORLD HISTORY SURVEY

753922 / 753924

Prerequisite: None

Open to: Grades 9-10

This course is an exploration of world history, stressing the importance of ideas across time and civilizations, as well as the political, social, economic, and intellectual institutions that have molded the modern world. The geographic focus will be on the Middle East, Europe, East and South Asia, and Africa. Specific units of study include Rise of Civilizations, Classical Civilizations, the Medieval World, Renaissance and Reformation, Exploration and Empire, Ideas and Revolutions, the 19th Century World, the World at War, and the Research Portfolio. Smaller class sizes promote the opportunity for more individualized learning to take place. Particular emphasis will be given to the acquisition and development through guided practice of the research, reading, and writing skills in Phase I of the Social Studies Skills Rubric.

WORLD HISTORY HONORS

754072 / 754074

Prerequisite: None

Open to: Grades 9-10

This course is an exploration of world history, stressing the importance of ideas across time and civilizations, as well as the political, social, economic, and intellectual institutions that have molded the modern world. The geographic focus will be on the Middle East, Europe, East and South Asia, and Africa. Specific units of study include Rise of Civilizations, Classical Civilizations, the Medieval World, Renaissance and Reformation, Exploration and Empire, Ideas and Revolutions, the 19th Century World, the World at War, and the Research Paper. Curricular emphasis will be on primary and secondary sources as well as literature and the arts. Students can expect daily reading and writing assignments, and will be expected to display the ability to function independently as both readers and writers. Assessments will include tests, projects, essays and class presentations. World History Honors will emphasize the development of reading, research, and writing skills as indicated on Phase I of the Social Studies Department Skills Rubric.

THE WESTERN WORLD: HISTORY

710052 / 710054

Prerequisite: Concurrent registration in The Western World: Literature

Open to: Grade 9

The Western World is a team-taught, interdisciplinary course that uses both historical and literary texts to examine the development of Western Civilization from the Classical Era through the 20th Century. Units of study include Classical Civilization, Medieval Europe, Renaissance and Reformation, Scientific Revolution and Enlightenment, French Revolution, Total War, and 20th Century Genocide. Class work is focused on class discussion and daily writing. Daily homework is assigned not only to extend and reinforce student learning, but also to develop independent analytical and processing skills. Literature selections may vary from year to year, but are always chosen to complement the historical ideas and themes studied. For example, students may read Dickens' *A Tale of Two Cities* while studying the French Revolution, Voltaire's *Candide* while studying the Enlightenment, Euripides' *The Trojan Women* while examining classical Greece, or a Shakespeare play while exploring Renaissance humanism. Students will integrate studies with both written and oral communication skills, and the course will emphasize the development of reading, research, and writing skills as indicated on Phase I of the Social Studies Department Skills Rubric. Students receive credit in both Social Studies and English.

WORLD HISTORY ALTERNATIVE

859442 / 859444

Prerequisite: Departmental recommendation

Open to: Grades 9-12

This course stresses the importance of political, social, economic, and intellectual institutions that have molded the modern world. The course focuses on Europe, Africa, East and South Asia, and the Middle East. Current events are incorporated and students draw connections between the past and the present. Development of reading, research, and writing skills will be emphasized. Teachers focus on skill building in areas such as organization, time management, homework completion, self-advocacy, and self-reflection. Instruction is differentiated to accommodate a variety of learning styles. Smaller class size allows the teacher to incorporate one to one instruction when appropriate.

MODERN HISTORY OF THE DEVELOPING WORLD

721352 / 721354

Prerequisite: None

Open to: Grades 9-10

Modern History of the Developing World examines contemporary Africa, East and South Asia, and Latin America. The course focuses on the current status of these regions and investigates to what extent the current situation is a result of the historical legacy of colonialism and imperialism. Various political, economic, geographical, and historical elements are considered, with an emphasis on incorporating accounts from the point of view of the native society rather than outsiders. Students generally have daily homework

Social Studies, continued

assignments, as well as long term projects. There are some tests throughout the year, but the class is more focused on projects and papers. The course will emphasize the development of reading, research, and writing skills as indicated on Phase I of the Social Studies Department Skills Rubric.

PERSPECTIVES: WORLD HISTORY

721052 / 721054

Prerequisite: Concurrent registration in Perspectives: Literature

Open to: Grade 10

Perspectives is a team-taught, interdisciplinary course for sophomores that uses both historical and literary texts. These readings, along with certain films, music, and art explore ideas and themes such as the search for meaning, the pursuit of knowledge, and the allocation of and competition for resources. Units of study investigate the history and literature of China, India, Africa, and the Middle East. Class work is focused on class discussion and daily writing. Homework is assigned daily, not only to extend and reinforce student learning, but also to develop independent analytical and processing skills. Perspectives students will integrate studies with both written and oral communication skills with a particular focus on persuasion and argumentation. The course will emphasize the development of reading, research and writing skills as indicated on Phase I of the Social Studies Department Skills Rubric. Students receive credit in both Social Studies and English.

UNITED STATES HISTORY

754452 / 754454

Prerequisite: Sophomores must have one year of social studies credit.

Open to: Grades 10-11

Note: Successful completion of this course satisfies the U.S. History graduation requirement.

This course offers a study of our nation's history concentrated on the period between the American Revolution and the present. Core areas of investigation include defining what it means to be an American, the functioning of a democratic republic, the interaction of governments and markets to create the context of American society, the impact of religious and cultural factors on events, the US role in a unilateral and multilateral world, the rights and responsibilities of citizenship, and an understanding of current events in their proper historical context. Assessments include formal essays, projects, tests, and class presentations. Students can expect daily reading and writing assignments. Additionally, all students in US History will be assigned one book (non-fiction or fiction) per semester to read independently. Regular participation in class discussion and activities is required. A variety of instructional strategies and materials are utilized. These may include discussion, simulations, debate, lecture, document analysis, film, and guest speakers. United States History will address the research, reading, and writing skills in Phase II of the Social Studies Skills Rubric.

UNITED STATES HISTORY SURVEY

754622 / 754624

Prerequisite: Departmental recommendation

Open to: Grades 11-12

Note: Successful completion of this course satisfies the U.S. History graduation requirement.

This course offers a study of our nation's history concentrated on the period between the American Revolution and the present. Core areas of investigation include defining what it means to be an American, the functioning of a democratic republic, the interaction of governments and markets to create the context of American society, the impact of religious and cultural factors on events, the US role in a unilateral and multilateral world, the rights and responsibilities of citizenship, and an understanding of current events in their proper historical context. Students should expect daily assignments and extended projects and papers at least once a month. Activities focus on text book reading, outside reading, lecture/notes taking, discussion, and multi-format tests and projects. Particular emphasis will be given to the acquisition and development through guided practice of the research, reading, and writing skills in Phase II of the Social Studies Skills Rubric.

ADVANCED PLACEMENT UNITED STATES HISTORY

754882 / 754884

Prerequisite: Sophomores must have one year of social studies credit.

Open to: Grades 10-11

Note: Successful completion of this course satisfies the U.S. History graduation requirement.

An intensive college level course with daily readings, both primary and secondary, and analytical writings accomplished independently. This course is a survey of United States history which emphasizes critical thinking, the analysis of source materials, and the examination of conflicting interpretations by historians of such themes as: the American Revolution, the Civil War, foreign relations, industrialism, immigration, and civil liberties and the courts. Advanced Placement US History addresses the research, reading, and writing skills in Phase II of the Social Studies Skills rubric.

Social Studies, continued

AMERICAN STUDIES: HISTORY

731452 / 731454

Prerequisite: Concurrent registration in American Studies: Literature.

Open to: Grade 11

Note: Successful completion of this course satisfies the U.S. History graduation requirement.

American Studies is a team-taught, interdisciplinary course combining the study of American history and literature. Students use one discipline to understand the other and the format of the course explores the connections between them. The course follows both chronological and thematic sequences, and explores a range of texts including novels, non-fiction, primary documents, essays, and speeches. By having two teachers in the classroom and meeting for an extended period of time, participating in a variety of small and large group work, discussion, and individual projects, the students join in building a unique learning community which fosters intellectual curiosity and risk-taking. Students examine the core beliefs and values of what it means to be an American through the study of the development of American government, and the role of America in the world, as well as grappling with challenging internal issues (e.g. Race, Immigration) and their ongoing legacy. Students develop a range of writing and reading skills both in and out of the classroom. Assignments and homework provide opportunities for students to develop confidence in expressing their own voices and ultimately seeing themselves as active participants in America in the 21st century. American Studies will address the research, reading, and writing skills in Phase II of the Social Studies Skills Rubric. Students receive credit in both Social Studies and English.

UNITED STATES HISTORY ALTERNATIVE

859342 / 859344

Prerequisite: Departmental Recommendation

Open to: Grades 11-12

Note: Successful completion of this course satisfies the U.S. History graduation requirement.

This course meets the U.S. History graduation requirement. It offers a study of our nation's history with major concentration on the period between the American Revolution and the present. The U.S. and Illinois constitutions are studied and students take the required constitution tests in the first semester of this course. Activities focus on text book reading, discussion, and multi-format tests and projects. Development of reading, research, and writing skills will be emphasized. Teachers focus on skill building in areas such as organization, time management, homework completion, self-advocacy, and self-reflection. Instruction is differentiated to accommodate a variety of learning styles. Smaller class size allows the teacher to incorporate one to one instruction when appropriate.

UNITED STATES HISTORY ESSENTIALS

856802 / 856804

Prerequisite: Departmental Recommendation

Open to: Grades 11-12

Note: Successful completion of this course satisfies the U.S. History graduation requirement.

This course meets the U.S. History graduation requirement. Illinois and U.S. Constitution Test preparation and administration are included in the course. Students will engage in guided practice while learning about our nation's history and government. The class focuses on skill development in reading, writing, group discussion, and critical thinking. Focus is on practical application and curriculum is taught using concrete examples. Class time is spent reading, using technology for information, discussing, as well as viewing media clips related to units of study. There will be homework to extend learning, but the assignments will generally be started in class under the teacher's supervision.

UNITED STATES HISTORY FUNDAMENTALS

853312 / 853314

Prerequisite: Departmental recommendation

Open to: Grades 11-12

Note: Successful completion of this course satisfies the U.S. History graduation requirement.

This year-long course offers a study of America from the 1600's to the present. The U.S. and Illinois constitutions are studied in an engaged format. Students take the constitution test as a graduation requirement. Forming connections with structured support to analyze concrete as well as abstract concepts is emphasized. Developing an understanding of the rights and responsibilities of citizenship, developing opinions and an awareness of U.S. past and current events and placing these events into an historical context are emphasized. Activities focus on discussions, projects, simulations and small groups using the students' learning styles and differentiated instruction.

Social Studies, continued

ADVANCED PLACEMENT EUROPEAN HISTORY

756482 / 756484

Prerequisite: Successful completion of U.S. History

Open to: Grades 11-12

AP European History is a demanding, college level course that requires a high level of commitment from the students. Daily reading and writing assignments are to be expected, as well as several formal analytical essays per semester. Reading assignments include significant primary document work. Students also participate in small group readings and analysis of significant works from the 17th, 18th, 19th, and 20th centuries. This course consists of a narrative, in-depth study of the landmark eras of European history from 1400 to the present. The course follows the political, economic, social, and cultural themes set out by the College Board. Among the essential questions considered are: what are the political, social, economic, and intellectual foundations of Modern Europe; what is the role of the nation-state and how does it regard the individual; what characterizes political, social, and economic revolutions; how are national histories unique; what are the preoccupations and assumptions of any age and how do those express themselves in political, social, cultural, and economic movements; and how can we understand the present in light of the past?

Instructional strategies include seminar discussion, lecture, simulation, document analysis, debate, and art and film analysis. Students are expected to take the AP exam in May, and to develop independence as learners and as thinkers. This course will address the research, reading, and writing skills in Phase III of the Social Studies Skills Rubric.

ISSUES IN MODERN AMERICAN SOCIETY

743052 / 743054

Prerequisite: None

Open to: Grade 12

Issues in Modern American Society examines current constitutional and domestic policy topics. This class will expose students to major domestic policy questions and examine the options from a variety of perspectives. Units of study include Terrorism and Domestic Security; Capital Punishment, Drug Control Policy, the Second Amendment, Freedom of Speech, the Right to Privacy, Affirmative Action, Gender Roles, Sexual Harassment, and Race Relations. Particular emphasis is given to legal rights and responsibilities of public high school students. Students are expected to be able to articulate their views both orally and in writing. Daily homework is de-emphasized in favor of a series of longer term assignments. At the conclusion of the course, students will know how to identify and think critically about the major issues confronting American society and be empowered participants in a democratic society. This course will focus on the development of research, reading, and writing skills in Phase III of the Social Studies Skills Rubric.

INTERNATIONAL RELATIONS (s)

756252 / 756254

Prerequisite: None

Open to: Grades 11-12

The course emphasizes class discussion of current events in the context of international relations, with a particular focus on the United States and how it conducts foreign policy. Students also specialize in an area (or areas) of the world and maintain journals developed from reading newspapers, magazines, scholarly periodicals and similar materials. Topics for reading and discussion will include Globalization, the Rules and Conduct of War, Multilateralism versus Unilateralism, International Terrorism, the Politics of Oil, Immigration, Nuclear Proliferation, Human Rights, and Environmental Degradation. Emphasis is on honing life skills such as participating in a civil discussion and/or debate, reading critically, research using primary and secondary sources, and the continued development of writing skills. Projects may include a joint crisis simulation with the Political Science course, where students role-play governmental leadership positions, as they attempt to resolve several developing crises. This course will emphasize the development of research, reading, and writing skills in Phase III of the Social Studies Skills Rubric.

POLITICAL SCIENCE (s)

755852 / 755854

Prerequisite: Sophomores must have one year of social studies credit.

Open to: Grades 10-12

Political Science is an introduction to the study of politics through the development of skills in reading, thinking, research, writing, and analysis. In studying political science and connecting to current events in federal, state, and local governments, students will develop a better understanding of politics, government, and democracy in the United States. Considerable attention is given to current national and international events as they relate to politics. Simulations and problem-based learning are fundamental to the course. Political Science will emphasize the development of research, reading, and writing skills in Phase III of the Social Studies Skills Rubric.

Social Studies, continued

INTRODUCTION TO PSYCHOLOGY (s)

755452 / 755454

Prerequisite: None**Open to:** Grades 11-12**Note:** Completion of Introduction to Psychology prohibits a student from taking Advanced Placement Psychology.

Introduction to Psychology presents the fundamental principles of individual behavior. The focus of the course is on human behavior, and the application of theoretical concepts to everyday student experiences is stressed. A quantitative approach is used wherever possible, so that the student can learn various techniques used by psychologists to measure behavioral phenomena. Class participation, demonstrations, discussions, and experiments are used to illustrate the principles developed in the course and assessed through daily homework assignments, exams, and longer term projects. Topics covered include general methods of psychological study, learning and personality theory, motivation, developmental, social, and abnormal psychology, biological influences on behavior, perceptions, and common emotional disorders. Introduction to Psychology will emphasize the development of research, reading, and writing skills in Phase III of the Social Studies Skills Rubric.

ADVANCED PLACEMENT PSYCHOLOGY

755682 / 755684

Prerequisite: Successful completion of one year of social studies**Open to:** Grades 10-12**Note:** Not open to students who have taken Introduction to Psychology

Advanced Placement psychology is a full year, college level course. Students will study the major core concepts and theories of psychology defined by the College Board and the American Psychological Association. All topics in psychology, such as social psychology, neurobiology, development, motivation, intelligence, and psychological disorders, will be covered and assessed through daily homework, exams, essays, projects, and book reports. Both qualitative and quantitative approaches are used in instruction to apply and connect psychology to the student's observations and life experiences. AP Psychology will emphasize the development of research, reading, and writing skills in Phase III of the Social Studies Skills Rubric

TWENTIETH CENTURY HISTORY

742652 / 742654

Prerequisite: Concurrent registration in 20th Century Literature**Open to:** Grade 12

20th Century History and Literature is an integrated, team-taught course for seniors that studies both historical and literary texts. These readings, along with certain films, music, and art explore ideas and themes within a particular context, and expose larger human truths. Student work is focused on class discussion and daily writing. Units of study are designed to explore specific historical eras, to expose a number of ongoing and connected themes, and to develop higher-order thinking and communication skills. Assignments focus on the integration of the disciplines.

Units of study may include Colonialism in Africa, the Russian Revolution, WWI, The Rise of Totalitarianism, WWII and the Bomb, the Holocaust, and Apartheid in South Africa. Readings vary from year to year, but have included: *King Leopold's Ghost*, *Heart of Darkness*, *The Master and Margarita*, *Darkness at Noon*, *Regeneration*, *The Plague*, *Copenhagen*, *Hamlet*, *Night*, *Cry*, *the Beloved Country*, and *My Traitor's Heart*. This course will emphasize the development of research, reading, and writing skills in Phase III of the Social Studies Skills Rubric. Students receive credit in both Social Studies and English.

SOCIOLOGY (s)

756052 / 756054

Prerequisite: Sophomores must have one year of social studies credit.**Open to:** Grades 10-12

Sociology is the study of human society and human behavior. In this course, the primary focus of exploration will be American society, although some case studies of other cultures may be included. Topics of study include understanding sociology as a discipline; societal and individual cultural development; values and moral development; deviance; socialization; gender development; race, ethnic, and gender stratification; and social class. Sociological coursework is comprised of reading and responding to the textbook, supplementary materials and non-fiction books; completing personal reflection papers; and engaging in class activities. Instructional methods include class discussion, cooperative learning, personal reflection, and the use of documentary films. A variety of assessment tools are used in Sociology including essay examinations, formal and informal papers, and a culminating group research project on a topic of interest selected by students. Homework and outside readings are assigned daily in addition to several longer term assignments. Sociology will emphasize the development of reading, writing and research skills as outlined in Phase III of the Social Studies Skills Rubric.

Social Studies, continued

SOCIOLOGY ALTERNATIVE

859542 / 859544

Prerequisite: Departmental recommendation

Open to: Grades 10-12

This course focuses on the study of human society and human behavior. The primary focus of exploration will be American society. Human development is analyzed from birth through death. Emphasis is given to importance of family and friends in understanding how a person fits into society. Major units of study include gender roles, self-concept, and current social problems. Class activities include discussion, group and individual projects and library research. Teachers focus on skill building in areas such as organization, time management, homework completion, self-advocacy, and self-reflection. Instruction is differentiated to accommodate a variety of learning styles. Smaller class size allows the teacher to incorporate one to one instruction when appropriate.

ECONOMICS (s)

755052 / 755054

Prerequisite: Sophomores must have one year of social studies credit.

Open to: Grades 10-12

Note: Completion of Economics prohibits a student from taking Advanced Placement Economics

Note: Successful completion of this course fulfills the graduating requirement for Consumer Education.

The fundamental task of any basic economics course is to provide the student with the requisite skills to be a rational being. Students will learn how to separate emotion from reason. Rational thinkers are better able to address the economic and personal choices individuals make in their daily lives. By the end of a semester, students should be able to apply “the economic way of thinking” to any life situation. While much of the class will be taught on a conceptual level, an understanding of the “big picture” and connections to everyday life will be the principal focus. In addition, the sophisticated mathematical/graphic models that economists use will be taught at an more introductory level. This course will be valuable to students whether they plan on majoring in business or plan on never taking economics again. Students will find that economics permeates our society, and having a working knowledge of the discipline will offer them a profound advantage in life.

ADVANCED PLACEMENT MICROECONOMICS AND MACROECONOMICS

755282 / 755284

Prerequisite: Sophomores must have one year of social studies credit.

Open to: Grades 10-12

Note: Not open to students who have taken Economics

Note: Successful completion of this course fulfills the graduating requirement for Consumer Education

The main purpose of this full year economics course is to provide individuals with an understanding of the “economic way of thinking.” The primary focus will be placed on expanding the student’s ability to problem-solve in a rational and logical manner. The course will provide detailed instruction in all of the topics covered on the A.P. tests. Units will primarily be taught with an emphasis on preparing students to be successful on multiple-choice and free-response style questions. Instruction will be varied based on whether the topic is conceptual, mathematical, or involves primarily economic vocabulary. The level of sophistication of the graphic models used will greatly exceed those introduced in Economics 1. Daily assignments require a rigorous approach to reading a college level text and practicing problems. Two major research papers are the culminating assessments of the course. This course is excellent preparation in the analytic process needed to achieve success in either A.P. United States History or A.P. European history. This course will emphasize the development of research, reading, and writing skills in phase III of the Social Studies Skills Rubric. A.P. Economics is a unique course that develops a method of thinking and problem solving that is valuable far beyond economics and public policy issues. Learning to “think like an economist” is a special skill that will give students an advantage in life.

GEOGRAPHY AND WORLD AFFAIRS FUNDAMENTALS

869802 / 869804

Prerequisite: Departmental recommendation

Open to: Grades 9-12

This course focuses on the development of content knowledge and specific academic skills to strengthen understanding of physical and cultural geography and current world events. Units of study include (1) the five themes of geography, (2) physical geography: the seven continents, landforms and bodies of water, (3) human geography: world cultures, map, chart and graph skills, and (4) world, national, and local current events. The delivery of instruction is differentiated to support student learning styles and skills. A variety of assessment formats are used based on student need. Specific strategies and techniques focus on reading comprehension, listening and discussion, note taking, cooperative grouping, and the effective and appropriate use of technology. This class also includes brief, daily homework assignments. Upon completion of this course, students will be able to locate, describe and explain places, regions and features on the earth, analyze and explain characteristic and interactions of the earth’s physical systems, understand relationships between geographic factors and society, and understand the historical significance of geography.

Social Studies, continued

GEOGRAPHY AND WORLD AFFAIRS ESSENTIALS

857002 / 857004

Prerequisite: Departmental recommendation

Open to: Grades 9-12

This course gives students the opportunity to develop basic map and graph reading skills in addition to reading, writing, and group discussion. Instruction is differentiated to meet the needs of individual students. Focus is on practical application and curriculum is taught using concrete examples. Content explored includes cultural, physical, and political geography. Current cultural and political events are integrated within the study of different geographic areas. There will be homework to extend learning, but the assignments will generally be started in class under the teacher's supervision.

This course fulfills a social studies requirement.

GEOGRAPHY AND WORLD AFFAIRS ALTERNATIVE

859642 / 859644

Prerequisite: Departmental recommendation

Open to: Grades 9-12

This course develops basic map skills, graph reading and group discussion skills. Current cultural and political events are integrated with the study of different geographic areas. Class activities include projects, discussion, debate, and library research. Teachers focus on skill building in areas such as organization, time management, homework completion, self-advocacy, and self-reflection. Instruction is differentiated to accommodate a variety of learning styles. Smaller class size allows the teacher to incorporate one to one instruction when appropriate.

SOCIAL ISSUES FUNDAMENTALS

853412 / 853414

Prerequisite: Departmental recommendation

Open to: Grades 11-12

Social Issues is a dynamic class that exposes students to major domestic policy questions dealing with social, moral, political and economic dilemmas faced in the modern world. The essence of the class is to provoke critical thinking in regards to these policies and examine different perspectives about terrorism, domestic security, capital punishment, drug control, school laws, freedom of speech, gender roles and a slew of other modern day issues that can directly impact the student's life in school and after they move beyond Deerfield High School. The work load and project time lines may change based on the topic being discussed and the variation of the student understanding. Specific attention is focused on the acquisition of vocabulary on the topics mentioned above, developing confidence to speak in a small group and large group setting, application, analysis and synthesis of topics to the general public. Differentiated instruction techniques allow students to demonstrate knowledge and opinions.

SOCIAL ISSUES ESSENTIALS

857102 / 857104

Prerequisite: Departmental recommendation

Open to: Grades 11-12

This course gives students the opportunity to examine issues in our world while developing skills in reading, writing, group discussion and critical thinking. Instruction is differentiated to meet the needs of individual students. Focus is on practical application and curriculum is taught using concrete examples. Content explored includes cultural diversity, social skills, problem-solving, and employment. Class time is spent reading, using technology for information, discussing, as well as viewing media clips related to units of study. There will be homework to extend learning, but the assignments will generally be started in class under the teacher's supervision. This course fulfills a social studies requirement.

Special Education

LEARNING STRATEGIES

850022 / 850024

Prerequisite: Departmental Recommendation

Students are taught specific learning strategies in the areas of academic skills, study strategies, self-advocacy, problem-solving, and post-high school preparation. Materials from students' academic course and supplementary material are used in the application of learning techniques. Instructional goals are developed for each student on an individual basis. Consultation with content area teachers is provided. The number of days of student attendance is determined by recommendation. Students who attend 4 periods or more per week earn .5 or a credit per semester and those who attend 2 periods per week earn .25 of a credit per semester. Learning Strategies is a pass/fail course and may be repeated.

LEARNING STRATEGIES ESSENTIALS

854412 / 854414

Prerequisite: Departmental Recommendation

Students are taught strategies to support their achievement. Depending on student need, instruction may be provided in the areas of social skills, speech and language skills, and problem-solving skills. This course is intended for students who enroll in other Essentials courses. Materials from students' academic course and supplementary material are used in the application of learning techniques. Instructional goals are developed for each student on an individual basis. Students who attend 4 periods or more per week earn .5 or a credit per semester and those who attend 2 periods per week earn .25 of a credit per semester. Learning Strategies is a pass/fail course and may be repeated.

MANAGING ACADEMIC PERFORMANCE

850322 / 850324

Prerequisite: Departmental Recommendation

Students develop skills and strategies to improve school functioning by learning to manage attention, organization, assignment completion, time management, conflict resolution, quiz/test preparation and attendance. In addition, each student works on their individual goals. Activities revolve around acquiring these skills and meeting goals, as well as focusing on problem-solving and communication skills with peers and adults. Supervised study time is structured support that focuses on study and organizational strategies as well as management skills. In addition to the above support, consultation with the classroom teachers is provided and crisis intervention is available as needed. The number of attendance days per week is based upon department recommendation. Students enrolled in two days per week earn .5 credits per semester. Students are also graded on the DHS standard grading scale based on the points they earn in class. This course is a year course and may be repeated.

World Language

The World Languages Department believes that the acquisition of a second language is an essential skill for the 21st century. Citizens of a global community must be equipped to communicate and work with citizens of other countries and cultures. Fluency in another language will facilitate and make more meaningful both travel and international study. The study of another language enables the learner to understand the practices and perspectives of other cultures as well as our own.

In the modern languages, emphasis is placed from the beginning on attaining listening, speaking, reading, and writing skills. The structure of the language is introduced to the extent necessary to make continued growth in comprehension and expression possible. The emphasis is on use of the language in the class and in outside preparation, not on talking about the language.

World languages are elective; they are not required for graduation. Many colleges, however, require or recommend two or more years of language for admission. Many colleges have a language requirement for college graduation. In such cases it is often possible for a student to fulfill the requirement with high school language study. The student should check the requirements of the colleges he/she is considering.

A student may begin study of a world language as a freshman, sophomore, junior, or senior. Students who have studied a world language in the elementary school or who have resided in a country where the language is spoken may qualify for advanced classes through proficiency tests.

Placement into Honors classes is based upon teacher recommendations and prior grades in world language. Honors classes are usually offered in Spanish II, Spanish III, Spanish IV, Spanish V (AP), French II, French III, French IV, French V (AP). Students enrolled in Chinese II, Chinese III, Chinese IV, Hebrew II, III, IV, and V may elect an Honors option with approval of the instructor. The offering of Honors courses is dependent upon enrollment.

CHINESE I

950052 / 950054

Prerequisite: None

The Chinese I curriculum covers all aspects of language acquisition, including listening, speaking, reading, and writing skills

- **Basic Units:** Learn “Hanyu Pinyin Phonetic System” (“Pinyin”) to aid in the pronunciation of Chinese characters. And learn commonly-used classroom vocabulary, practical daily conversation, numbers, the days of the week, colors, Chinese zodiac and also learn basic Chinese character strokes and characters, basic radicals, and simple grammatical structures.
- **Chinese Link:** Learn Lessons 1 through 5 from Chinese Link 2nd Edition Level 1, Part 1, including Greetings, Names, Nationalities and Languages; Studies and Introductions.

CHINESE II

950152 / 950154

Prerequisite: Chinese I

The Chinese II and Chinese II Honors curriculum covers all aspects of language acquisition, including listening, speaking, reading, and writing skills. This course builds on the speaking, listening, reading and writing skills developed in Chinese I. Guided writing strategies support students’ use of more complicated grammatical structures. Various aspects of Chinese cultures are incorporated into course work and students draw comparisons between American and Chinese cultures. Speaking Chinese during lessons is expected.

Chinese II Honors students are expected to be able to write both Traditional and Simplified writings.

- **Review Units:** “Hanyu Pinyin Phonetic System” (“Pinyin”) to aid in the pronunciation of Chinese characters. And commonly-used classroom vocabulary, practical daily conversation, numbers, the days of the week, colors, Chinese zodiac and also learn basic Chinese character strokes and characters, basic radicals, simple grammatical structures.
- **Chinese Link:** Learn Lessons 6 through 11 from Chinese Link 2nd Edition Level 1, Part 1, including Family, Addresses, Meeting and Making Plans; Phone Calls; Time and Schedules; and Ordering Food.

World Language, continued

CHINESE III

950352 / 950354

Prerequisite: Chinese II

The Chinese III and Chinese III Honors curriculum covers all aspects of language acquisition, including listening, speaking, reading, and writing skills. The third year student develops increasing fluency in the language through dialogue practice and spontaneous class discussion. The study of grammar and vocabulary reinforces previously developed skills and refines students' ability to express themselves in the target language. Students give short oral presentations in Chinese based on a variety of themes. Students are expected to interact with the teacher and peers using Chinese. Various aspects of Chinese culture are incorporated into coursework and students draw comparisons between American and Chinese culture. Speaking Chinese during lessons are expected. Chinese III Honors students are expected to be able to write both Traditional and Simplified writings.

- **Review Units:** “Hanyu Pinyin Phonetic System” (“Pinyin”) to aid in the pronunciation of Chinese characters. And commonly-used classroom vocabulary, practical daily conversation, numbers, the days of the week, colors, Chinese zodiac and also learn basic Chinese character strokes and characters, basic radicals, simple grammatical structures.
- **Chinese Link:** Learn Lessons 12 through 17 from Chinese Link 2nd Edition Level 1, Part 2 including Making Requests; Clothes and Shopping; Birthdays and Celebrations; Location and Position; Hobbies and Sports; and Weather and Seasons.

CHINESE IV

950552 / 950554

Prerequisite: Chinese III

The Chinese IV and Chinese IV Honors curriculum covers all aspects of language acquisition, including listening, speaking, reading, and writing skills. The fourth year student develops increasing fluency in the language through dialogue practice and spontaneous class discussion. The study of grammar and vocabulary reinforces previously developed skills and refines students' ability to express themselves in the target language. Students give short oral presentations in Chinese based on a variety of themes. Students are expected to interact with the teacher and peers using Chinese. Various aspects of Chinese culture are incorporated into coursework and students draw comparisons between American and Chinese culture. Speaking Chinese during lessons are expected. Chinese IV Honors students are expected to be able to write both Traditional and Simplified writings.

- **Review Units:** “Hanyu Pinyin Phonetic System” (“Pinyin”) to aid in the pronunciation of Chinese characters. And commonly-used classroom vocabulary, practical daily conversation, numbers, the days of the week, colors, Chinese zodiac and also learn basic Chinese character strokes and characters, basic radicals, simple grammatical structures.
- **Chinese Link:** Learn Lessons 18 through 22 from Chinese Link 2nd Edition Level 1, Part 2 including Travel and Transportation; Health and Medicine; Renting an Apartment; Future Plans; and Arts and Culture.

FRENCH I

950752 / 950754

Prerequisite: None

First-year French begins with oral work to develop correct pronunciation and intonation and to enable the student to understand and to speak French from the start. Text materials provide insights into French culture and teen-age activities. Practical vocabulary enables the students to discuss these readings and their own experiences in French. Online materials used in the classroom aid in achieving this elementary fluency and aural comprehension. The students learn to read simple texts and to write correctly what they have studied. TPR (Total Physical Response) is used to build vocabulary.

FRENCH II

950852 / 950854

Prerequisite: Minimum grade of C in French I or departmental recommendation

In the second year, speaking and listening continue to be stressed, with study of structure and usage increased and vocabulary building emphasized, so that the students grow in their ability to understand and to use the language. In the classroom, students practice speaking and listening through the use of paired activities and DVDs. Students will develop writing skills through guided practice. Reading skills are enhanced through the use of authentic materials: newspapers, articles from the internet, and poetry. In addition, students in French II Honors Level I students will read literary selections and begin independent language lab work to build listening skills.

FRENCH III

951052 / 951054

Prerequisite: Minimum grade of C in French II

In the third year, the students continue to work on oral proficiency and comprehension. Cultural readings and videos form the basis for discussion and composition. Students will read literary selections and will begin to build toward composition writing. Students in French III Honors will have independent assignments in the language lab. Students will be expected to write with grammatical accuracy.

World Language, continued

FRENCH IV

951252 / 951254

Prerequisite: Minimum grade of C in French III

In the fourth year, the students read various types of literature and selections about French life and culture. Vocabulary study, review of grammar and composition are continued. Opportunity for speaking French is provided in classroom discussion and small groups. In French IV Honors, students regularly attend the language lab to develop listening skills. Video and film is used extensively in both courses both for listening comprehension and cultural knowledge.

FRENCH V

951452 / 951454

AP FRENCH LANGUAGE

951582 / 951584

Prerequisite: Minimum grade of C in French IV

In the fifth year, the students continue to develop and refine their proficiency in the four language skills: speaking, reading, writing and listening. The students will read and analyze articles from the French press, as well as a work of contemporary fiction. The students will listen to and discuss interviews of native speakers, news reports, commercials, and songs. In order to improve writing and speaking skills, the students will continue to acquire new vocabulary, and will refine mastery of French grammar. Class time will focus on speaking skills through small and large group activities. In Advanced Placement, students will prepare for the Advanced Placement Exam in French Language and will be required to do additional independent reading, writing, and listening.

MODERN HEBREW I

951652 / 951654

Prerequisite: None

The first year of Modern Hebrew, which begins with a study of the alphabet, develops the four language skills: listening, speaking, reading and writing. The comprehension of simple spoken Hebrew and the development of the ability to express oneself simply are course goals. Grammar and vocabulary are studied to develop the student's facility to read simple material and to write simple but original paragraphs employing the vocabulary and structures learned. Israeli culture is studied to give meaning to the study of the language.

MODERN HEBREW II

951752 / 951754

Prerequisite: Minimum grade of C in Hebrew I

In second year, vocabulary building and a greater comprehension of both spoken and written Hebrew are emphasized. Through the reading the discussion of simple Hebrew texts, the student grows in the ability to use the language. Oral and written drills in class help the student to develop fluency. Grammar work and composition play a greater role with the completion of major grammatical concepts. The study of Israeli culture will also play an integral part. In Modern Hebrew II Honors, students will be required to do extensive independent reading.

MODERN HEBREW III

951952 / 951954

Prerequisite: Minimum grade of C in Hebrew II or recommendation based on placement exam and teacher evaluation.

In Hebrew III students continue to develop their speaking, listening, reading, and writing skills. Short cultural texts form the basis for discussion and composition. Students continue to enhance their knowledge of Hebrew grammar in order to communicate both orally and in writing. Modern Hebrew III Honors students will be required to do more complex reading and will be expected to demonstrate more accuracy in grammar.

MODERN HEBREW IV

952152 / 952154

Prerequisite: Minimum grade of C in Hebrew III

Students continue to improve communicative competence in both oral and written Hebrew, enhance listening comprehension and develop reading skills through literature and articles from Hebrew publications. Throughout the year students write original compositions, and deliver oral presentations. The class is conducted in Hebrew. In Modern Hebrew IV Honors, students will be required to do more complex reading and will be expected to demonstrate more accuracy in grammar.

MODERN HEBREW V

952352 / 952354

Prerequisite: Minimum grade of C in Hebrew IV

In Hebrew V, students continue to develop and refine their proficiency in the four language skills: speaking, reading, writing, and listening. Students will read and discuss articles from the Israeli press as well as works from contemporary fiction. In order to improve writing and speaking skills, students will continue to acquire new vocabulary and will refine mastery of Modern Hebrew grammar. Class time will focus on speaking skills through small and large group activities. In Modern Hebrew V Honors, students will be required to do additional independent reading and writing.

World Language, continued

SPANISH I

953452 / 953454

Prerequisite: For students who have no previous experience in Spanish.

In Spanish I Standard, the student learns to understand, to speak, to read, and to write simple Spanish with accuracy in pronunciation and word usage. The basic grammatical structure of the language is introduced. Classroom activities support and reinforce the learning targets for each chapter. Chapters are organized thematically. Formative and summative assessments include preparation of dialogue, question/answer exchanges, and simple reading and writing exercises. The cultural background of Spanish-speaking countries is introduced through short films and simple, authentic readings.

SPANISH I SURVEY

953522 / 953524

Prerequisite: Departmental recommendation

In Spanish I Survey, the student learns to understand, to speak, to read, and to write simple Spanish with accuracy in pronunciation and word usage. The basic grammatical structure of the language is introduced. Classroom activities support and reinforce the learning targets for each chapter. Chapters are organized thematically. Formative and summative assessments include preparation of dialogue, question/answer exchanges, and simple reading and writing exercises. The cultural background of Spanish-speaking countries is introduced through short films and simple, authentic readings.

SPANISH II

953752 / 953754

Prerequisite: Minimum grade of C in Spanish I, or recommendation based on placement exam and teacher evaluation.

In Spanish II Standard, the students review and expand upon the skills taught in Spanish I. Through reading, listening, vocabulary and cultural activities, students improve fluency, comprehension and cultural knowledge. Course content will be thematic, highlighting real world connections to students' use of Spanish skills.

SPANISH II SURVEY

953822 / 953824

Prerequisite: Departmental recommendation

In Spanish II Survey the students review and expand upon the skills taught in Spanish I. Through reading, listening, vocabulary and cultural activities, students improve fluency, comprehension and cultural knowledge. Course content will be thematic, highlighting real world connections to students' use of Spanish skills.

SPANISH II HONORS

953872 / 953874

Prerequisite: Minimum grade of C in Spanish I, or recommendation based on placement exam and teacher evaluation.

In Spanish II Honors, the students review and expand upon the skills taught in Spanish I. Through reading, listening, vocabulary and cultural activities, students improve fluency, comprehension and cultural knowledge. Course content will be thematic, highlighting real world connections to students' use of Spanish skills. This course also offers additional vocabulary and grammar concepts.

SPANISH III

953952 / 953954

Prerequisite: Minimum grade of C in Spanish II

This course continues the development of speaking, reading and listening skills. Students will be able to speak about a variety of topics in the present, past and near future. Students will acquire additional vocabulary to support their use of Spanish in real-world applications. Students will read an abridged novel to enhance their reading comprehension and to improve their spoken Spanish. Students will also read short articles from newspaper and internet sources, as well as listen to authentic news stories to develop listening comprehension.

SPANISH III SURVEY

954022 / 954024

Prerequisite: Departmental recommendation

This course continues the development of speaking, reading and listening skills. Students will be able to speak about a variety of topics in the present, past and near future. Students will acquire additional vocabulary to support their use of Spanish in real-world applications. Students will read an abridged novel to enhance their reading comprehension and to improve their spoken Spanish. Students will also read short articles from newspaper and internet sources, as well as listen to authentic news stories to develop listening comprehension.

SPANISH III HONORS

954172/954174

Prerequisite: Department recommendation

This course continues the development of speaking, reading and listening skills. Students will be able to speak about a variety of topics in the present, past and near future. Students will also be able to express themselves using commands and the present subjunctive. Students will acquire additional vocabulary to support their use of Spanish in real-world applications. Students will read an abridged novel to enhance their reading comprehension and to improve their spoken Spanish. Students will also read a variety of

World Language, continued

authentic texts including newspaper and internet articles, poetry and short stories. Lastly, students will develop listening comprehension skills through authentic internet news videos.

SPANISH IV

954252 / 954254

Prerequisite: Minimum grade of C in Spanish III

This course emphasizes real communication in meaningful cultural contexts. The language skills and cultural knowledge that students gain in this course will enable them to function in the future in Spanish-speaking countries and in our own communities. Students improve their proficiency in Spanish as they explore various countries where Spanish is spoken and become acquainted with the diversity of Hispanic culture. Spanish IV Standard teaches vocabulary, grammar, and culture through literature and a video series.

SPANISH IV SURVEY

954322 / 954324

Prerequisite: Departmental recommendation

In Spanish IV Survey, students continue to develop speaking, reading, and listening skills. Students will be able to speak about a variety of topics in the present, past and near future. Increased emphasis will be placed on writing. Grammar topics will be introduced to the extent that they support writing skills. Students will view a video series that will help develop listening and speaking skills. Texts on current events from the Spanish press and the internet will be used to build reading comprehension.

SPANISH IV HONORS

954472/954474

Prerequisite: Minimum grade of C in Spanish III Honors

This course emphasizes real communication in meaningful cultural contexts. The language skills and cultural knowledge that students gain in this course will enable them to function in the future in Spanish-speaking countries and in our own communities. Students improve their proficiency in Spanish as they explore various countries where Spanish is spoken and become acquainted with the diversity of Hispanic culture. Spanish IV Honors students will do more complex reading, listening, writing, and speaking, and will complete listening comprehension activities outside of class. Spanish IV Honors along with AP Spanish the following year will emphasize skills that will prepare students to be successful on the AP Spanish Language Exam.

SPANISH V

954552 / 954554

Prerequisite: Minimum grade of C in Spanish IV

In Spanish V Standard, students will expand their skills in reading, writing, speaking and listening. Extensive use of video materials will be used. Students will read and analyze authentic Hispanic texts. All work will be done in Spanish.

AP SPANISH LANGUAGE

954682 / 954684

Prerequisite: Minimum grade of C in Spanish IV Honors

In AP Spanish Language, students will expand their skills in reading, writing, speaking and listening as well as continue to gain an appreciation and understanding of Hispanic culture. Students will read and analyze authentic non-fiction Hispanic texts and important works of fiction. All work will be done in Spanish. Students will listen to and view authentic audio-visual materials and will complete listening comprehension activities outside of class. Whenever possible, students will integrate two or more skills per task. In this course, students will prepare for the Spanish Language Advanced Placement Exam. The syllabus for this course has been approved by the AP College Board. 

SPANISH THROUGH SERVICE-BASED LEARNING

954752 / 954754

Prerequisite: Spanish I, Spanish II, Spanish III and Spanish IV or departmental approval

Open to: Grade 12

Note: Please check individual college proficiency requirements before registering for this course if this is your fourth year of high school foreign language.

Spanish Through Service-Based Learning provides an opportunity for seniors to use the Spanish that they have acquired in the classroom in a real-world setting. Students will go to Mark Twain and Whitman Elementary Schools in Wheeling once or twice a week in order to mentor and teach Hispanic students in bilingual classes. Through their work with native speakers, our students will advance in their speaking and listening skills. Since students will not meet in a traditional classroom setting, they will continue to work on writing skills through online written discussions. Enrollment in this class is limited. Although the class is designed for seniors, applications from underclassmen will be considered. This course requires that a student have a two period block of time for travel to and from Mark Twain.
